MINISTRY OF EDUCATION**

BASIC EDUCATION STATISTICAL BOOKLET 2020

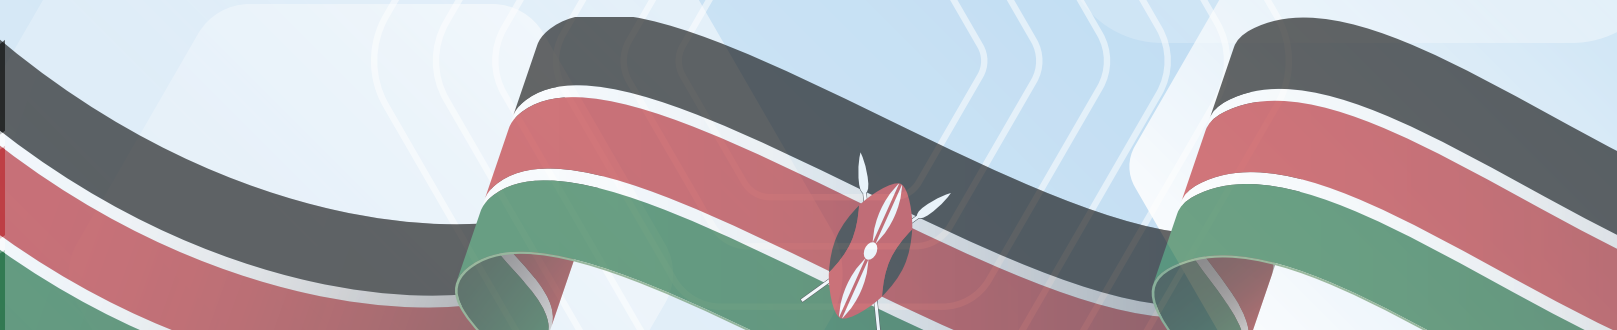

TABLE OF CONTENTS

LIST OF ACRONYMS AND ABBREVIATIONS	x
DEFINITION OF TERMS	xii
FOREWORD	xiii
PREFACE	xiv
ACKNOWLEDGEMENT	xv
EXECUTIVE SUMMARY	xvi
1. BACKGROUND AND CONTEXT	1
1.1. Introduction	1
1.2. National Education Policy Framework and Structure	1
1.3. Commitments to International Conventions and Agreements	2
1.4. Developments in Data Management.....	2
1.5. Kenya's Geographical Location, Demographic and Macroeconomic Context.....	3
1.5.1 Geographical Location.....	3
1.5.2 Kenya's Demographic Context.....	3
1.5.3 Kenya's Macroeconomic Context	4
2. METHODOLOGY	7
2.1. Introduction	7
2.2. Scope of the Statistical Booklet.....	7
2.3. Sources of Data and Data Collection.....	7
2.4. Data Processing and Report Writing.....	7
2.5. Data Quality	7
3. STATUS OF PRE-PRIMARY EDUCATION	9
3.1. Introduction	9
3.2. Access, Equity and Inclusion in Pre-Primary Education	9
3.2.1 Number of Pre-Primary Schools	9
3.2.2 Enrolment in Public and Private Pre-Primary Schools.....	9
3.2.3 Average School Size in Pre-primary Education.....	10
3.2.4 Learners with Special Needs in Pre-Primary Education.....	11
3.2.5 Access and Participation Rates in Pre-Primary Education	11
3.2.6 Equity in Pre-Primary Education.....	12
3.3. Quality and Relevance in Pre-Primary Education	16

3.3.1	Learner-to-Teacher Ratios at Pre-Primary Education	17
3.3.2	Learner-Classroom Ratios at Pre-Primary Education	18
3.3.3	Learner to Toilet Ratio in Pre-Primary Schools	20
3.3.4	Basic ICT Infrastructure in Pre-Primary Education	22
4.	STATUS OF PRIMARY EDUCATION	25
4.1.	Introduction	25
4.2.	Access, Equity and Inclusion in Primary Education	25
4.2.1	Number of Primary Schools.....	25
4.2.2	Enrolment in Public and Private Primary Schools	25
4.2.3	Average School Size in Primary Education	27
4.2.4	Learners with Special Needs in Primary Education	27
4.2.5	Access and Participation Rates in Primary Education	28
4.2.6	Equity in Primary Education.....	29
4.3.	Quality and Relevance in Primary Education	35
4.3.1	Survival Rates in Primary Education	35
4.3.2	Number of Teachers and Pupil-to-Teacher Ratio in Primary Education	36
4.3.3	Number of Classrooms and Learner-to-Classroom Ratios	39
4.3.4	Learner-Toilet Ratios at Primary Education Level.....	41
4.3.5	Access to Electricity in Primary Schools.....	43
4.3.6	Basic ICT Infrastructure in Primary Schools.....	44
5.	STATUS OF SECONDARY EDUCATION	45
5.1.	Introduction	45
5.2.	Access, Equity and Inclusion in Secondary Education	45
5.2.1	Number of Secondary Schools.....	45
5.2.2	Enrolment in Public and Private Secondary Schools	45
5.2.3	Average School Size in Secondary Education	46
5.2.4	Enrolment of Learners with Special Needs in Secondary Education	46
5.2.5	Access and Participation Rates in Secondary Education.....	47
5.2.6	Equity in Secondary Education	48
5.3.	Quality and Relevance in Secondary Education	54
5.3.1	Primary to Secondary Education Transition Rates	54
5.3.2	Survival Rates in Secondary Education.....	55
5.3.3	Teachers, and Student-to-Teacher Ratios at Secondary Education Level.....	56
5.3.4	Student-to-Classroom Ratios in Secondary Education	59

5.3.5 Student-to-Toilet Ratios in Secondary Education	60
5.3.6 Number of Science Laboratories in Secondary Schools	61
5.3.7 Number of Workshops for Technical Subjects in Secondary Schools.....	62
5.3.8 Basic ICT Infrastructure in Secondary Schools	62
6. NATIONAL ASSESSMENTS AND EXAMINATIONS	63
6.1. National Assessments.....	63
6.1.1 Re-entry Learning Assessments under the Learning Continuity in Basic Education.....	63
6.2. National Examinations.....	66
6.2.1 KCPE National Examinations	66
6.2.2 KCSE National Examinations.....	69
7. TEACHER EDUCATION	73
7.1. Number of Teacher Training Colleges.....	73
7.2. Number of Tutors in Teacher Training Colleges	73
7.3. Enrolment in P1 Teacher Training Colleges	73
7.4. Enrolment in Diploma Teacher Training Colleges.....	74
8. ADULT AND CONTINUING EDUCATION	75
8.1. Number of Adult and Continuing Education Centers.....	75
8.2. Enrolment in Adult and Continuing Education Programmes	75
9. EDUCATION FINANCING	77
10. SUMMARY OF FINDINGS, RECOMMENDATIONS AND POLICY IMPLICATIONS	81
10.1. Summary of Findings.....	81
10.2. Recommendations and Policy Implications.....	82
ANNEX I: PRE-PRIMARY LEVEL TABLES BY COUNTY	84
ANNEX II: PRIMARY LEVEL TABLES BY COUNTY	94
ANNEX III: SECONDARY LEVEL TABLES BY COUNTY	110
ANNEX IV: NATIONAL ASSESSMENTS AND EXAMINATIONS	124
ANNEX V: ADULT AND CONTINUING EDUCATION	127
NOTES	129

LIST OF TABLES

Table 1. 1:	Total Population and School-Age Population, 2020.....	4
Table 1. 2:	Trends in GDP at Market Prices (in millions), 2016 – 2020	4
Table 1. 3:	Education Sector Contribution to GDP at Current Prices (Millions KES)	5
Table 3. 1:	Number of Pre-Primary Schools, 2017-2020.....	9
Table 3. 2:	Enrolment in Public and Private Pre-Primary Schools 2017-2020	10
Table 3. 3:	Enrolment in Pre-Primary Schools by Class, Sex and Category, 2019-2020.....	10
Table 3. 4:	Average School Size at Pre-primary Education Level.....	11
Table 3. 5:	Enrolment of Learners with Special Needs in Pre-Primary Schools, 2020.....	11
Table 3. 6:	Gross Enrolment Ratios, in Pre-Primary by Sex, 2020	11
Table 3. 7:	Enrolment in Pre-primary Education Level, by Sex, 2019 - 2020	13
Table 3. 8:	Enrolment in Pre-primary Education Level and Gender Parity Index, 2019 - 2020.....	13
Table 3. 9:	Number of Teachers and PTR in Pre-Primary Education Level, 2019-2020.....	17
Table 3. 10:	Number of Classrooms in Pre-Primary Schools, and Class Size, 2020	19
Table 3. 11:	Learner to Toilet Ratio in Pre-primary Schools, 2020.....	20
Table 3. 12:	Number of Computers/ Tables and Proportion of Schools with Internet.....	22
Table 4. 1:	Number of Primary Schools by Category, 2018-2020.....	25
Table 4. 2:	Enrolment in Public and Private Schools 2017-2020.....	25
Table 4. 3:	Enrolment in Grade 1 -6 (ISCED 1), 2020.....	26
Table 4. 4:	Enrolment of Learners in Lower Secondary, (ISCED 2), 2020	27
Table 4. 5:	Average School-size in primary schools.....	27
Table 4. 6:	Number of Primary Schools with SNE learners, 2017-2020	27
Table 4. 7:	Enrolment of Learners with Special Needs in Primary Schools, 2020.....	28
Table 4. 8:	Enrolment of Stage-based SNE Learners, 2020.....	28
Table 4. 9:	Gross Enrolment Ratio at Primary Education Level, 2019-2020.....	28
Table 4. 10:	Net Enrolment Rate at Primary Education Level, 2020	29
Table 4. 11:	Enrolment Primary School by Sex for the Year 2018-2020	30
Table 4. 12:	Enrolment by Sex and Grade/Class, 2019- 2020.....	30
Table 4. 13:	Number of Teachers in Primary Schools by Category and Sex, 2016-2020.....	37
Table 4. 14:	Public Primary School Teachers by Qualification and Sex, 2018 – 2020.....	37
Table 4. 15:	Pupil-Teacher Ratio at Primary Education Level, 2020	38
Table 4. 16:	Capacity Building for Implementation of CBC.....	39
Table 4. 17:	Pupil-to-Classroom Ratios at Primary Education Level, 2020	40

Table 4. 18:	<i>Pupil-to-Toilet Ratios at Primary Education Level</i>	41
Table 4. 19:	<i>Computers Learners Ratio-Public vs Private</i>	44
Table 5. 1:	<i>Number of secondary schools, 2017-2020</i>	45
Table 5. 2:	<i>Enrolment in Public and Private Secondary Schools, 2018 - 2020</i>	45
Table 5. 3:	<i>Enrolment by Class, and Category of Secondary Schools,</i>	46
Table 5. 4:	<i>Average School Size in Secondary Schools</i>	46
Table 5. 5:	<i>Public Secondary Schools and SNE Enrolments from 2017 to 2020</i>	47
Table 5. 6:	<i>Enrolment of Learners with Special Needs in Secondary Schools</i>	47
Table 5. 7:	<i>Gross Enrolment Ratio at Secondary Education Level, 2016-2020</i>	47
Table 5. 8:	<i>Net Enrolment Rate at Secondary Education Level, 2016-2020</i>	48
Table 5. 9:	<i>Gender Parity Index at Secondary Education Level, 2019-2020</i>	49
Table 5. 10:	<i>Enrolment Secondary by Class, and Gender Parity Index, 2020</i>	49
Table 5. 11:	<i>Number of Teachers Secondary by Gender and School Category</i>	56
Table 5. 12:	<i>Secondary School Teachers by Qualification and Sex, 2017-2020</i>	57
Table 5. 13:	<i>Student Teacher Ratios at Secondary School Level</i>	57
Table 5. 14:	<i>Classrooms and Learners to Classroom Ratio in Secondary Schools</i>	59
Table 5. 15:	<i>Student-to-Toilet Ratios in Secondary Schools, 2020</i>	60
Table 5. 16:	<i>Student-to-Laboratory Ratios in Secondary Schools, 2020</i>	61
Table 5. 17:	<i>Number of Workshops for Technical Subjects in Secondary Schools, 2020</i>	62
Table 5. 18:	<i>Number of Functional Computers in Secondary Schools</i>	62
Table 6. 1:	<i>Proportion of Grade 1 Learners Achieving Competency Levels in English Language Skills, 2020</i>	64
Table 6. 2:	<i>Proportion of Grade 3 Learners Achieving Competency Levels in English Language Activities, 2020</i>	64
Table 6. 3:	<i>Percentage of Grade 4 Learners Achieving Competency Levels in English Language Skills, 2020</i>	65
Table 6. 4:	<i>Percentage of Grade 4 learners achieving competencies in Mathematics Sub-strands, 2020</i>	65
Table 6. 5:	<i>Class 7 Pupils' Achievement of Minimum Proficiency per Subject, by Sex, 2020</i>	66
Table 6. 6:	<i>Number of KCPE Candidates, by Sex and School Category, 2017 - 2020</i>	66
Table 6. 7:	<i>KCPE SNE Candidates, by Sex and School Category, 2017 - 2020</i>	67
Table 6. 8:	<i>KCPE Candidates Performance by Standard Mark Range, 2017-2020</i>	67
Table 6. 9:	<i>KCPE Examination Mean, by Subject, from 2017 to 2020</i>	68
Table 6. 10:	<i>Number of ACE Candidates in KCPE Examinations, 2018-2020</i>	69
Table 6. 11:	<i>Number of KCSE Candidates, by Sex and School Category, from 2017 to 2020</i>	69
Table 6. 12:	<i>Number of SNE KCSE Candidates, by Sex and School Category, from 2017 to 2020</i>	70
Table 6. 13:	<i>KCSE Performance, by Sex, from 2016 to 2020</i>	71
Table 7. 1:	<i>Number of Tutors in Teacher Training Colleges, 2016-2020</i>	73
Table 7. 2:	<i>Enrolment in P1 Teacher Training Colleges, 2016-2020</i>	74

Table 7. 3:	Enrolment in Diploma Teacher Training Colleges, 2016-2020.....	74
Table 8. 1:	Number of Adult and Continuing Education Centres, 2018-2020.....	75
Table 8. 2:	Enrolment of Adult and Continuing Education Learners, 2018-2020.....	76
Table 9. 1:	Expenditure on Education, by Source, in Million Kenya Shillings, 2018/19 to 2020/21	77
Table 9. 2:	Programme Allocation for the Education Sector.....	78
Table 9. 3:	Expenditure in Basic Education, by programme, in KES Millions, 2018/19 - 2020/21.....	78

LIST OF ACRONYMS AND ABBREVIATIONS

ACE	Adult and Continuing Education
ASAL	Arid and Semi-Arid Lands
BoM	Board of Management
CBC	Competency Based Curriculum
CBE	Curriculum Based Establishment
CBO	Community-Based Organisation
CDE	County Director of Education
COVID-19	Corona Virus Disease 2019
CPPMU	Central Planning and Project Monitoring Unit
DLP	Digital Literacy Programme
EARC	Educational Assessment and Resource Centre
ECDE	Early Childhood Development Education
EGMA	Early Grade Mathematics Assessment
EYE	Early Years Education
FBO	Faith-Based Organisation
FDSE	Free Day Secondary Education
FPE	Free Primary Education
GDP	Gross Domestic Product
GER	Gross Enrolment Rate
GPI	Gender Parity Index
ISCED	International Standard Classification of Education
ICT	Information and Communication Technology
KIB	Kenya Institute for the Blind
KICD	Kenya Institute of Curriculum Development
KISE	Kenya Institute of Special Education
KNBS	Kenya National Bureau of Statistics
KNEC	Kenya National Examinations Council
KPHC	Kenya Population and Housing Census
MoE	Ministry of Education
NASMLA	National System for Monitoring Learning Achievement
NEMIS	National Education Management Information System
NER	Net Enrolment Rate
NESSP	National Education Sector Strategic Plan
NGO	Non-Governmental Organisation
PTR	Pupil Teacher Ratio
PTR	Pupil Textbook Ratio
SAGA	Semi-Autonomous Government Agency
SDGs	Sustainable Development Goals
SNE	Special Needs Education

TMIS	Teacher Management Information System
TSC	Teachers Service Commission
TTC	Teacher Training College
UIS	UNESCO Institute for Statistics
UNESCO	United Nations Education, Scientific and Cultural Organization
UNICEF	United Nations Children's Fund

DEFINITION OF TERMS

Primary - Secondary Transition: New entrants to the first Grade (Form 1) of secondary education in a given year, expressed as a percentage of the number of pupils enrolled in the final Grade (Standard 8) of primary education in the previous year.

Gross Enrolment Ratio (GER): Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.

Net Enrolment Rate (NER): Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding official age population.

Survival Rate by Grade (SR): Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach successive grades.

Pupil-Teacher Ratio (PTR): Average number of pupils (students) per teacher at a specific level of education in a given school year.

Percentage of Private Enrolment: Enrollment in private educational institutions at a given level of education expressed as a percentage of total enrolment at the same level.

Gender Parity Index (GPI): Ratio of female to male values of a given indicator. A GPI between 0.97 and 1.03 indicates parity between the genders. A GPI below 0.97 indicates a disparity in favour of males. A GPI above 1.03 indicates a disparity in favour of females.

Pupil-Class Ratio: Average number of pupils per classroom.

Student-Class Ratio: Average number of students per classroom.

FOREWORD

The Ministry of Education (MoE) is cognizant of the critical role played by accurate, credible and real time data in planning, policy formulation, resource allocation and strategic decision making for overall management of the education sector in Kenya. The establishment and operationalisation of the National Education Management Information System (NEMIS) has enabled the collection of real time data, storage, and ease of retrieval. The data, on various key indicators, is credible, reliable and accurate. This is crucial to MoE and education stakeholders in management and financing of education in Kenya.

The Basic Education Statistical Booklet 2020 provides data for the school year, which began in January 2020 and was concluded in July 2021 due to closure of schools as a result of COVID-19 pandemic. The booklet is the official reference for data and statistics in the basic education sub-sector for the period under review. More importantly, this booklet provides key baseline data and information to guide in policy direction as the government continues with the implementation of the Competency Based Curriculum (CBC).

The statistical booklet will act as an authoritative reference for all education stakeholders and acts as a tool to assess the progress made in policy implementation towards achieving the objectives of the education sector in ensuring increased access, equity and quality in provision of education in all areas in the country.

Finally, I wish to appeal to all stakeholders to fully utilise the information provided in guiding their participation in promoting inclusive and equitable quality education in Kenya.

EZEKIEL Ombaki MACHOGU, CBS
CABINET SECRETARY,
MINISTRY OF EDUCATION

PREFACE

The Basic Education Statistical Booklet, 2020 highlights the status of basic education by providing data and information on all the basic education levels for the 2020 school year. It presents trend analysis of the data and information covering a number of critical indicators such as number of institutions, enrolments, financing, internal efficiency, student teacher ratio and examination performance. In addition, it outlines the status of other indicators such as schooling profile, school infrastructure, among others.

This booklet is primarily based on NEMIS data that is captured at the basic education institutions namely, primary and secondary schools. The management of the Early Childhood Development and Education (ECDE) is devolved to the county governments and, therefore, data on the pre-primary education was provided by the county governments through County Directors of Education (CDEs). The information on teachers in public schools, both at primary and secondary levels, was provided by the Teachers Service Commission (TSC) as captured in the Teacher Management Information System (TMIS) and other Commission records. The Kenya National Examinations Council provided data on examination and assessment. Complementary data was also provided by heads of institutions through an online survey.

The booklet has been prepared at a critical time of transition of the country's education system from 8-4-4 to 2-6-6-3. Kenya has adopted the Competency Based Curriculum (CBC) for all levels of basic education. CBC has already been rolled out in the Early Years Education (EYE), which consists of Pre-Primary 1 and 2, and Grades 1, 2 and 3, and in Grades 4 and 5 of primary education. The booklet offers vital information for the planning and implementation of CBC.

The booklet, therefore, contains useful information that may be used by planners, policy makers, educators, parents, learners, researchers and development partners, among others.

DR. BELIO R. KIPSANG CBS
PRINCIPAL SECRETARY,
STATE DEPARTMENT FOR BASIC EDUCATION

ACKNOWLEDGEMENT

The development and production of the *Basic Education Statistical Booklet, 2020* demonstrates the commitment by the Ministry of Education in providing credible, accurate, reliable and relevant data to enable effective management of the education sector.

Special thanks and appreciation go to the Cabinet Secretary, who provided overwhelming support, guidance, oversight and policy direction on reforming data management systems in the Ministry of Education. His dedication to the use of data to support decision making has motivated the compilation of this booklet. I also appreciate the Principal Secretary for his guidance and support to the technical team throughout the process.

We are also grateful to the Global Partnership for Education, World Bank, and the United Nations Children's Fund (UNICEF) for their contribution in the development of this booklet. I also like to thank the Kenya National Bureau of Statistics (KNBS) for providing technical support in the analysis and interpretation of the data and also providing guidance in the overall production of the booklet. County governments are also appreciated for providing relevant data.

Finally, I wish to thank the technical team, drawn from various Directorates in the State Department for Basic Education (EL&BE) in the Ministry of Education, MoE SAGAs, and TSC, under the leadership of the Director, Planning, EL&BE, for dedicating their time and energy to the development of this booklet.

ELYAS J. ABDI PhD OGW
DIRECTOR GENERAL,
STATE DEPARTMENT FOR BASIC EDUCATION

EXECUTIVE SUMMARY

The *Basic Education Statistical Booklet, 2020* has been developed at a momentous time when the country is transforming its education and training system from 8-4-4 to 2-6-6-3. The country has adopted the Competency Based curriculum (CBC) for all levels of basic education. The new education structure comprises Pre-primary (2 years), Primary (6 years), Secondary (6 years) and University education (3 years).

This booklet is primarily based on NEMIS data that is captured at the basic education institutions namely, primary and secondary schools. Nevertheless, data from other sources was also used. The Early Childhood Development and Education (ECDE) management having been devolved to the county governments, data on the pre-primary level was provided by county governments through the County Directors of Education (CDEs). The data on teachers in public schools, both at primary and secondary levels, was provided by TSC, as captured in the Teacher Management Information System (TMIS) and other Commission records. Data on examinations and national assessments was provided by the Kenya National Examinations Council (KNEC) while the Ministry of Energy provided data on electrification of schools.

The booklet is organised into nine chapters. Chapter one gives the background and context. It presents the national education policy framework and structure, international commitment to education and Kenya's demographic and macro-economic context. Chapter two presents the methodology used. Chapter three is on the status of pre-primary education, while chapters four and five are on the status of primary and secondary education respectively. These three chapters provide details on the number of schools and school sizes; enrolments and enrolment rates; schooling profile; internal efficiency measures; teachers and pupil teacher ratios and classrooms, class sizes and sanitation facilities. Chapter six is on national assessment and examinations at the basic education level. Chapter seven provides information on Teacher Education and chapter eight presents data on Adult and Continuing Education while chapter nine gives information on financing of basic education. Chapter ten presents the summary of findings, recommendations and policy implications. Finally, the annexes provide the comprehensive primary data by county used in developing the booklet.

From the analysis of the data presented, there has been a steady growth in the number of basic education learning institutions. The number of pre-primary schools increased from 41,779 in 2017 to 46,652 as of 2020. At the primary education level, the number of schools decreased to 31,464 as at 2020 from 32,344 in 2019. Similarly, the number of secondary schools decreased from 10487 in 2019 to 10,390 in 2020. Overall, public institutions still account for the largest share of basic education learning institutions, with 61.1%, 74.3% and 87.6% for pre-primary, primary and secondary education levels, respectively, as of 2020.

On enrolment, there were 2.83 million learners in pre-primary institutions as of 2020 as compared to 2.74 million in 2019. At primary school level, there were 10.08 million pupils as of 2020, compared to 10.07 million in 2019. At the secondary education level, there was a steady increase in enrolment, from 3.263 million students in 2019 to 3.569 million in 2020. Public schools account for the largest share of enrolment in basic education, with 77.5% at pre-primary level, 85.6% at primary level and 95.3% at secondary school level. This is attributed to key government programmes such as the mainstreaming of ECDE by county governments; Free Primary Education; Free Day Secondary Education; and the 100% transition policy. Nevertheless, public learning institutions still have the largest school sizes, with 367 pupils in public primary schools in comparison to 178 in private schools; and 374 students in public secondary schools as compared to 130 in private schools. The average school sizes vary across countries at all levels of basic education.

GER for pre-primary education was at 111.2% in 2020. It should be noted that consistency in the pre-primary level data is affected by the reporting of ages 4 to 5 and inadequate systems of data capturing by the county governments. There was a decline in the Gross Enrolment Ratios (GER) at the primary education level, from 99.6% in 2019 to 97.3% in 2020. At the secondary school level, GER improved from 71.2% in 2017 to 76.5% in 2020. The Net Enrolment Rates (NER) were estimated based on age-specific enrolment collected from learning institutions. At the Primary level, the NER was 79.3%. At the secondary education level, the estimated NER was 54.1% as at 2020. There was a 103.3% retention rate and the transition rate from primary to secondary education levels was 87.1% as of 2020. The high completion and transition rates were attributed to the government's re-entry and 100 percent transition policies. Completion rate at primary education level was 82%, while retention rate from Class 1 to Class 6 in primary schools stood at 96.1%.

Equity and Inclusivity: Special Needs Education (SNE) experienced a steady increase in the number of learning institutions with SNE Learners, as well as the learners' enrolment. At the pre-primary level, there were 4,164 public and 533 private pre-primary schools with enrolled SNE learners in 2020. At primary level, the number of schools with SNE learners increased from 2,865 in 2017 to 3,430 in 2019 and further to 7,345 in 2020. Secondary schools also increased in number from 106 in 2017 to 114 in 2019 and further to 4,355 in 2020. The SNE enrolment in pre-primary schools in 2020 was 26,542, comprising 24,988 in public and 1,554 in private pre-primary schools. At primary level of education, SNE enrolment in public schools increased from 108,221 in 2017 to 136,081 in 2019 and further to 183,697 in 2020. In addition, there were 4,776 enrolled in private schools as of 2020. At Secondary level of education, enrolment increased from 4,019 in 2017 to 4,794 SNE learners under capitation in 2019 SNE learners under capitation. The enrolment of learners in 2020 was 17,059, including students who are not under capitation. In 2020, the SNE enrollment in public secondary schools was 10,796 while private secondary schools had 292 students with special needs. It is important to note that there were SNE data gaps across all levels, and more so, data disaggregated by disability categories. The public sector remains the largest provider of education to learners with special needs.

Kenya achieved significant progress in gender parity, completion and retention rates, and access rates from 2018 to 2020. Gender parity was achieved at the pre-primary and primary education levels. However, gender disparities still exist at the secondary education level and in some classes of primary education. Some counties are yet to achieve optimal gender parity indices at various levels of basic education.

On quality indicators, the number of candidates for the Kenya Certificate of Primary Education (KCPE) increased from 1,003,446 in 2017 to 1,060,710 and 1,088,989 in 2018 and 2019 respectively and to 1,194,608 in 2020. The candidates in public primary schools accounted for 83% of KCPE candidates. Special Needs Education candidates registering for KCPE increased from 2,394 in 2019 to 2,695 in 2020. The average KCPE performance across the subjects remained slightly above 48% for the period under review. In 2020, 50 % of the candidates scored between 200 and 300 marks, while 24.6 % scored above 300 marks. The number of candidates for the Kenya Certificate of Secondary Education (KCSE) increased from 699,706 in 2019 to 752,602 in 2020. Candidates enrolled in public institutions accounted for 90% of the 2020 KCSE candidates. There was a marginal increase in the number of SNE candidates in KCSE, from 1,660 in 2019 to 1,883 in 2020. On KCSE performance, there was a steep rise in the number of candidates scoring at least Grade C+, from 125,835 in 2019 to 143,122 in 2020.

Teachers remain a critical resource in the achievement of inclusive and equitable quality education. All the teachers in public and private learning institutions met the minimum qualifications to teach, with 8.4% of teachers in public primary schools holding at least a bachelor's degree, 11% holding diploma qualification and over 70% holding certificate-level qualifications. In Secondary schools, nearly 95% hold a bachelor's degree and about 2% have a postgraduate qualification.

During the period under review, there were 66,424 teachers in pre-primary schools, out of which 64% were in public pre-primary schools while the rest were under private employment. There were 307,548 teachers in primary schools as of 2020, with 68.9% employed by the Teachers Service Commission to serve in public primary schools. Secondary education had a total of 175,862 teachers, with the public schools accounting for 65.6% of the teachers. It is worth noting that the number of teachers contracted by the Boards of Management were 33,783 and 48,626 in primary and secondary public schools respectively.

Kenya has achieved the recommended Pupil-to-Teacher Ratio (PTR) in primary and secondary education levels as of 2020. In primary education level, the PTR was 41 for public schools and 24 for private schools. At the secondary level, public schools had a PTR of 29 as compared to 14 in private schools. Despite these optimum pupil-to-teacher ratios, teacher shortages still exist due to national staffing norms of assigning a teacher per classroom in primary schools and Curriculum-based Establishment (CBE) for staffing in secondary schools. Moreover, there are disparities in the distribution of teachers across the counties.

In relation to school infrastructure: classrooms, there were 45,270, 257,560 and 87,934 permanent classrooms in pre-primary, primary and secondary schools respectively. On average, the permanent and temporary classrooms contributed to learner-to-classroom ratios of 37 and 20 in public and private primary schools, and 40 and 20 in public and private secondary schools respectively. Toilet ratios, laboratories

In relation to ICT infrastructure and related amenities, 82 % and 14 % of public primary schools were connected to electricity through the national grid and solar energy respectively under the Digital Literacy Programme (DLP). Similarly, 94 % of public primary schools had a complete DLP package of content servers, and teacher and learner devices installed.

The remarkable progress made in the education sector has been due to the continued financing of the key programmes. During the period under review, the education sector accounted for 14.4 % of the total expenditure by the national government. On average, the national government contributed 53 % followed by households (parents) at 31 %. The county governments' share of contribution stood at six % of the total expenditure in the education sector.

The sector accounted for 16.9 % of the recurrent expenditure by the national government in the 2020/221 financial year. In terms of budgetary allocation, teacher resource management accounted for nearly 54.6 % while university education and research received 18.6 % of the budgetary allocation during the 2020/21 financial year. Secondary and primary education accounted for 14 % and 4.2 %, respectively. In basic education, secondary education accounted for about 71 % of the recurrent allocation by the national government, while the share of allocation for primary education was 21 %, with quality assurance accounting for less than 3.6 % of the allocation. Capitation grants through Free Primary Education (FPE) and Free-Day Secondary Education (FDSE) accounted for 76 % and 97 % of the allocation for primary and secondary education, respectively, during the 2020/2021 fiscal period

Development expenditure in the sector was at 2.7 % of the total national expenditure. In Basic Education, excluding pre-primary level, secondary education accounted for 59.6 % of the allocation in 2020/2021 financial year, while primary education accounted for about 38.7 % of the allocation by the national government. Infrastructure development in schools accounted for 4.2 % and 7.1 % of the allocations in primary and secondary education, respectively.

From the foregoing analysis and conclusions, the following recommendations are made. There is a need to build and mainstream a culture of data-driven decision making, planning, budgeting and monitoring through a Data Management Policy. A policy framework for management of education statistics should be developed to streamline and make NEMIS a single source of truth for data in the education sector. Given the constitutional responsibilities in the education sector, and the reported

data gaps, there is a need for a collaborative framework on data management between the national and county governments. In order to have a comprehensive analysis of data in the education sector and meet all the international requirements, in addition to the requirements of the CBC, there is need to expand the scope of reporting to include data on quality assurance services, school audit services, and status of infrastructure, among others. The *AU EMIS Norms and Standards Framework* and the *Kenya Statistical Quality Assurance Framework* should also be adopted to assess the extent of the country's progress towards having the quality of education statistics. There is also a need for an advocacy programme to promote a positive attitude change in relation to utilisation of data for decision making at various levels. Furthermore, to enhance better planning and align resource requirements to learning outcomes in basic education and match supply and demand in the provision of inclusive and equitable quality education, a comprehensive school mapping is necessary. Finally, in order to enhance the quality and credibility of data generated at institutional level, there is a need for a bi-annual validation of data in the National Education Management Information System.

1. BACKGROUND AND CONTEXT

1.1. Introduction

This Chapter presents the national education policy framework and structure; commitments to international conventions and agreements; Kenya's demographic and macroeconomic context; and emerging trends in data management.

1.2. National Education Policy Framework and Structure

Education, training and research is a major platform for national socio-economic transformation. To this end, the Government of Kenya (GoK) is committed to providing quality and inclusive education and training, as well as a robust platform for research, to all Kenyans. This is evidenced by the provisions of the Constitution of Kenya. Specifically, Articles 43(1)(f) and 53(1) (b) of the Constitution provide for the right to education and the right to free and compulsory basic education, respectively.

The Vision 2030, Kenya's development blueprint, aims at transforming the country into a newly industrialising, middle-income country that provides a high quality of life to all its citizens by 2030. The blueprint is implemented through five-year Medium-Term Plans (MTPs). The country is currently on MTP III, which supports the implementation of the GoK's Big Four Agenda covering housing, universal health care, manufacturing and food security. Education is an enabler in the achievement of GOK Big Four Agenda, and to this end, the GoK has enacted several legislations in the education sector. These includes: the Basic Education Act, 2013; the Teachers Service Commission Act, 2012; the Kenya National Examinations Council Act, 2012; the Kenya Institute of Curriculum Development Act, 2013, amended 2019; Children's Act, 2001, amended 2020 among others.

These Acts enable the realisation of the policy provisions contained in the Sessional Paper No. 1 of 2019, *Policy Framework for Reforming Education and Training for Sustainable Development and the Basic Education Curriculum Framework*. The envisaged policy priorities are operationalized in the National Education Sector Strategic Plan (NESSP) 2018-2022, which spells out strategies and programmes for the education sector.

In Kenya, education and training is a shared function between the two levels of government: National and County Governments. The National Government is mandated to develop education policies, curricula and maintain standards. It also deals with examinations and grants charters to universities. The County Government, on the other hand, is mandated to oversee Pre-Primary Education (PPE), vocational training centres, home craft centres and child-care facilities.

The Ministry of Education (MoE) is headed by a Cabinet Secretary, assisted by five Principal Secretaries, each heading a State Department. The Ministry has five state departments, namely; the State Department for Early Learning and Basic Education, that is responsible for pre-primary, primary, secondary and teacher education; the State Department for Vocational Education and Technical Training, responsible for promoting technical and vocational education and training; the State Department for University Education and Research, responsible for university education, research, science and technology; the State Department for Post Training and Skills Development, responsible for facilitating linkages among the government, academia and industry for the development of relevant industrial skills; and the State Department for Implementation of Curriculum Reforms. Under the state departments, there are Semi-Autonomous Government Agencies (SAGAs), which are charged with various responsibilities. In the sector, there is also the Teachers Service Commission (TSC), an independent constitutional commission that regulates and manages the teaching service in Kenya.

In the quest to achieve numeracy, literacy, life skills and industry relevant skills, various policy reforms have been rolled out. One key reform is the implementation of the Competency Based Curriculum (CBC), which seeks to nurture every learner's potential by ensuring all learners acquire the core competencies as provided in the Basic Education Curriculum Framework (BECF). CBC emphasizes formative rather than summative evaluations. The pioneer CBC cohort is currently in Grade 5 and is expected to transit to junior secondary in 2023. The implementation of the new curriculum will eventually see the 8-4-4 system be replaced by the 2-6-6-3 system, which consists of 2 years of pre-primary (for ages 4-5); 3 years of lower primary and 3 years of upper primary (for ages 6-11); 3 years of junior secondary and 3 years of senior secondary (for ages 12-17 years); as well as 3 years of university education.

1.3. Commitments to International Conventions and Agreements

Kenya is a signatory to several international and regional conventions, agreements and commitments to the development of education. These include the Sustainable Development Goals (SDGs), Africa Union Agenda 2063 and Continental Education Strategy for Africa (CESA) 2016-2025, among others.

Specifically, SDG 4 pledges to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all while CESA emphasizes life skills and value-based education as an important component of quality education.

These conventions and agreements underscore the need to eliminate all forms of discrimination and barriers, to afford all citizens the right to education. To illustrate Kenya's commitment to the conventions and agreements signed, the country adopted the Free Primary Education Policy (2003) and Free Day Secondary Education Policy (2008).

1.4. Developments in Data Management

Key developments that demand the refocusing of data management practices in the education sector in Kenya include:

Technological Advances in Data Management: Data collection, analysis, reporting and sharing techniques have changed over time due to changes in Technology. Most of these processes are undertaken online, which require a well-planned system with controls and verification capabilities. There is also increased need for spot checks to ensure that what is posted online reflects the actual situation at institutional level. Without central planning for data movement and data integration in organisations, and without data integration strategies, organisations will be faced with an overwhelming and unmanageable number of interfaces. It is critically important for every organisation to implement some central planning for data integration using data hubs and appropriate data models in order to be able to reasonably manage the new portfolio of data interfaces.

Demands for Evidence-Based Decision-Making: Administrative and management processes require that any decision is backed by data to improve credibility and acceptance by stakeholders. This has increased the demand for consistent, accurate and reliable data. Evidence-based decision-making requires that decision makers have access to evidence and are empowered to act on that evidence. This, in turn, requires alignment between those who collect, analyse and interpret data, and those who make and implement decisions. Investments in individuals, organisational and systems capacity to use evidence are needed to foster practises of evidence-based decision-making.

Curriculum reforms: The country is transitioning to a competency-based curriculum aimed at fully replacing the 8-4-4 system by 2028. Roll out has already been achieved in Pre-primary 1, Pre-primary 2, Grades 1, 2, 3, 4 and 5. The Competency Based Curriculum (CBC) seeks to nurture every learner's potential by ensuring all learners acquire the seven core competencies; communication and collaboration, critical thinking and problem solving, imagination and creativity, citizenship, learning to learn, self-efficacy and digital literacy. Monitoring learners' progress in the acquisition and

development of the competencies requires a shift towards more emphasis on formative evaluation. Data on learning outcomes and tracking individual learner's progress will be necessary at institutional, regional and national levels to inform decision making and policy interventions.

The education reforms also envisage learning and career pathways for students in senior secondary education level. Disaggregated data on learning institutions' capacity and the sector's readiness will be urgently required to prepare for a seamless transition to the senior secondary education pathways by 2026. Such data will include the number and distribution of institutions; infrastructure, amenities and facilities; digital equipment; learning materials; human resource; and financing and quality assurance, besides the learning progress, enrolment and school attendance data.

Education Data in the COVID-19 Crisis and other Emergencies: COVID-19 disrupted normal operations in the society and generated a lot of anxiety and uncertainty. The education sector was affected as resources for education programmes were re-prioritised in order to mitigate the adverse effects of the pandemic on the society. The post-COVID-19 recovery strategies have brought forth new data requirements, and redefined key education indicators on class-size; water, sanitation, healthcare and hygiene (WASH) facilities; and safety in learning institutions, as well as optimal learner-to-teacher ratios, among others. The pandemic also redefined the mode of working and learning, leading to a shift towards virtual teaching and learning, as well as community-based learning.

In the post-COVID-19 period, credible and timely data will be required on the status of learning enablers, including infrastructure such as electricity and broadband connectivity across the country; and appropriate technologies for learners with disabilities and special needs, in order to enhance more inclusive and equitable quality education. This will be useful in decision making and planning by national and county governments, development partners, and other stakeholders. Furthermore, the data will inform targeted interventions in provision of education to vulnerable groups.

In addition to the aforementioned issues that demand the refocusing of data management practises in the education sector in Kenya, the country has international and national commitments to measure the progress of internationally agreed and country-specific education indicators, through the Ministry of Education. The main international commitment made is on the provision of annual education statistics on indicators, to measure the progress of Sustainable Development Goals (SDGs), especially SDG 4 on inclusive and equitable quality education. UNESCO Institute of Statistics (UIS) receives, collates and reports on the education indicators to the United Nations General Assembly. At the local level, the Kenya National Bureau of Statistics (KNBS) is the national focal point for all data generated by the sectors of the Kenyan economy. The Bureau produces the Annual Economic Survey, whereas the Ministry of Education provides data on education indicators.

The production of the statistical booklet is undertaken within Kenya's legal framework and is guided by the existing laws such as: Kenya's Data Protection Act, 2019; Access to Information Act, 2016; Statistical Act (Revised 2019); Basic Education Act, 2013 and Sessional Paper No 1 of 2019, among others.

1.5. Kenya's Geographical Location, Demographic and Macroeconomic Context

1.5.1 Geographical Location

Kenya is located in the East African sub-region of Africa with coverage of 582,646 Square Kilometres, with 97.8% comprising land and 2.2% water surfaces. It neighbours Tanzania to the South and Southwest, Uganda to the West, South Sudan to the north-west, Ethiopia to the north and Somalia the north-east. English is an official language, whereas Kiswahili is both a national and official language.

1.5.2 Kenya's Demographic Context

Table 1. 1 shows the population projection for various age-groups. The population projection from the 2019 census shows that the population grew by 1.8 percent on average. The official school age in

Kenya is classified as follows: 4-5 years for pre-primary, 6-13 years for primary and 14-17 years for secondary. The table shows that 36 percent of Kenyans are aged 4-17 years and are of pre-primary, primary and secondary school going age, collectively regarded as basic education. The largest share constitutes primary-school-going children who make up 21 percent of the population, followed by nearly 10 percent secondary- school-going children, and over 5 percent who comprise pre-primary-school-going children. Nearly 10 percent of Kenyans are of tertiary education age.

The school-going age population in basic education increased from 17.2 million in 2019 to 17.5 million in 2020. By education level, children within the official pre-primary age accounted for 14.6 percent of the children of the official school going age in basic education. Children in the official primary school age population accounted for 58.8 percent while secondary school going age represented 26.7 of the age-appropriate population for basic education.

Table 1. 1: Total Population and School-Age Population, 2020

Age Group	Population (2019)	Population (2020)	Percentage of Total Population [±]	School Level
< 1	1,105,036	1263167		Infants
1-2	2,379,486	2,519,890		Before school
3-5	3,745,207	3,813,027		ECDE
4-5	2,503,277	2,473,285	5.3	Pre-Primary
6-13	10,109,470	10,292,746	21.3	Primary
14-17	4,583,396	4,666,499	9.6	Secondary
18-22	4,627,480	4,711,434	9.7	Tertiary
23+	21,012,015	22,285,507		Post-school
Total	47,563,609[*]	48.7 million

± - excludes pre-school and post-school going population

1.5.3 Kenya's Macroeconomic Context

Kenya's economy was not able to realize its full potential in 2020, as a result of COVID-19, which significantly slowed down economic activity.

Table 1. 2 presents details on GDP at market prices for the period 2016–2020. Real GDP in absolute terms grew from 10.3 trillion in 2019 to 10.8 trillion Kenya Shillings in 2020. This represents a 0.3% reduction compared to a growth of 5.0% in 2019. The decline in real GDP is mainly attributed to reduction in taxes on products due to COVID-19 mitigation measures, which adversely affected overall economic performance.

Table 1. 2: Trends in GDP at Market Prices (in millions), 2016 – 2020

	2016	2017	2018	2019	2020
All economic activities	6,926,656	7,754,323	8,531,502	9,389,865	9,892,187
Taxes on products	667,408	729,074	808,805	865,790	860,805
GDP at market prices	7,594,064	8,483,396.50	9,340,306.70	10,255,654.40	10,752,991.50

Source: Economic Survey, 2021

Figure 1. 1 presents the education sector GDP growth rate between 2016 to 2020. The sector contracted by 10.8% in 2020 as compared to a 4.7 % growth in 2019. Primary education and secondary education both recorded reductions of 9.3 % and 16.5 % respectively. Higher and other education declined by 7.3 % and while taxes in relation to the sector also went down by 7.9 %.

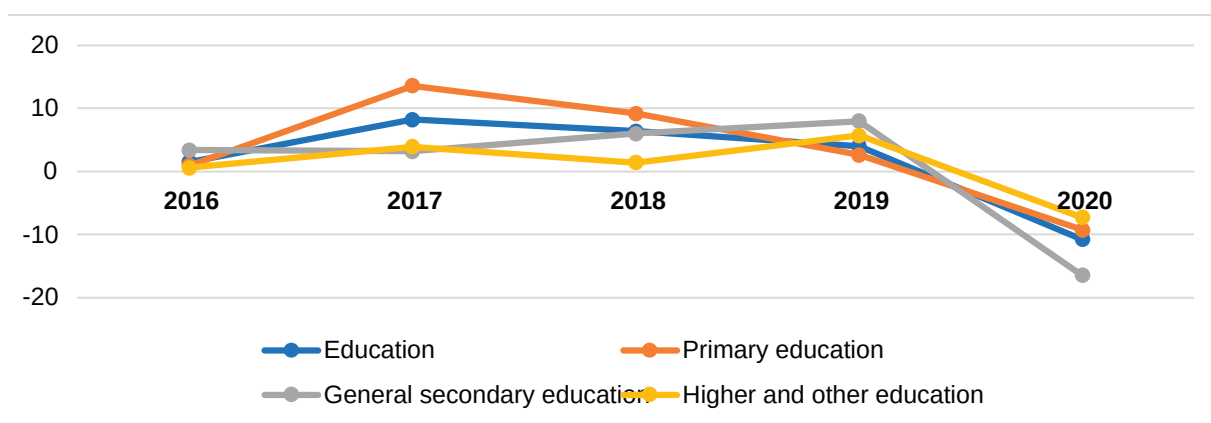

Figure 1. 1: Annual Percentage GDP Growth Rate for Education Sector, 2016-2020

Table 1. 3 provide details on the education sector's contribution to GDP at current prices between 2016 to 2020. During the review period, education sector contributions to the GDP at current prices recorded a decline of 5.5 % from KES 430.7 billion in 2019 to KES 406.9 billion in 2020. This could be attributed to closure of schools as one of the COVID-19 containment measures, which affected the performance of mostly secondary education, pre-primary and primary education. However, higher and other education were not adversely affected as other levels due to the adoption of virtual learning.

Table 1. 3: Education Sector Contribution to GDP at Current Prices (Millions KES)

Sub-Sector	2016	2017	2018	2019	2020
Pre-primary & Primary Education	155,976	184,303	208,393	214,121	206,750
General Secondary Education	93,654	98,828	109,878	119,397	107,897
Higher and Other Education	88,380	82,346	81,245	97,180	92,264
Education Sector	338,011	365,477	399,515	430,699	406,911

Source: Economic Survey 2021

Figure 1. 2 presents the share of the education sector's contribution to GDP. Education contributed 3.8% of GDP in 2020, which was lower than the previous years' contributions of 4.3% in 2018 and 4.2% in 2019 respectively. Pre-primary and Primary education combined, contributed the highest proportion of 1.9 % to GDP, Higher and other education contributed less than one % at 0.9%.

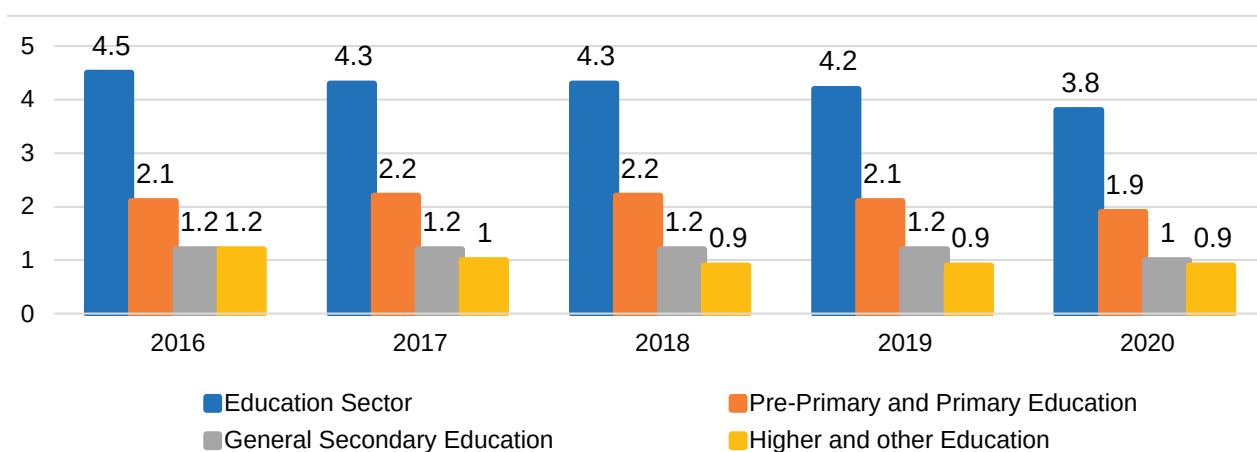

Figure 1. 2: Percentage contribution of education sector to the GDP, 2016-2020

2. METHODOLOGY

2.1. Introduction

This chapter presents the scope, sources of data and collection methods, data processing and report writing, and challenges on data collection.

2.2. Scope of the Statistical Booklet

The *Basic Education Statistical Booklet 2020*, was prepared based on primary and secondary data. The data covers all the levels of basic education (pre-primary, primary, secondary, teacher education and adult and continuing education). It also includes information on the number of learning institutions, enrolment, number of teachers and basic infrastructure in both public and private basic education institutions.

2.3. Sources of Data and Data Collection

The National Education Management Information System (NEMIS) was the main source of primary data used in the booklet. County Directors of Education (CDEs) and Heads of Institutions provided supplementary data through an online questionnaire. Additional data was sourced from different directorates within the Ministry of Education (MoE), namely: Central Planning and Project Monitoring Unit (CPPMU); Directorate of Primary Education; Directorate of Secondary Education; Directorate of Teacher Education; and Directorate of Special Needs Education. Data on pre-primary and private institutions was sourced from the County Governments, through the County Directors of Education (CDEs).

Semi-Autonomous Government Agencies (SAGAs) within the Ministry, namely, the Kenya National Examinations Council (KNEC) and the Kenya Institute of Curriculum Development (KICD) also provided relevant data. Data was also sourced from the Teachers Service Commission (TSC); Council of Governors (CoG); Constituency Development Fund (CDF); the Ministry of Energy; the Ministry of ICT, Innovation and Youth Affairs; and the Kenya National Bureau of Statistics (KNBS).

Secondary data was obtained from the Economic Survey Reports, Medium Term Expenditure Framework sector reports, population projections and publications from other government ministries. In instances where data was missing or inconclusive, extrapolation and interpolation were carried out to obtain estimates.

2.4. Data Processing and Report Writing

A technical team, composed of officers from MoE and other key state agencies, was constituted to develop this booklet. The team held consultative meetings (virtual and face-to-face), and workshops, to clean, collate and analyse the data. Different data sets were compared to establish trends and outliers to ensure reliability, consistency and accuracy.

2.5. Data Quality

Production of this Statistical Booklet complies to a large extent, with data quality dimensions. The indicators discussed herein, meet the needs of the education sector, national statistical obligations, and international requirements, therefore satisfying the dimension of relevance. The data used in the Booklet is largely accurate, although there were gaps in coverage of pre-primary education and private learning institutions. In addition, there was a 90-percent coverage of age-specific enrolment in primary and secondary education, but the response rate at pre-primary on age-specific enrolment was below 65 percent.

Data in the Booklet is also reliable, through maintaining of a five-year series of data, where possible for the key indicators. The data also meets the expectations of the coherence dimension, through comparing multiple data sets, and the national population. The Booklet has also been produced through a consultative process, with a Technical Working Group drawn from various stakeholders to achieve a methodologically sound process and maintain integrity of the reported statistics.

3. STATUS OF PRE-PRIMARY EDUCATION

3.1. Introduction

This chapter provides key highlights of selected performance indicators at the pre-primary education sub-sector. For most indicators, the data is provided for the period 2017-2020. In line with the National Education Sector Strategic Plan, 2018-2022, the indicators are categorised in three thematic areas: access, equity and, quality and relevance. Data on financing of pre-primary education was not obtained for analysis and presentation in this booklet.

3.2. Access, Equity and Inclusion in Pre-Primary Education

3.2.1 Number of Pre-Primary Schools

Table 3. 1 shows the number of pre-primary schools, between 2017 and 2020. In 2020, the total number of pre-primary institutions increased from 46,530 in 2019 to 46,652. This represents a growth of 0.3 percent in the number of schools. For public pre-primary schools, the number increased from 28,383, in 2019 to 28,505 in 2020, representing a growth of 0.4 percent. Some of the factors that contributed to the slight increase in the number of schools were effects of the COVID-19 pandemic and the requirement for every primary school to have a pre-primary learning centre to facilitate seamless integration of CBC within the Early Years Education (EYE).

Table 3. 1: Number of Pre-Primary Schools, 2017-2020

	2017	2018	2019	2020
Public	25,381	25,589	28,383	28,505
Private	16,398	16,728	18,147	18,147
Total	41,779	42,317	46,530	46,652

Source: Council of Governors

3.2.2 Enrolment in Public and Private Pre-Primary Schools

3.2.2.1 Enrolment in Pre-Primary Schools by Category

Table 3. 2 shows enrolments in public and private schools for pre-primary level of education. As of 2020, there were 2,832,897 children enrolled in pre-primary schools. The private sector is an important partner in the provision of basic education in Kenya. For instance, in the year 2020, 22.5 percent of the learners enrolled in the pre-primary private schools. This was a decline compared to 2019 when 30 percent of learners were in private pre-primary schools. The decline in the share of private pre-primary enrolment could be attributed to effects of COVID-19 pandemic on households, increased incentives and investments in public institutions by the county governments.

Table 3. 2: Enrolment in Public and Private Pre-Primary Schools 2017-2020

Category	Sex	2017*	2018*	2019	2020*
Public	Boys			983,932	1,117,571
	Girls			932,758	1,077,830
	Total			1,916,690	2,195,401
Private	Boys			409,787	319,353
	Girls			412,110	318,143
	Total			821,897	637,496
Total	Boys	1,681,530	1,730,237	1,393,719	1,436,924
	Girls	1,612,283	1,660,308	1,344,868	1,395,973
	Total	3,293,813	3,390,545	2,738,587	2,832,897

*Data for 2017 and 2018 include Age 3.

*Based on estimates

3.2.2.2 Enrolment in Pre-Primary Schools by Class and Category

Table 3. 3 shows the enrolment in pre-primary institutions by class and sex for 2019 and 2020. There was an increase in enrolment at PP1 from 1,365,296 learners in 2019 to 1,483,621 learners in 2020, representing a growth of 8.7 percent. On the contrary, the number of learners enrolled in PP2 decreased to 1,349,277 in 2020 as compared to 1,373,291 in 2019. In comparing the successive years, 98 percent of the cohort of learners who were in PP1 in 2019 progressed to PP2 in 2020. There were more learners enrolled in PP2 in public pre-primary schools as compared to the same cohort's enrolment in PP1 in 2019. In contrast, 28 percent of the cohort that was enrolled in PP1 in private schools did not progress to PP2 in private schools, partly accounting for the gains in PP2 enrolment in public pre-primary schools.

Table 3. 3: Enrolment in Pre-Primary Schools by Class, Sex and Category, 2019-2020

Class	Category	Sex	2019	2020
Pre-primary 1	Public	Boys	486,641	584,320
		Girls	461,721	562,083
		Total	948,362	1,146,403
	Private	Boys	208,727	168,951
		Girls	208,207	168,267
		Total	416,934	337,218
	Total		1,365,296	1,483,621
Pre-primary 2	Public	Boys	497,291	533,252
		Girls	471,037	515,747
		Total	968,328	1,048,999
	Private	Boys	201,060	150,401
		Girls	203,903	149,876
		Total	404,963	300,278
	Total		1,373,291	1,349,276

3.2.3 Average School Size in Pre-primary Education

School size shows the average number of learners per school. It is an important indicator in determining if learning institutions operate optimally and may be used in assessing fixed and variable resource requirements. Table 3. 4 shows the average school size in both public and private pre-primary schools. The overall average school size in pre-primary education level was 59 learners in 2019, which increased to 75 in 2020, representing a decrease of 33 percent. For public schools, the size increased from 68, in 2019, to 75, in 2020, which was a 10.8 percent increase. In private schools, there was a decrease of 21.9 percent, with the class size moving from 45, in 2019, to 35, in 2020. This implies that the

public pre-primary institutions are enrolling more learners, although the number of institutions may not be growing at a corresponding rate.

Table 3. 4: Average School Size at Pre-primary Education Level

Category		2017	2018	2019	2020
Public	Enrolment			1,916,690	2,195,401
	No. of Institutions	25,381	25,589	28,383	28,505
	Avg. School Size			68	77
Private	Enrolment			821,897	637,496
	No. of Institutions	16,398	16,728	18,147	18,147
	Avg. School Size			45	35
Total	Enrolment	3293813	3390545	2,738,587	2,832,897
	No. of Institutions	41,779	42,317	46,530	47,295
	Avg. School Size	79	80	59	60

Source: Economic Survey Reports and Council of Governors

2017 and 2018 enrolment included learners aged 3 years enrolled in baby class

3.2.4 Learners with Special Needs in Pre-Primary Education

Table 3. 5 presents the enrolment of SNE learners in pre-primary institutions. The total SNE enrolment was 26,542 with public schools having 24,988 learners, representing 94.2 % of learners with special needs enrolled in pre-primary education institutions. Overall, there were more boys than girls with special needs enrolled at pre-primary education level.

Table 3. 5: Enrolment of Learners with Special Needs in Pre-Primary Schools, 2020

Category	PP1			PP2			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Public	7,193	5,910	13,103	6,431	5,454	11,885	13,624	11,364	24,988
Private	507	378	885	387	282	669	894	660	1,554
Total	7,700	6,288	13,988	6,818	5,736	12,554	14,518	12,024	26,542

3.2.5 Access and Participation Rates in Pre-Primary Education

3.2.5.1 Gross Enrolment Ratio in Pre-Primary Education

Table 3. 6 shows the Gross Enrolment Ratios (GER) in pre-primary education by sex. The national Gross Enrolment Ratio (GER) for pre-primary level stood at 111.2 in 2020. For boys, the GER was 111.5, while for girls, the GER was 110.8. The marginal increase in the GER from 109.4 in 2019 to 111.2 in 2020 indicates that children are yet to access pre-primary education at the right age, with increasing numbers of under-age and over-age learners enrolled at this level.

Table 3. 6: Gross Enrolment Ratios, in Pre-Primary by Sex, 2020

Sex	2019	2020
Boys	110.2	111.5
Girls	108.6	110.8
Total	109.4	111.2

3.2.5.2 Net Enrolment Rates in Pre-Primary Education

Net Enrolment Rate (NER) measures the efficiency of an education system by comparing the proportion of learners of official age in a level against the national population for the official age. According to the SDG4 indicators, at pre-primary level, there should be a measure of the participation rate in

organised learning one year before official primary school entry age. This implies that for Kenya, the participation rate would be the proportion of 5-year-olds enrolled in Pre-Primary 2 as a percentage of the 5-year-olds in the national population. However, during the period under review, age-specific enrolment at the pre-primary education level was not collected, therefore the NER and Participation Rates could not be reported.

3.2.6 Equity in Pre-Primary Education

Equity in access to pre-primary education is measured through indicators on regional distribution of learning institution, participation rates by sex, and access rates by regions.

3.2.6.1 Average School Size in Pre-Primary Education by County

Figure 3. 1 shows the average school size per county for the 2020 school year. There were 7 counties with at least 100 learners per pre-primary school on average. These include Kakamega, Mandera, Nairobi City, Nandi, Trans Nzoia and Turkana with averagely 298, 165, 143, 122 and 113 learners per school, respectively. On the other hand, 12 counties, including Machakos, Samburu, Murang'a, Kitui and Nakuru, had less than 50 learners per pre-primary school. The average school size of 18 in Machakos County implies that there were relatively more under-enrolled pre-primary schools. In contrast, the average school size of 298 in Kakamega County implies that there were relatively more over-enrolled schools.

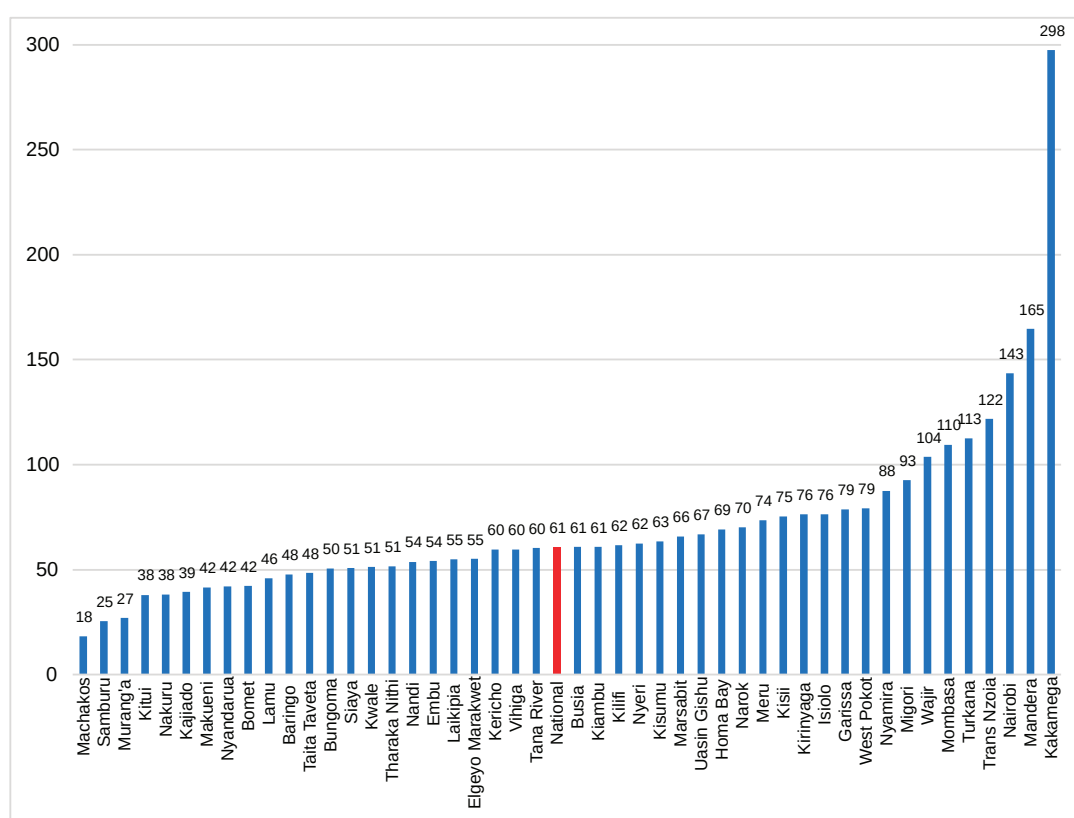

Figure 3. 1: Average School-Size in Pre-Primary Education by County, 2020

3.2.6.2 Gender Parity Index at Pre-Primary Education

3.2.6.2.1 Overall Gender Parity Index at Pre-primary Education Level

Gender Parity Index (GPI) is a measure of equity in access and participation among females and males. Table 3. 7 shows enrolment in pre-primary school level, by gender. The enrolment of boys in

the pre-primary school level increased to 1,436,924 in 2020, from 1,393,719, in 2019. This represented a 3.1 percent growth in boys' enrolment. Similarly, the enrolment of girls increased by 3.8 percent to 1,395,973 girls in 2020, as compared to 1,344,868, in 2019. The Gender Parity Index was 0.97 in 2020, which was within the acceptable range of between 0.97 and 1.03, implying that there was gender parity in access to pre-primary education in 2020.

Table 3. 7: Enrolment in Pre-primary Education Level, by Sex, 2019 - 2020

Gender	2019	2020
Boys	1,393,719	1,436,924
Girls	1,344,868	1,395,973
Total	2,738,587	2,832,897
Gender Parity Index	0.96	0.97

3.2.6.2.2 Gender Parity Index at Pre-Primary Education Level by Class

Table 3. 8 shows the enrolment at pre-primary education level, by gender and grade, for 2019 to 2020. In Pre-primary 1, the number of boys increased to 753,271 in 2020, compared to 695,368 in 2019, representing an increase of 8.3%. The same case applied to girls in the same grade, with the number increasing from 669,928 in 2019, to 730,350 in 2020, representing a decline of 9%. In Pre-primary 2, there was a decrease in enrolment. There were 683,653 boys in 2020 compared to 698,351 in 2019, which was a drop by 2.1%. The girls were also affected, with the number decreasing from 674,940 in 2019 to 665,623 in 2020, representing a percentage decline of 1.4%. In 2019, there was a GPI of 0.96 in Pre-primary 1, which indicates that there was gender disparity in favour of boys. In 2020, the GPI was 0.97 for both Pre-primary 1 and Pre-primary 2, implying that gender parity was achieved at the pre-primary education level.

Table 3. 8: Enrolment in Pre-primary Education Level and Gender Parity Index, 2019 - 2020

Grade	2019			2020		
	Boys	Girls	GPI	Boys	Girls	GPI
Pre-Primary 1	695,368	669,928	0.96	753,271	730,350	0.97
Pre-Primary 2	698,351	674,940	0.97	683,653	665,623	0.97
Total	1,393,719	1,344,868	0.96	1,436,924	1,395,973	0.97

3.2.6.2.3 Gender Parity Index by County

Figure 3. 2 shows Gender Parity Index in pre-primary education by county. There were 15 counties that had not met the desirable parity at pre-primary education level, while the rest of the 22 counties had achieved gender parity in access to pre-primary education. Isiolo county had gender disparity in favour of girls with a GPI of 1.05. On the other hand, while Mandera, Wajir, Garissa, Tana River, Samburu and Lamu had GPI of 0.66, 0.80, 0.81, 0.90, 0.90 and 0.93 respectively, implying gender disparities in favour of boys.

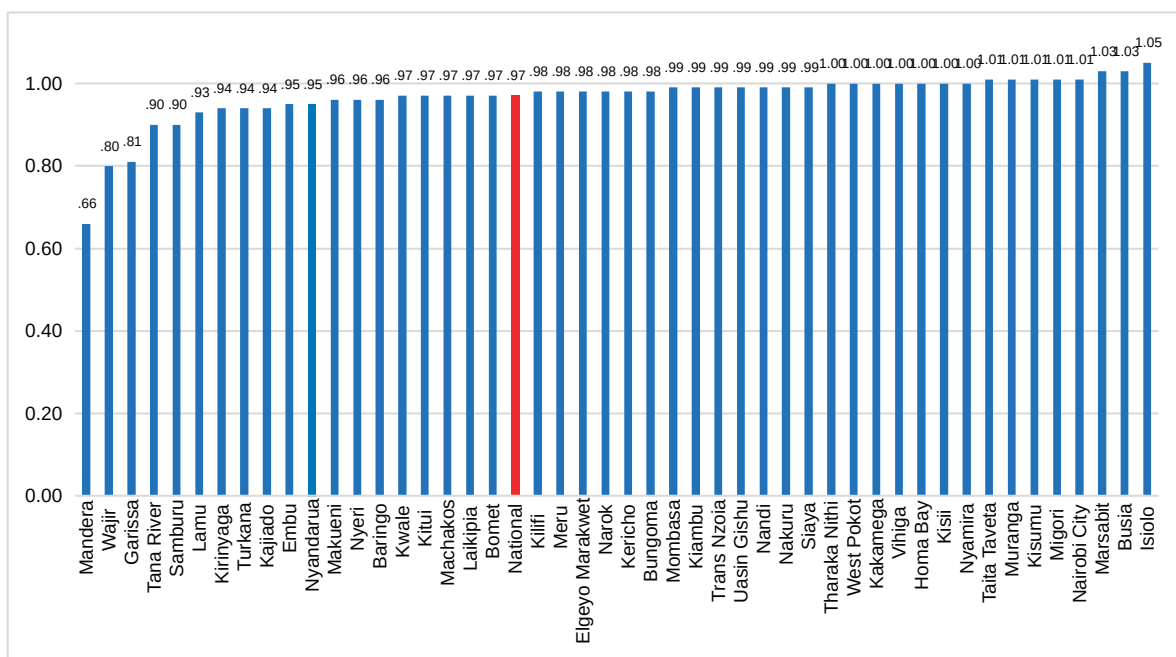

Figure 3. 2: Gender Parity Index at Pre-Primary Education Level, 2020

Figure 3. 3 also shows distribution of gender parity index across the counties. There was gender disparity in access to pre-primary education in the ASAL counties of Mandera, Wajir, Garissa, Turkana, Samburu, Kajiado, Tana River and Lamu. On the other hand, Busia and Marsabit had acceptable parity but tended towards disparity in favour of girls.

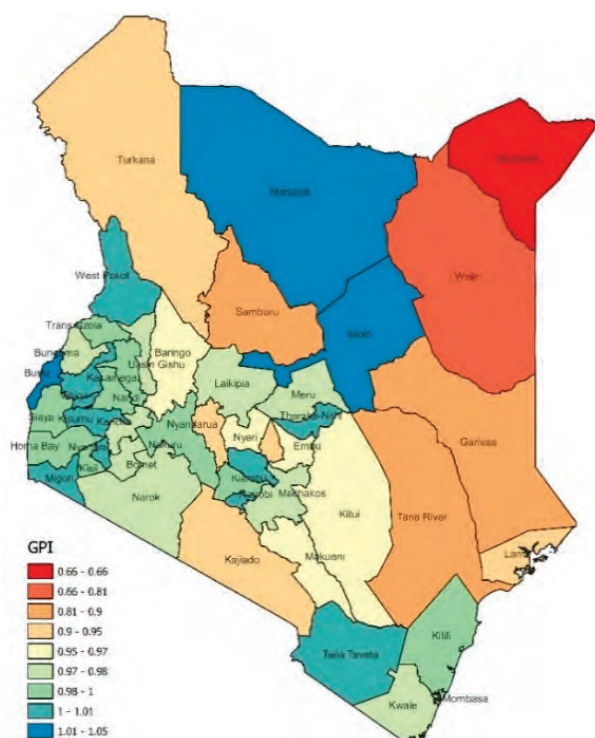

Figure 3. 3: Distribution of Gender Parity Index at Pre-Primary Education Level, 2020

3.2.6.1 Gross Enrolment Ratios in Pre-Primary Education by County

Figure 3. 4 shows a map on the distribution of Gross Enrolment Ratios across counties. The figure shows that there was low access to pre-primary education in ASAL counties. Nevertheless, Turkana, Kakamega, Nyamira and Tharaka Nithi have the highest GER compared to other counties.

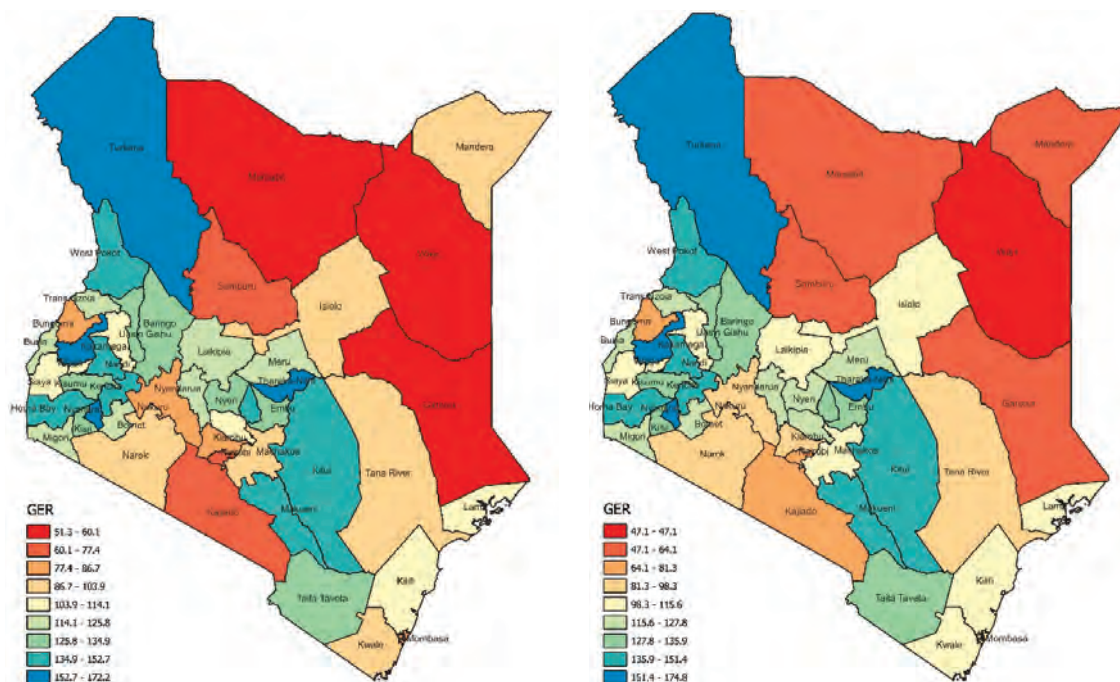

Figure 3. 4: Distribution of Gross Enrolment Ratios for Boys and Girls at Pre-Primary Education Level, 2020

Figure 3. 5 shows GER by county, for boys, girls and the overall GER at pre-primary level of education. In overall, Wajir, Marsabit and Garissa have slightly above half the pre-primary age population accessing education, including underage and overage learners. Nairobi City County also has a lower GER, being in the same range as some ASAL counties. This may be attributed to learners in pre-primary schools located in the informal urban settlements.

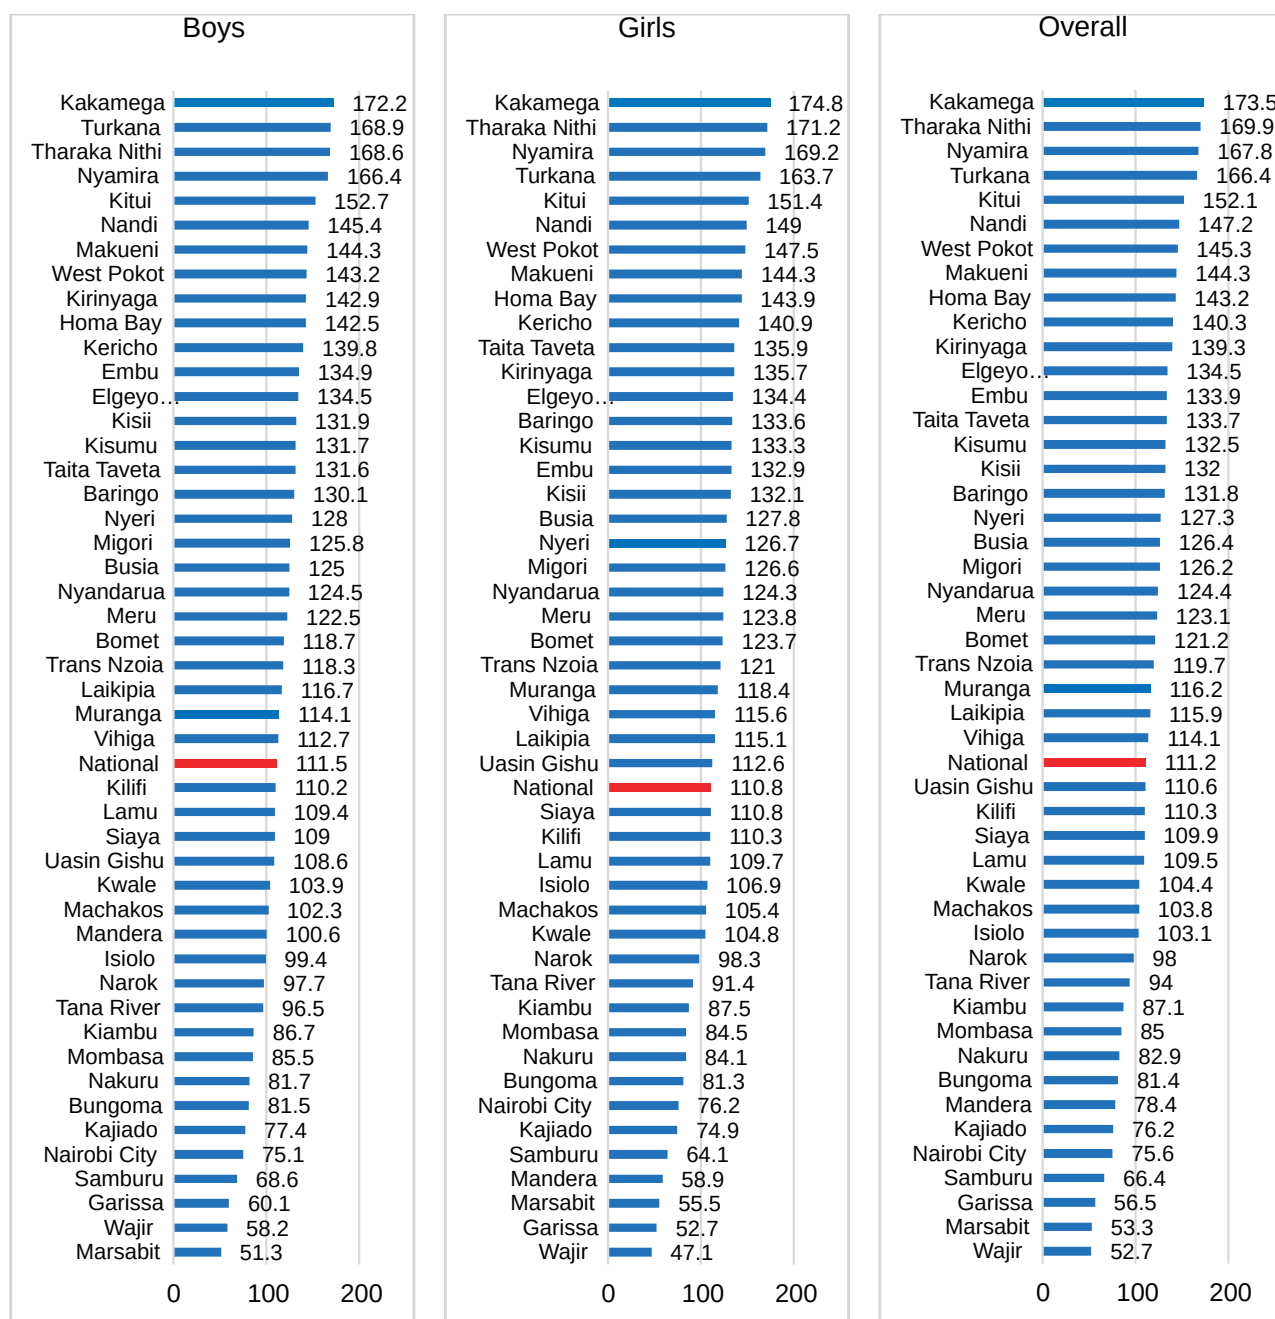

Figure 3. 5: Gross Enrolment Ratios at Pre-Primary Education Level, 2020

3.3. Quality and Relevance in Pre-Primary Education

Quality and relevance of education is determined by supply and demand factors. Community attributes, including attitudes and socio-economic conditions, as well as external factors like insecurity, pandemics and natural disasters define the context indicators on quality of education. Similarly, school programme, leadership and climate are among the process indicators on quality of education. Outcome indicators on quality of education include competencies measured through assessment and examinations, and repetition, progression and completion rates.

The other critical drivers of quality and relevance in education are the input indicators, which include the financial resources, curricula and curricula materials, infrastructure, equipment and facilities and human resources. At the pre-primary level, the indicators reported are -teacher ratios, learner-to-classroom ratios, learner-to-toilet ratios and availability of ICT infrastructure.

3.3.1 Learner-to-Teacher Ratios at Pre-Primary Education

At the pre-primary education level, the standard pupil-to-teacher ratio is one teacher and an assistant teacher for every 25 learners. Table 3. 9 presents the number of teachers and the teacher-to-learner ratios at pre-primary education level. On average, the PTR for pre-primary education was 43, with the ratios in public and private schools being 52 and 26, respectively.

Table 3. 9: Number of Teachers and PTR in Pre-Primary Education Level, 2019-2020

Category	Enrolment	Teachers			PTR
		Male	Female	Total	
Public	2,195,401	7,432	34,923	42,355	52
Private	637,496	3,930	20,139	24,069	26
Total	2,832,897	11,362	55,062	66,424	43

Figure 3. 6 shows the average learner-to-teacher ratios at the pre-primary education level by county. Private pre-primary schools had better learner-teacher ratios than public schools. For instance, in Turkana County, there were 156 learners per teacher in public as compared to 43 learners per teacher in private pre-primary schools on average. In the public schools, there were lower learner to teacher ratios in Taita Taveta, Tharaka Nithi, Uasin Gishu, Baringo, Machakos and Kitui Counties, while higher ratios were recorded in Turkana, Mandera, Garissa, Tana River and Trans Nzoia. In overall, quality of education at pre-primary level was better in terms of teacher resource, in Nairobi City, Taita Taveta, Machakos, Mombasa and Uasin Gishu counties in comparison to Turkana, Mandera, Tana River, West Pokot and Bungoma counties.

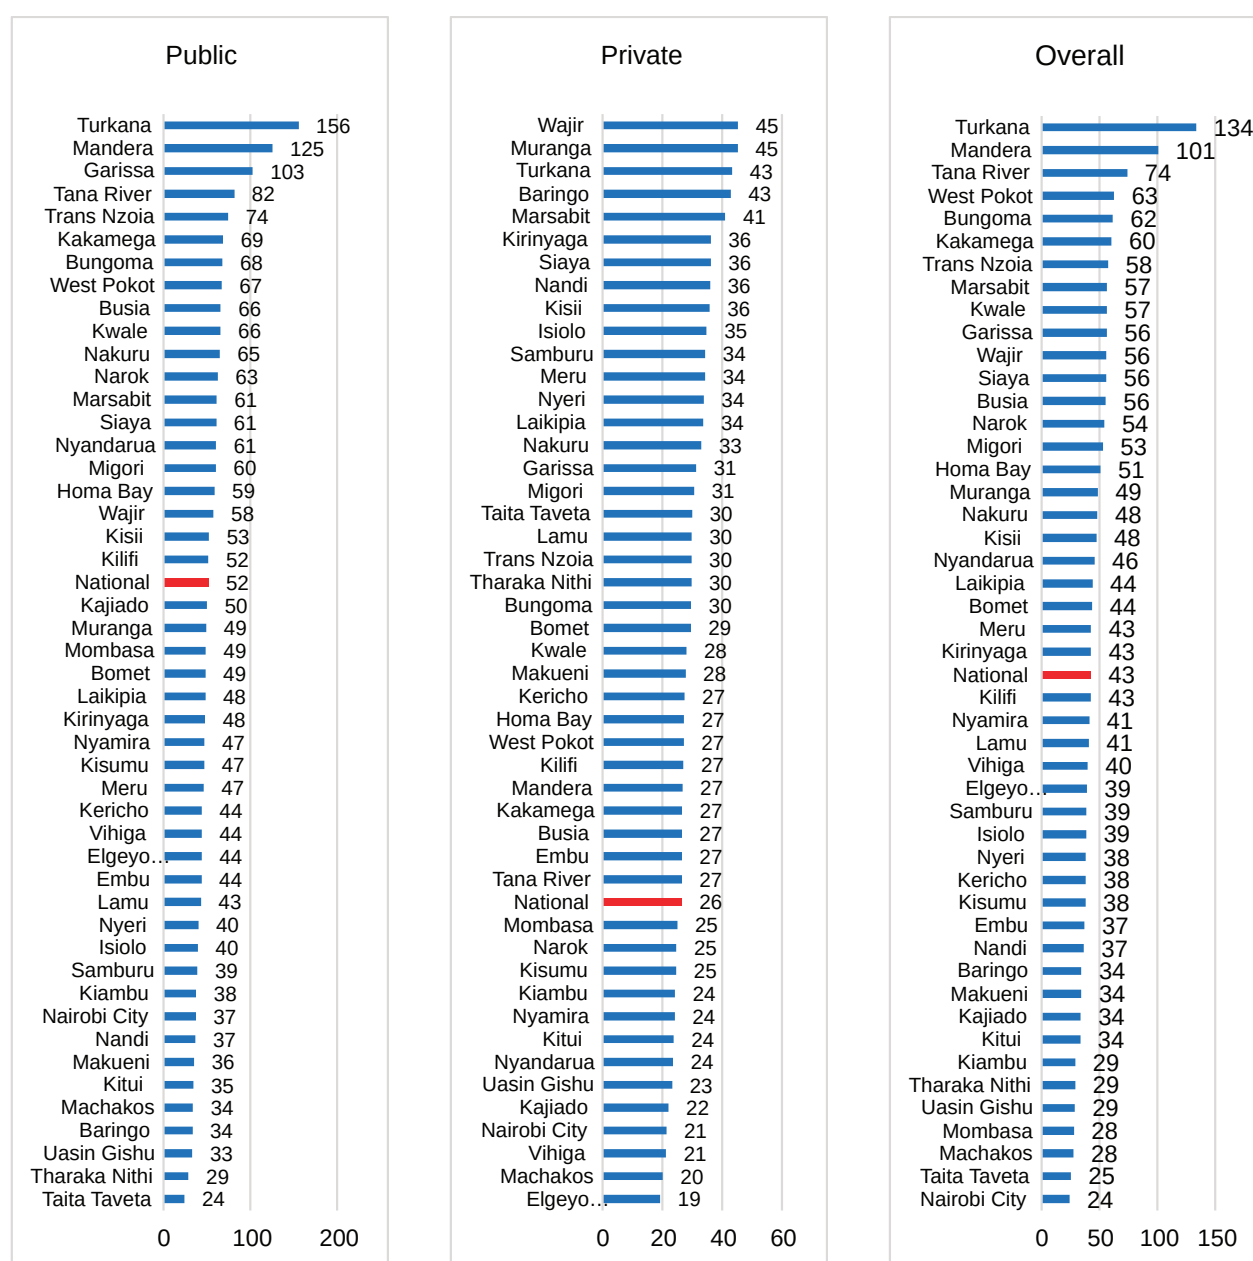

Figure 3. 6: Learner-to-Teacher Ratios at Pre-Primary Level of Education, 2020

3.3.2 Learner-Classroom Ratios at Pre-Primary Education

Table 3. 10 presents the number of classrooms in pre-primary schools, in 2020. The total number of classrooms reported in pre-primary schools was 67,768. Of this number, 45,270 were permanent classrooms, while 22,498 were temporary. Public schools had the largest share, with a total of 41,256, comprising 27,091 permanent classrooms, and 14,165 temporary ones. On the other hand, private schools had a total of 26,512 classrooms, with 18,179 being permanent and 8,333 being temporary. On average, there were 42 learners per classroom with public schools having learners-to-classroom ratio of 53 as compared to 35 in private pre-primary schools.

Table 3. 10: Number of Classrooms in Pre-Primary Schools, and Class Size, 2020

Category	Enrolment	Classrooms			Class size
		Permanent	Temporary	Total	
Public	2,195,401	27,091	14,165	41,256	53
Private	637,496	18,179	8,333	26,512	35
Total	2,832,897	45,270	22,498	67,768	42

Figure 3. 7 shows the average learner-to-classroom ratio at pre-primary level by county. In public pre-primary schools, Turkana has an average of 175 learners per class, while Mandera, Kakamega and Busia have learners-to-classroom ratios of 108, 102 and 94 respectively. On the other hand, counties with lower learner-to-classroom ratios include Makueni, Taita Taveta, Tharaka Nithi, Machakos and Nyeri. Counties with higher learner to classroom ratios imply low quality of educational inputs in terms of classrooms, and the congestion has a negative impact on the quality of pre-primary education in those counties. On the other hand, counties with lower learner-to-classroom ratios have better quality of educational input in terms of classrooms.

In private pre-primary schools, Bomet, Nandi, Turkana and Baringo have average learners-to-classroom ratios of 74, 74, 71 and 67 respectively. Mandera, Kitui, Machakos, Mombasa and Makueni are among the counties with lower learner-to-classroom ratios in private pre-primary schools.

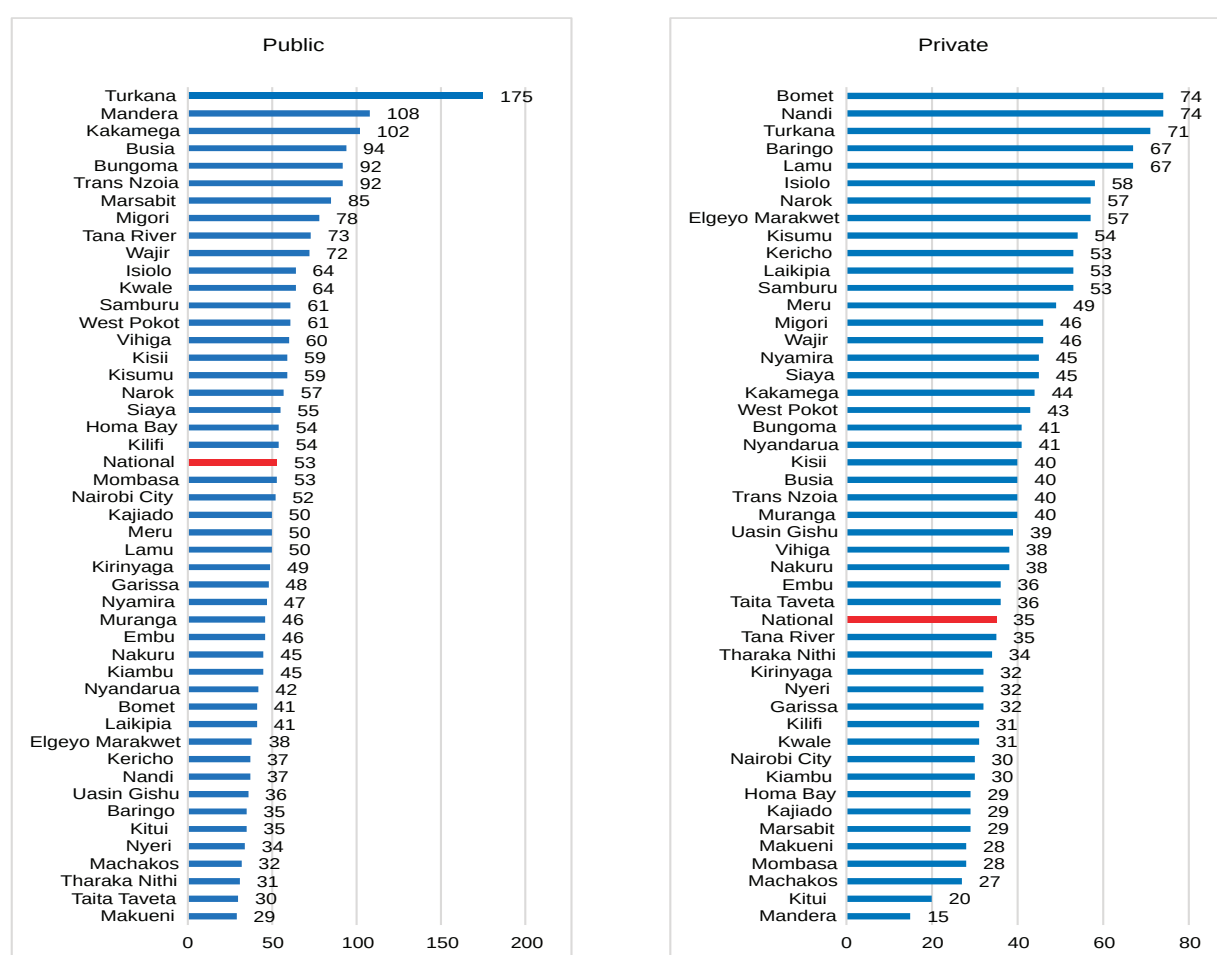

Figure 3. 7: Learner-to-Classroom Ratios at Pre-Primary Education Level, 2020

3.3.3 Learner to Toilet Ratio in Pre-Primary Schools

Water, Sanitation and Hygiene (WASH) facilities play a critical role on the quality of education. Given that children spend most of the day in schools, therefore availability of clean and safe water, adequate and clean toilets/ pit latrines is important for children's health and dignity, especially for girls. WASH facilities also influence school attendance and minimise risks of children dropping out of school. The recommended learner-to-toilet ratio at pre-primary school level was one toilet for 25 girls, and one toilet for 30 boys and urinal facility. The data on toilets reported in this booklet included pit latrines and aggregated the count of the number of doors or holes in a toilet block.

Table 3. 11 presents boys and girls enrolled, number of toilets/latrines and the corresponding learner-to-toilet ratio in pre-primary schools. In 2020, the total number of toilets recorded in pre-primary schools was 104,573. Of this number, 47,165 toilets were for boys, while 57,408 were for girls. The overall learner-to-toilet ratio, in the same year, was 30 boys per toilet and 24 girls per toilet. In public schools, the ratio was 40 boys per toilet, and 34 girls per toilet. On the other hand, private schools had a ratio of 16 boys per toilet, and 13 girls per toilet.

Table 3. 11: Learner to Toilet Ratio in Pre-primary Schools, 2020

	Enrolment		Toilets		Learner to Toilet Ratios	
	Boys	Girls	Boys	Girls	Boys	Girls
Public	1,117,571	1,077,830	27,710	32,094	40	34
Private	319,353	318,143	19,455	25,314	16	13
Total	1,436,924	1,395,973	47,165	57,408	30	24

Figure 3. 8 shows the average pupil-toilet ratio in public pre-primary schools by county. For boys, the average learner-to-toilet ratio ranged from 16 to 187, based on available data. On the other hand, the toilet ratio for girls ranged from 12 to 176 learners per toilet. Turkana, Mandera, Wajir and Tana River have the highest learner-to-toilet ratios, being 187, 185, 136 and 100 for boys and 176, 143, 113 and 88 for girls respectively

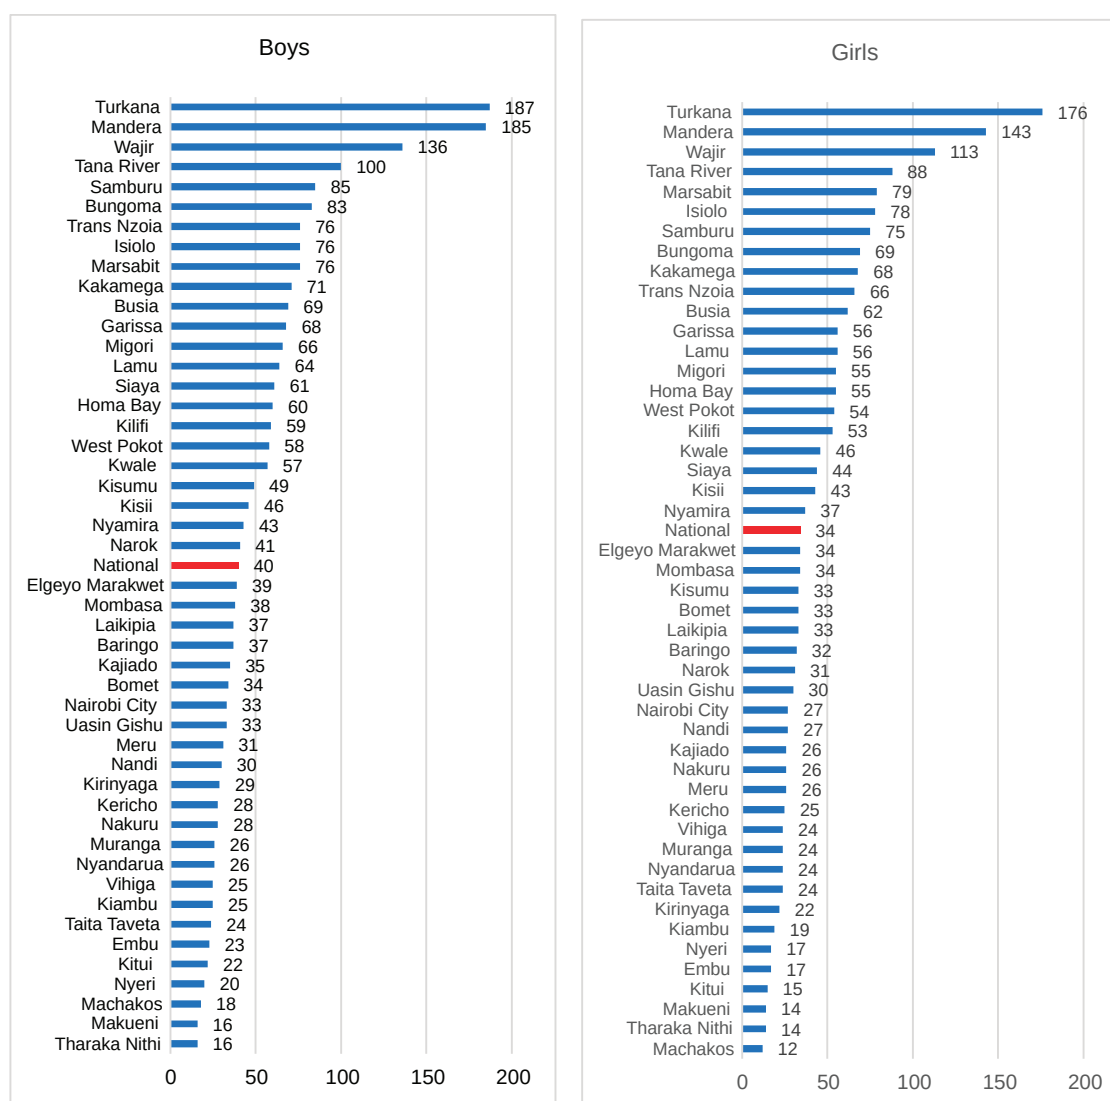

Figure 3. 8: Pupil-to-Toilet Ratio in Public Pre-primary Schools, by County, 2020

Similarly, Figure 3. 9 shows the average learner-to-toilet ratio for private pre-primary schools. Among the counties, Mandera, Wajir and Turkana had a ratio of 35, 34 and 31 boys per toilet. Turkana and Wajir both had a learner-to-toilet ratio of 30 girls per toilet in private pre-primary schools. The figures further show that the toilet ratio was better in private than public pre-primary institutions.

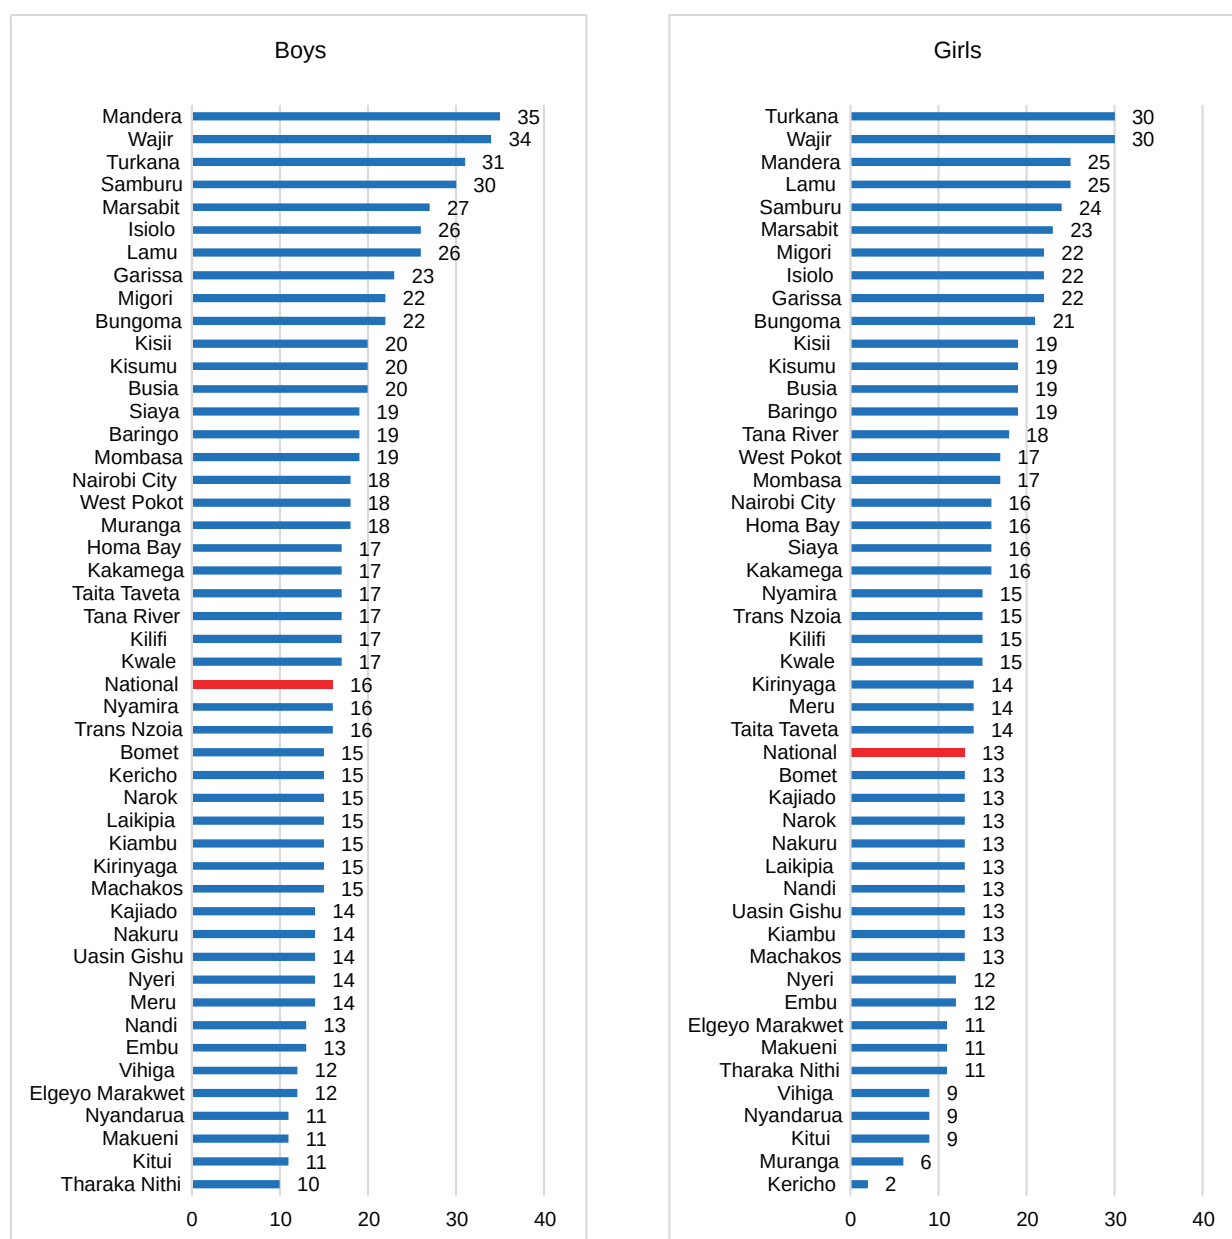

Figure 3. 9: Pupil-to-Toilet Ratios in Private Pre-Primary Schools, 2020

3.3.4 Basic ICT Infrastructure in Pre-Primary Education

Table 3. 12 shows number of functional computers/ tablets available in pre-primary institutions for educational use, and the proportion of schools with functional internet connectivity. There were 95,722 computers and tables in public as compared to 24,320 in private pre-primary schools. However, the proportion of schools with functional internet connectivity in public pre-primary schools was nearly a third of those in private schools.

Table 3. 12: Number of Computers/ Tables and Proportion of Schools with Internet

Category	Computers/Tables	Internet§
Public	95,722	14.9
Private	24,320	44.5
All	120,042	22.4

§ Proportion of pre-primary centres with functional internet

Figure 3. 10 shows the proportion of pre-primary schools with functional internet connectivity. Counties with better internet connectivity in public pre-primary schools were Tana River, Mombasa, Kitui, Isiolo and Elgeyo Marakwet, which had at least 20 % of the schools with functional internet. Marsabit, Kericho, Kirinyaga, Lamu, Murang'a, Nyeri and Kilifi had less than 10 % of the schools with functional internet. Private pre-primary schools had a better performance in terms of internet connectivity, with Kiambu, Kajiado, Mombasa, Isiolo, Nairobi City, Nakuru and Kirinyaga having at least 50 % of the schools with functional internet connectivity.

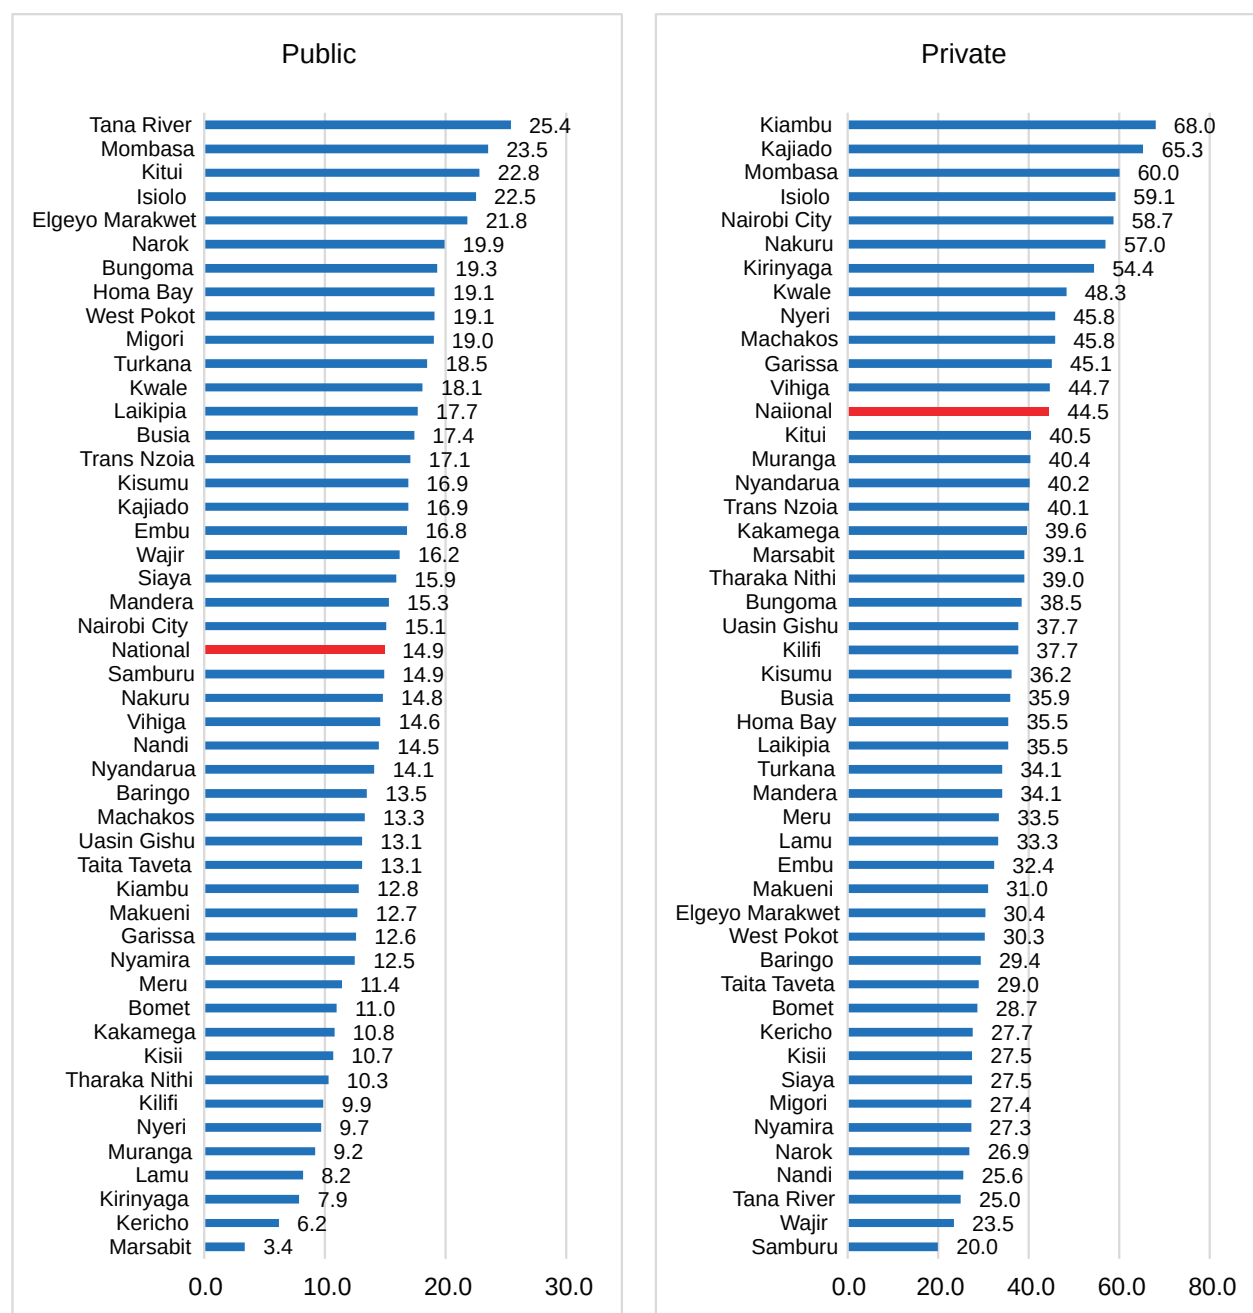

Figure 3. 10: Percentage of pre-primary schools with functional internet per county, 2020

4. STATUS OF PRIMARY EDUCATION

4.1. Introduction

This chapter presents the status of primary education and describes key indicators on access, equity and inclusion, and quality and relevance. Access and equity are measured by the number of schools; school sizes; enrolments and enrolment rates; gender parity index and regional performance across the indicators on access. On the other hand, quality and relevance is measured through educational inputs such as financing, curricula and curricula support materials, infrastructure, equipment, human resource and learning outcomes. Repetition, retention, completion, and transition rates are also indicators of quality of education.

4.2. Access, Equity and Inclusion in Primary Education

4.2.1 Number of Primary Schools

Table 4. 1 shows the trends in the growth of the number of primary schools. There was a decline in the number of primary schools by 2.7 %, from 32,344 in 2019 to 31,464 in 2020. Public primary schools increased by 0.4 %, from 23,286 schools in 2019 to 23,368 schools in 2020. On the other hand, private primary schools decreased by 10.6 %, from 9058 schools in 2019 to 8,096 schools in 2020. Public schools accounted for the largest share of primary schools at 74 %, in 2020, this being a marginal increase from 72 % in 2019.

Table 4. 1: Number of Primary Schools by Category, 2018-2020

Category	2018	2019	2020
Public	23,336	23,286	23,368
Private	8,447	9,058	8,096
Total	31,783	32,344	31,464

4.2.2 Enrolment in Public and Private Primary Schools

4.2.2.1 Enrolment by Category of Primary Schools

Table 4. 2 shows enrolment trends in public and private primary schools. There were 10,076,828 learners enrolled in primary schools across the country in 2020. In terms of enrolment by school category, there were 8,576,986 learners in public and 1,439,746 learners in private primary schools. Enrolment in public primary schools grew by 2.1 percent, from 8,454,606 in 2019 to 8,635,605 in 2020 while there was decline of enrolment in private schools from 1,617,434 in 2019 to 1,441,223 in 2020, representing 10.9 percent decrease in enrolment.

Table 4. 2: Enrolment in Public and Private Schools 2017-2020

Category	2017	2018	2019	2020
Public	8,879,685	8,930,924	8,454,606	8,635,605
Private	1,410,470	1,458,902	1,617,434	1,441,223
Total	10,290,155	10,389,826	10,072,040	10,076,828

The private sector plays an important role in complementing the government's efforts to provide universal basic education. *Figure 4. 1* shows the share of private enrolment at the primary education level. There was a gradual increase in the share of private enrolment in primary schools from 2017

to 2019. However, the proportion of learners enrolled in private schools dropped from 16.1 percent in 2019 to 14.3 percent in 2020.

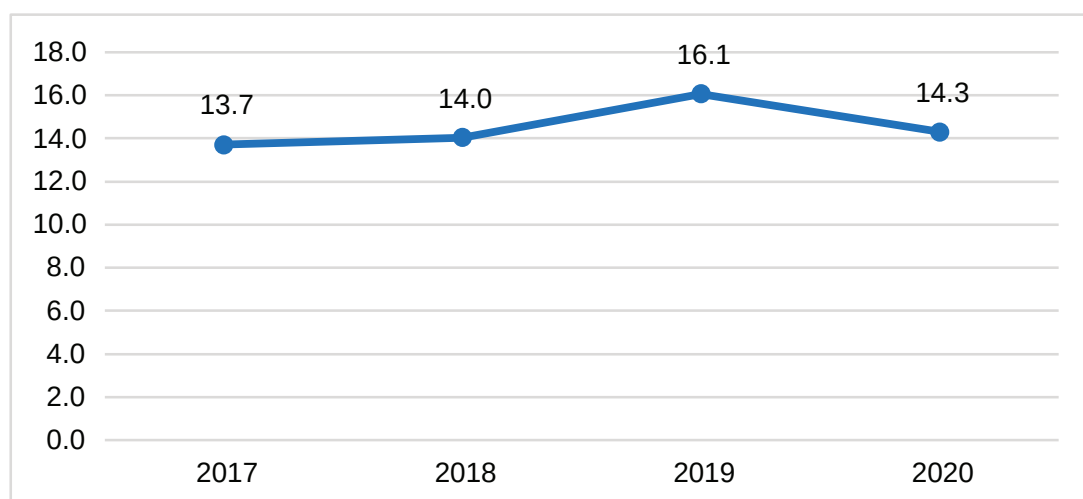

Figure 4. 1: Share of Private Enrolment at Primary Education Level, Percent, 2017 -2020

4.2.2.2 Enrolment by Class and Category of Primary Schools

UNESCO Institute for Statistics provides a framework for international comparison of education statistics, through the International Standard for Classification of Education (ISCED). ISCED mapping for Kenya, in the 2011 framework, categorizes primary education into 2 levels: ISCED 1 for the first six years of primary education and ISCED 2 for the last two years of primary education, referred to as Lower Secondary.

Table 4. 3 shows enrolment in Grades 1 to 6 in primary education, corresponding to ISCED 1. The table shows that public schools enrolled 85 percent of learners at this level. In addition, there were more boys than girls enrolled in each of the grades in the ISCED 1 level.

Table 4. 3: Enrolment in Grade 1 -6 (ISCED 1), 2020

Grade	Public			Private			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
1	534,735	498,307	1,033,042	113,192	109,645	222,837	647,927	607,952	1,255,879
2	554,485	513,561	1,068,046	105,400	102,335	207,735	659,885	615,896	1,275,781
3	547,307	514,311	1,061,618	99,931	97,835	197,766	647,238	612,146	1,259,384
4	540,689	509,765	1,050,454	91,150	88,581	179,731	631,839	598,346	1,230,185
5	577,882	548,886	1,126,768	89,081	86,932	176,013	666,963	635,818	1,302,781
6	571,187	556,583	1,127,770	81,321	79,634	160,955	652,508	636,217	1,288,725
Total	3,326,285	3,141,413	6,467,698	580,075	564,962	1,145,037	3,906,360	3,706,375	7,612,735

Table 4. 4 presents the enrolment in ISCED 2, comprising Standard 7 and Standard 8. In a similar trend to ISCED 1, public schools accounted for 88 percent of enrolment at this level. This implies, possibly, that as learners approach the terminal class in primary, they tend to enrol more in public schools than in private schools. Furthermore, there were more boys than girls enrolled in standard 7 while in Standard 8, more girls were enrolled than boys.

Table 4. 4: *Enrolment of Learners in Lower Secondary, (ISCED 2), 2020*

Class	Public			Private			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
7	561,218	558,652	1,119,870	75,260	74,480	149,740	636,478	633,132	1,269,610
8	493,941	495,477	989,418	72,416	72,553	144,969	566,357	568,030	1,134,387
Total	1,055,159	1,054,129	2,109,288	147,676	147,033	294,709	1,202,835	1,201,162	2,403,997

4.2.3 Average School Size in Primary Education

School size is an important factor in determining resource requirements and allocation. Table 4. 5 shows the average school size in both public and private schools in primary education levels. The overall average school size in primary education level increased from 363 learners in 2019 to 367 learners in 2020, for public schools while it stood at 178 for private schools, from 173 in 2019.

Table 4. 5: *Average School-size in primary schools*

Category	Indicator	2017	2018	2019	2020
Public	Enrolment	8,879,685	8,930,924	8,454,606	8,635,605
	No. of Institutions	23,139	23,336	23,286	23,368
	Avg. School Size	384	383	363	367
Private	Enrolment	1,410,470	1,458,902	1,617,434	1,441,223
	No. of Institutions	8,310	8,447	9,329	8,096
	Avg. School Size	170	173	173	178
Total	Enrolment	10,290,155	10,389,826	10,072,040	10,076,828
	No. of Institutions	31,449	31,783	32,615	31,464
	Avg. School Size	327	327	309	320

4.2.4 Learners with Special Needs in Primary Education

Education for learners with special needs is offered in special schools, integrated schools and special units. Special schools are those that are wholly dedicated to learners with special needs while the integrated ones are regular schools where learners with disabilities and special needs learn together with those without disabilities. A special unit is a special class in a regular school dedicated specifically to children with severe disabilities and special needs who cannot benefit from learning in an integrated set up.

Table 4. 6 presents the number of primary schools, which also have SNE learners enrolled. It also shows their respective enrolments for the period 2017 to 2020. There were 7,345 schools that enrolled learners with special needs in 2020. The number of public primary institutions with enrolled SNE learners increased by 144 % from 3,043 in 2019 to 7,435 in 2020. The increase was attributed to reporting of all learners enrolled in special, integrated and special units, unlike the previous years' data which only had learners under the SNE capitation.

Table 4. 6: *Number of Primary Schools with SNE learners, 2017-2020*

Year	2017	2018	2019	2020
Institutions	2,865	2,927	3,043	7,435
Enrolment	108,221	121,144	136,081	128,377

Table 4. 7 shows the enrolment of SNE learners by class, sex, and category of schools. In the primary schools, there were 128,377 learners with special needs, comprising 71,369 boys and 57,008 girls. From the data, over 97 percent of learners with special needs are enrolled in public primary schools.

Table 4. 7: Enrolment of Learners with Special Needs in Primary Schools, 2020

Grade	Public			Private			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Grade 1	10,642	7,552	18,194	341	225	566	10,983	7,777	18,760
Grade 2	8,957	7,274	16,231	251	202	453	9,208	7,476	16,684
Grade 3	9,167	7,283	16,450	254	191	445	9,421	7,474	16,895
Grade 4	9,147	7,535	16,682	269	201	470	9,416	7,736	17,152
Class 5	8,720	6,972	15,692	226	161	387	8,946	7,133	16,079
Class 6	8,621	7,092	15,713	200	157	357	8,821	7,249	16,070
Class 7	7,959	6,696	14,655	163	142	305	8,122	6,838	14,960
Class 8	6,267	5,194	11,461	185	131	316	6,452	5,325	11,777
Total	69,480	55,598	125,078	1,889	1,410	3,299	71,369	57,008	128,377

Table 4. 8 shows the number of learners with special needs enrolled under the stage-based programme. There were 60,096 learners with special needs, with public institutions having nearly 98 percent of the learners enrolled in the foundation, intermediate, pre-vocational and vocational levels.

Table 4. 8: Enrolment of Stage-based SNE Learners, 2020

Stage	Public			Private			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Foundation	16,782	12,702	29,484	332	240	572	17,114	12,942	30,056
Intermediate	9,701	7,911	17,612	262	223	485	9,963	8,134	18,097
Pre-Vocational	4,059	3,390	7,449	97	69	166	4,156	3,459	7,615
Vocational	2,222	1,852	4,074	125	129	254	2,347	1,981	4,328
Total	32,764	25,855	58,619	816	661	1,477	33,580	26,516	60,096

4.2.5 Access and Participation Rates in Primary Education

4.2.5.1 Gross Enrolment Ratios at Primary Education Level

Table 4. 9 shows the Gross Enrolment Ratios (GER) in primary levels of education. The GER stood at 97.5, this being a drop from 99.6 in 2019. The GER for boys was of 98.8 while that of girls.

Table 4. 9: Gross Enrolment Ratio at Primary Education Level, 2019-2020

Ratio	2019	2020
Boys	98.9	98.8
Girls	100.4	96.2
Overall	99.6	97.5

4.2.5.2 Net Enrolment Rates at Primary Education Level

Age-specific enrolment data was collected in 2020 for learners aged 6 to 13 years enrolled in primary schools to enable computation of Net Enrolment Rate (NER). Previous publications missed out on NER due to lack of age-specific enrolment data. Table 4. 10 shows the Net Enrolment Rates (NER) in primary levels of education. The NER was 79.3 in 2020, implying about 20 percent of children of the primary school going age are not accessing education at the right age. The NER for boys was 79.8 while that for girls was 78.8.

Table 4. 10: Net Enrolment Rate at Primary Education Level, 2020

Rate	2020
Boys	79.8
Girls	78.8
Overall	79.3

4.2.6 Equity in Primary Education

4.2.6.1 Average Primary School Size per County

Figure 4. 2 shows the average school sizes by county at primary education level for both public and private schools. The combined school average size changed from 314 in 2019 to 318 in 2020. Nairobi City, Mombasa, Trans Nzoia, Kakamega and Bungoma were the top five counties with the highest school-size in public schools. On the other hand, West Pokot, Mandera, Garissa, Marsabit and Nakuru had the highest average school sizes in private schools. On the contrary, Baringo, Tharaka Nithi, Kitui, Embu and Nyeri, recorded the lowest average school-sizes in public primary schools. Tharaka Nithi, Siaya, Makueni, Kitui and Lamu had the lowest average school sizes in private primary schools.

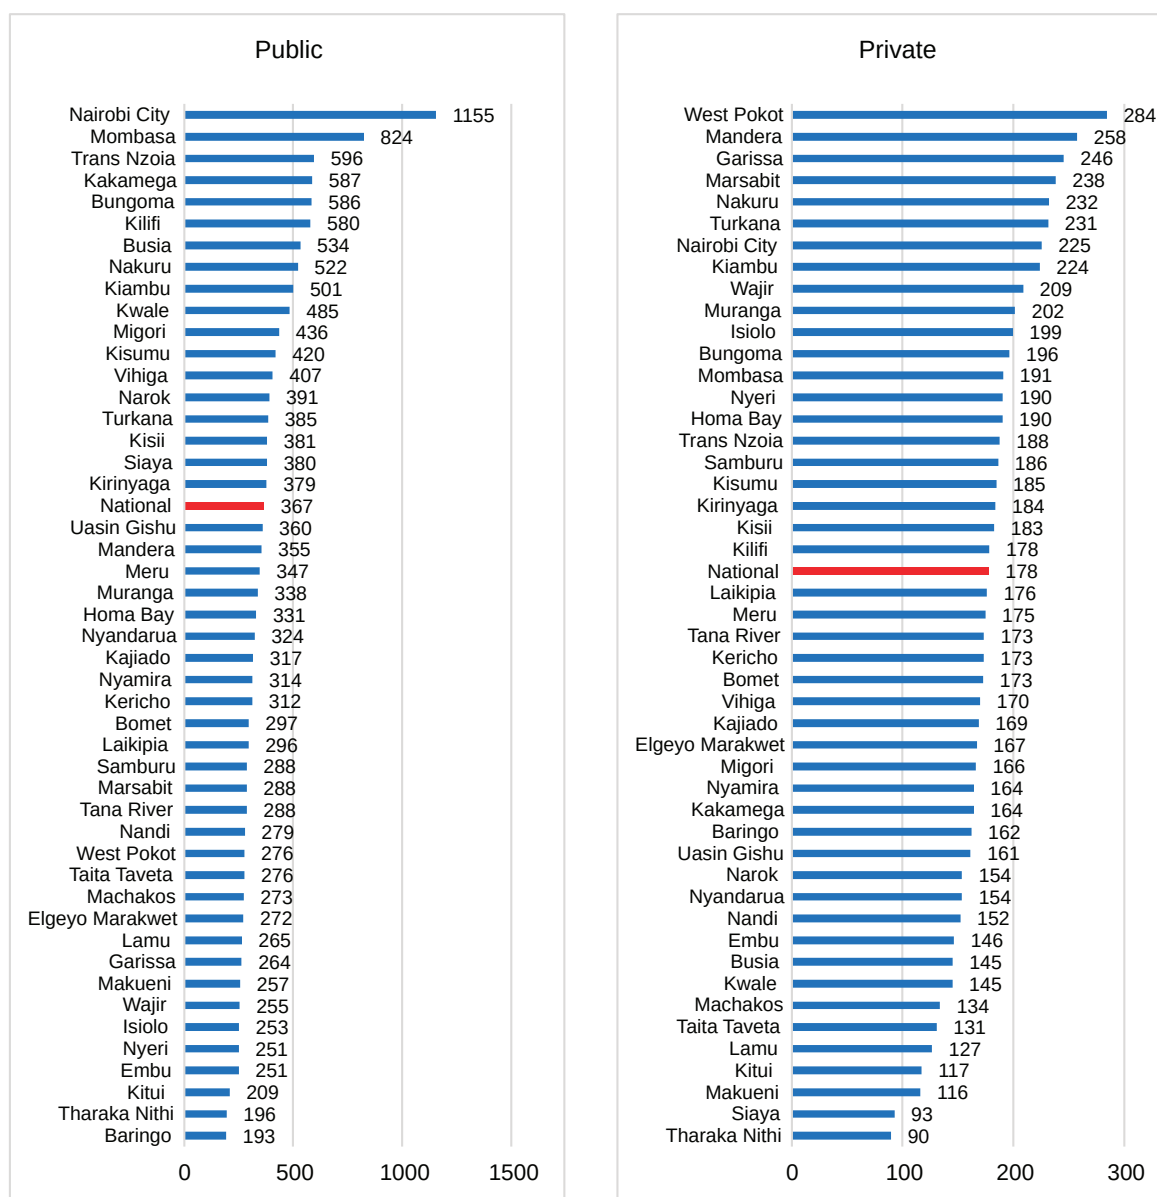

Figure 4. 2: Average School Size at Primary Education Level, 2020

4.2.6.2 Gender Parity Index at Primary Education Level

4.2.6.2.4 Overall Gender Parity Index at Primary Education Level

Table 4. 11 shows enrolments in primary schools by sex. and indicates a Gender Parity Index of 0.96, implying that there was gender disparity at the primary education level in favour of boys.

Table 4. 11: Enrolment Primary School by Sex for the Year 2018-2020

Gender	2018	2019	2020
Boys	5,107,299	5,191,385	5,142,775
Girls	4,964,741	4,978,680	4,934,053
Total	10,072,040	10,170,065	10,076,828
Gender Parity Index	0.97	0.96	0.96

4.2.6.2.5 Gender Parity Index by Grade/Class

Table 4. 12 shows the enrolment by sex, education level and grade/class as of 2019 and 2020. In 2020, there were slightly more boys than girls enrolled from Grade 1 to 7 while in Class 8, there were slightly more girls than boys enrolled. There was gender disparity in favour of boys from Grade 1 to Standard 5, while there was parity in Standard 6, Standard 7 and Standard 8 of primary education.

Table 4. 12: Enrolment by Sex and Grade/Class, 2019- 2020

Class/Stage	2019			2020		
	Boys	Girls	GPI	Boys	Girls	GPI
Grade 1	659,418	621,089	0.94	647,927	607,952	0.94
Grade 2	655,150	619,313	0.95	659,885	615,896	0.93
Grade 3	634,994	606,973	0.96	647,238	612,146	0.95
Grade 4	663,809	636,478	0.96	631,839	598,346	0.95
Standard 5	655,491	644,070	0.98	666,963	635,818	0.95
Standard 6	648,239	645,771	1.00	652,508	636,217	0.98
Standard 7	643,828	648,428	1.01	636,478	633,132	0.99
Standard 8	546,370	542,619	0.99	566,357	568,030	1.00

3.2.6.2.3 Gender Parity Index by County

Figure 4. 3 shows the distribution of GPI ranges in primary education across the counties. The ASAL counties on Mandera, Garissa, Wajir and Turkana had lower gender parity index, implying that there was gender disparity in favour of boys. On the contrary, Isiolo, although being an ASAL county, had gender disparity in favour of girls.

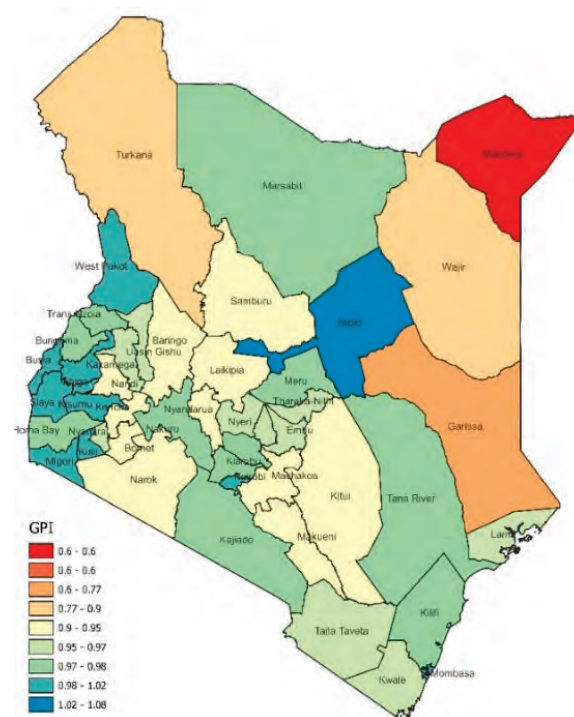

Figure 4. 3: Distribution of Gender Parity Index at Primary Education Level, 2020

Figure 4. 4 shows the Gender Parity Index across the counties. In terms of County analysis, counties with the lowest GPI at the primary education level were Mandera (0.60), Garissa (0.73) Wajir (0.77), Turkana (0.89) and Samburu (0.90). There are 22 counties that had achieved gender parity, while 24 counties were yet to achieve gender parity at the primary level of education.

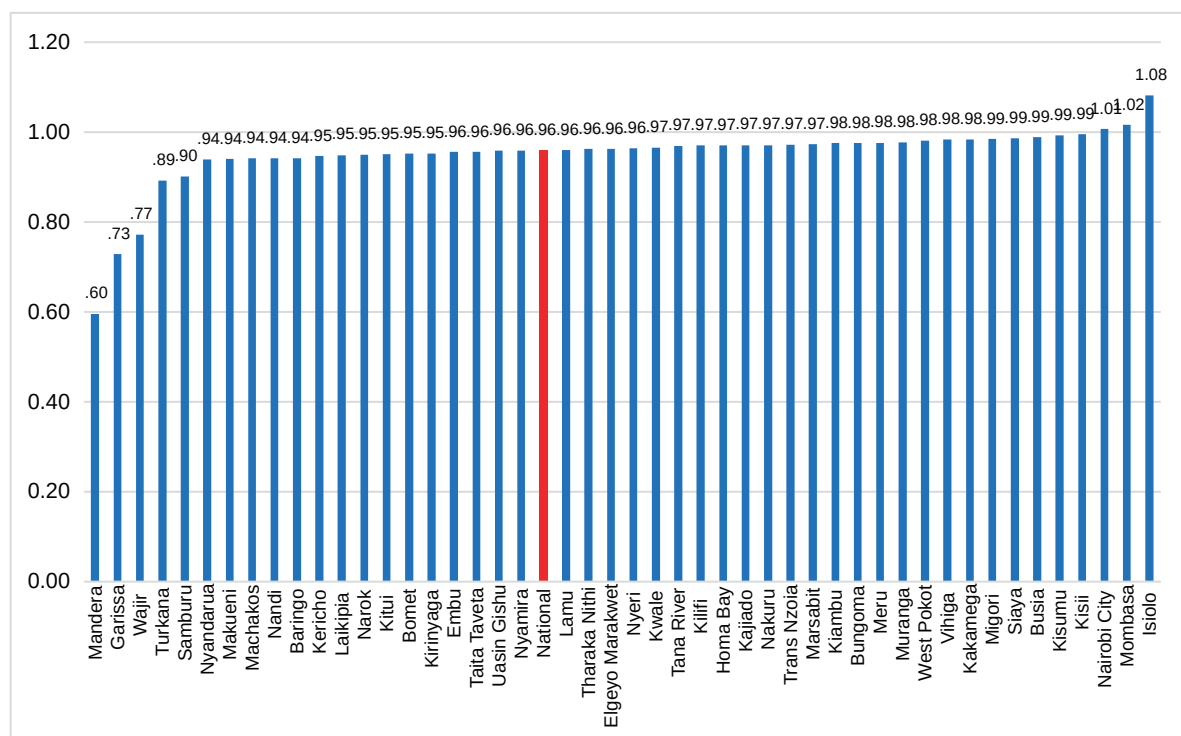

Figure 4. 4: Gender Parity Index at Primary Education Level, 2020

4.2.6.3 Gross Enrolment Ratio by Counties

Figure 4. 5 shows a map on the range of Gross Enrolment Ratio in the counties at the primary level of education. ASAL counties had lower GER compared to other regions in the country.

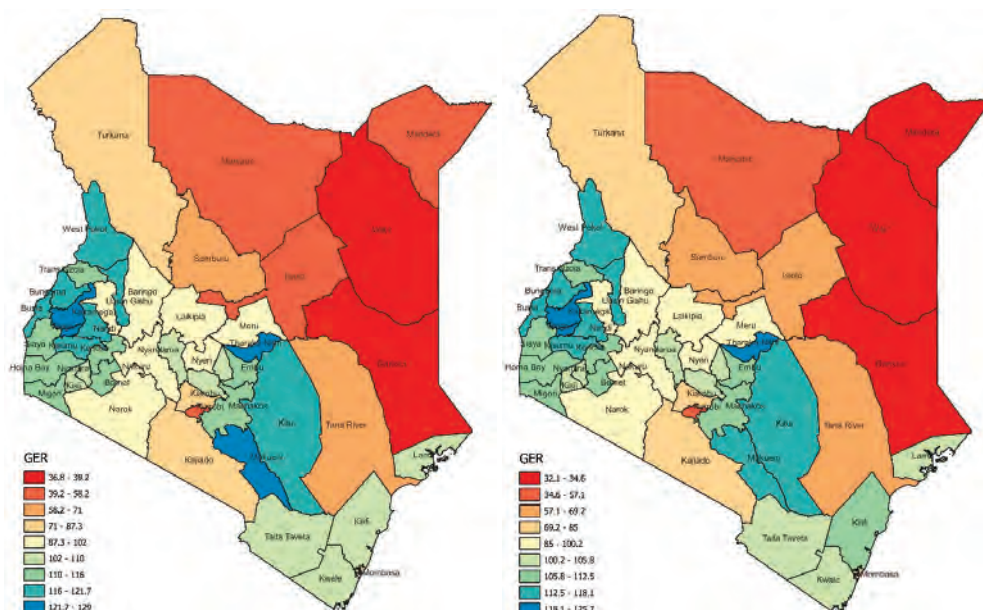

Figure 4. 5: Distribution of GER for Boys and Girls at Primary Education Level by County, 2020

Figure 4. 6 shows the GER at primary education level for individual counties. In overall, 31 counties had a GER of more than 100, implying that enrolment at the primary level in these counties had under-age and over-age learners. On the other hand, Garissa, Mandera, Wajir and Marsabit had a GER of less than 50, indicating that total enrolment in primary schools' enrolment in these counties was less than half the population of children aged 6 to 13 years, the official primary school going age, in these counties.

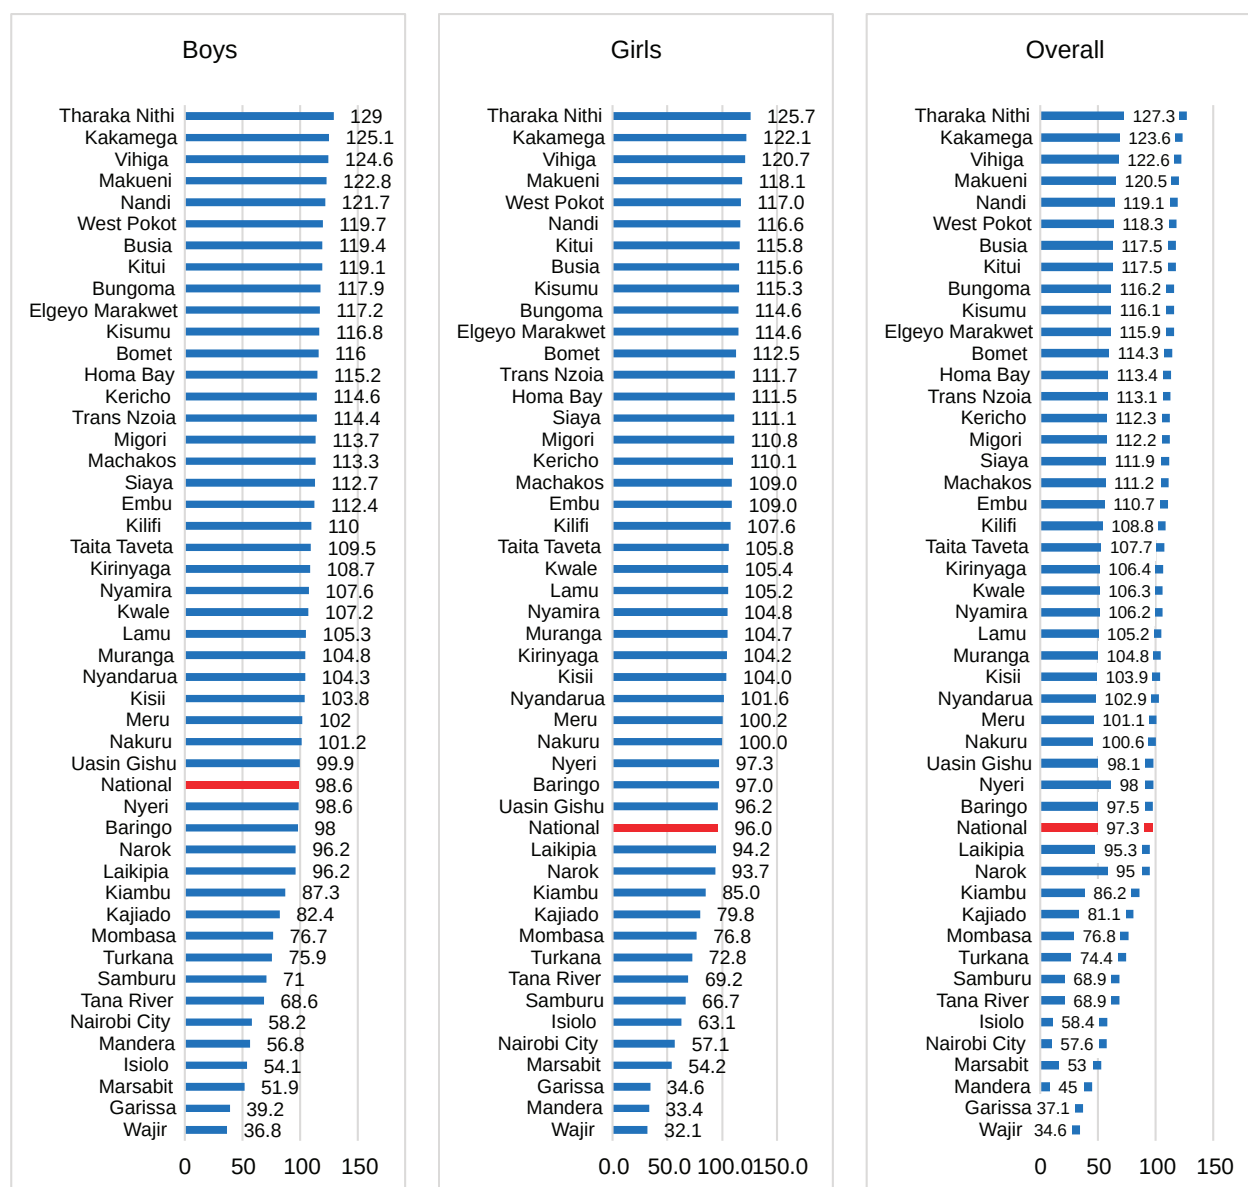

Figure 4. 6: Gross Enrolment Ratios and Primary Education Level, 2020

4.2.6.4 Net Enrolment Rate by County

Figure 4. 7 shows a map of the ranges for Net Enrolment Rate across the 47 counties. The NER ranged from 24.6 to 101.6, The ASAL counties in Kenya recorded lower NER, indicating that many children in these regions were yet to access primary education at the official primary school-going age.

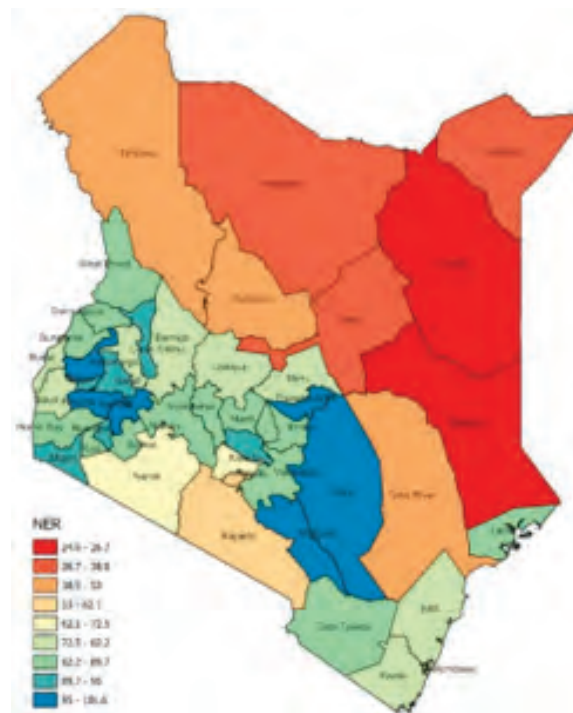

Figure 4. 7: Distribution of Net Enrolment Rate at Primary Education Level

Figure 4. 8 shows the Net Enrolment Rate for the 47 counties in Kenya. Among the counties with lower NER, boys seemed to have better access to education at the official primary school going age than girls, except for Isiolo, Marsabit and Tana River. In overall, 14 counties had NER below the national average, just like for boys, unlike the case for girls where 16 counties had NER below the national average. These counties have a higher proportion of their children not accessing primary education at the official age, or those who are out of school.

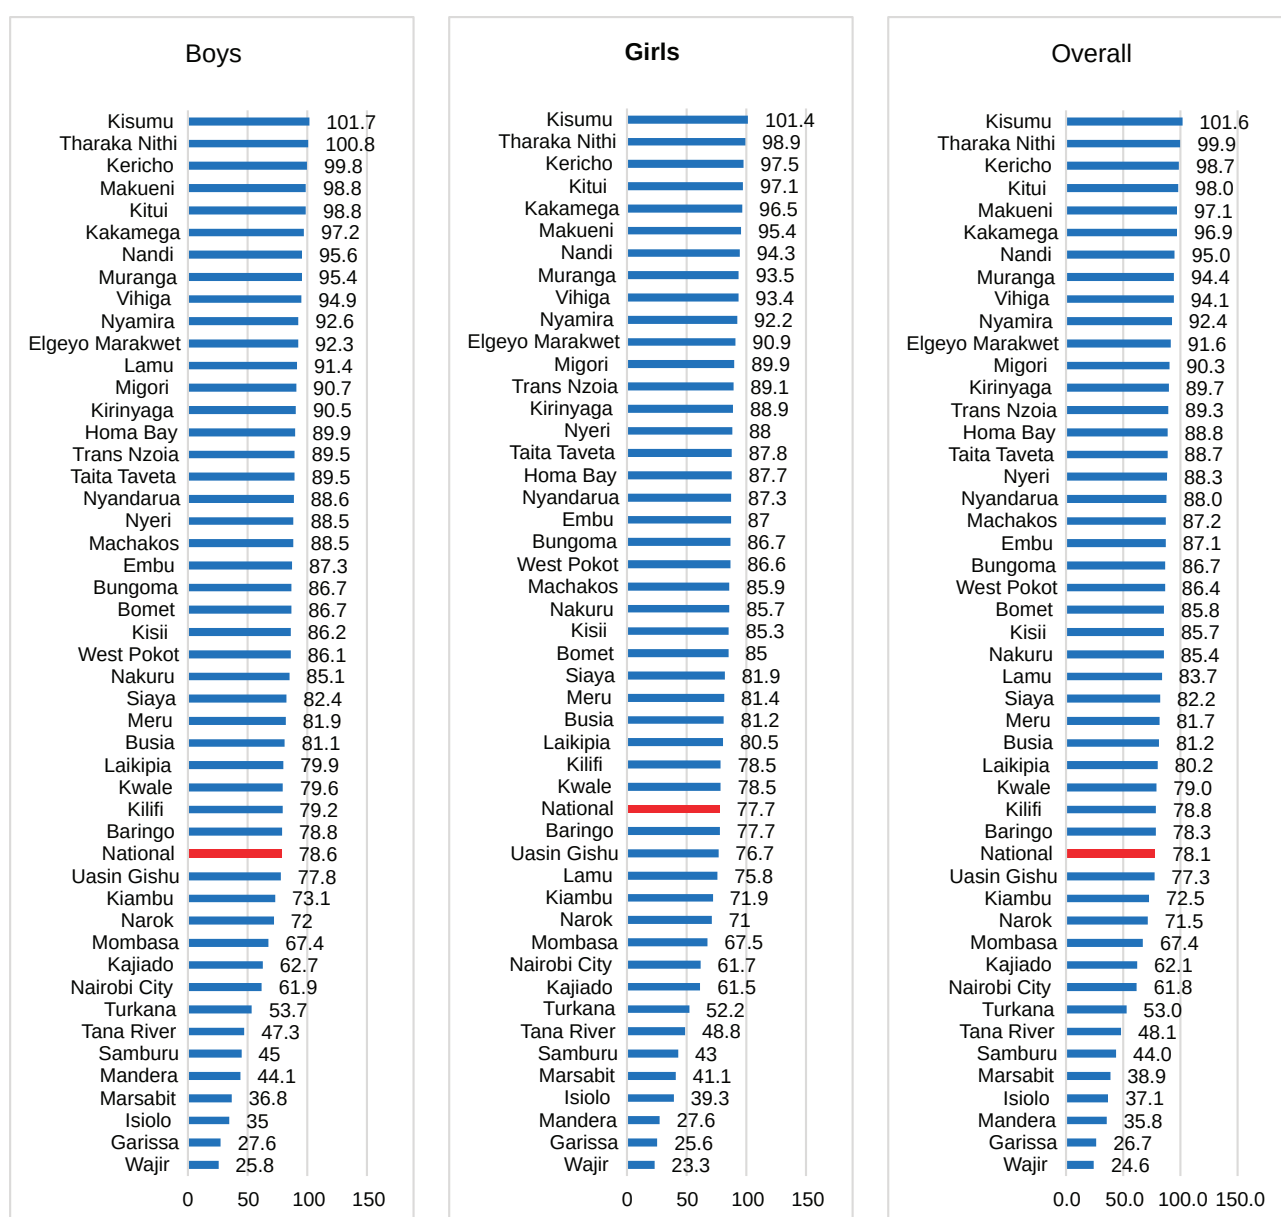

Figure 4. 8: Net Enrolment Rates at Primary Education Level, 2020

4.3. Quality and Relevance in Primary Education

Quality of primary education is determined by the availability, adequacy and use of relevant inputs. The inputs include infrastructure, teachers, instructional resources and a safe, as well as conducive environment. This section presents the status of enablers of quality primary education. These include teachers, classrooms, toilets, electricity, computers/digital devices, and internet connectivity.

4.3.1 Survival Rates in Primary Education

Schooling profiles provide comprehensive information on evolution of enrolments as opposed to cycle averages measured by Gross Enrolment Ratios. A schooling profile enables visualisation of access and completion rates in a given cycle. Through the schooling profile, one can tell the retention rate in a cycle. This helps in understanding how pupils/students are moving within the cycle.

Figure 4. 9 presents the retention rate between Standard 1 to Standard 6, and between Standard 1 and Standard 8, with repetitions and re-entry. The survival rate at Standard 6 was 92.9 % for boys

and 96.5 % for girls in the cohort that enrolled in Grade 1 of primary school in 2015. On the other hand, among the cohort that enrolled in Grade 1 in 2013, 79.7 % of the boys and 86.2 of the girls survived to the last Grade of primary education. The survival rate was high for Standard 6 as compared to Standard 8, the final Grade of primary education. This implies that efficiency of the education system was better up to Standard 6 but sharply declined in the last two Grades of primary education.

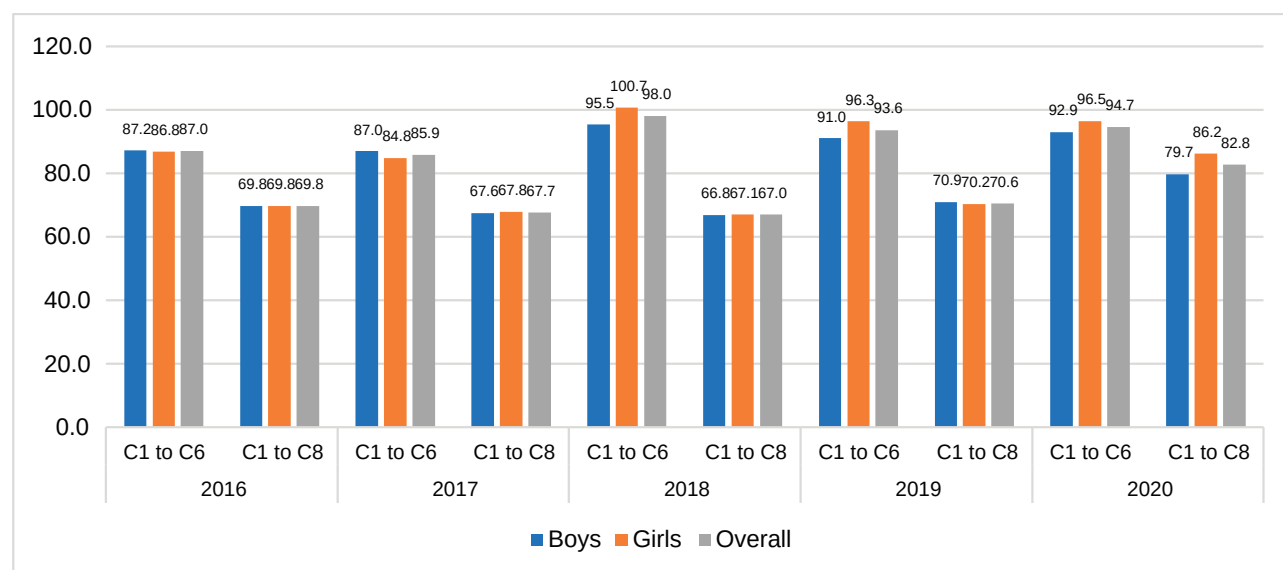

Figure 4. 9: Survival Rates at Grade 6 and Grade 8 of Primary Education Level, 2016-2020

4.3.2 Number of Teachers and Pupil-to-Teacher Ratio in Primary Education

4.3.2.1 Number of Teachers in Primary Schools

Teachers are a key resource in the provision of quality of education as they provide the link between the school environment and the home environment. Teachers are role models hence they are critical to the holistic development of the child. The availability and quality of the teaching service is therefore important in the achievement of the aforesaid. The Teachers Service Commission has continued to provide teachers in all public basic educational institutions except the Pre-primary sub-sector where trained, qualified and registered teachers are recruited and managed by County Governments.

Table 4. 13 shows the number of primary school teachers by gender and school category. As of 2020, the number of primary school teachers was 222,780 compared to 218,760 in 2019. The difference was accounted for by new recruitment during the year under review. The total number of teachers in private schools reduced to 61,786 from 68,772 in 2019. The number of teachers in public primary schools increased marginally by 1.8 percent, while the number of teachers in private primary schools decreased by 10.2 percent in 2020. In order to complement the number of teachers employed by TSC, Boards of Management in public primary schools hired 33,783 in 2020.

Table 4. 13: Number of Teachers in Primary Schools by Category and Sex, 2016-2020

Year	Sex	Public	Private
2016	Males	107,316	-
	Females	110,236	-
	Total	217,552	-
2017	Males	106,608	-
	Females	111,482	-
	Total	218,090	-
2018	Males	104,920	-
	Females	111,809	-
	Total	216,729	-
2019	Males	104,684	-
	Females	114,076	-
	Total	218,760	68,772
2020	Males	98,863	26,955
	Females	113,116	34,831
	Total	211,979	61,786

4.3.2.2 Primary School Teachers by Qualifications

Table 4. 14 shows the number of teachers by qualifications. In 2020, the majority of the teachers in public primary schools had certificate-level qualification, at 70.2 percent of the teachers. There were also teachers with additional qualifications serving in public primary schools, with 17.2 percent and 11.7 percent holding diploma and bachelor's qualifications, respectively. Teachers with master's and PhD qualifications represented one percent of teachers in public primary schools.

Table 4. 14: Public Primary School Teachers by Qualification and Sex, 2018 – 2020

Qualification	Gender	2018	2019	2020
PhD	Male	1	1	33
	Female	4	4	26

Source: Teachers Service Commission

4.3.2.3 Pupil-Teacher Ratio in Primary Schools

Pupil Teacher Ratio (PTR) is a major indicator of quality education. A lower PTR indicates that there is increased contact between individual learner and the teacher hence improved quality of education. Conversely very high PTR implies that a teacher has limited contact with individual learners. Table 4. 15 shows the Pupil-Teacher Ratio in primary schools. The Pupil Teacher Ratio (PTR) for public primary schools was 41:1 in 2020. In the private schools category, the ratio was 23:1. Despite the

optimal PTR at the primary education level, the Teachers Service Commission uses staffing norms to distribute teachers in public primary schools. The norm provides for placement of one teacher per classroom plus additional teachers based on 2.5 percent of the total number of classrooms in a school, regardless of the enrolment in the class.

Table 4. 15: Pupil-Teacher Ratio at Primary Education Level, 2020

Category	Enrolment	No. of Teachers	Pupil-Teacher Ratio
Public	8,635,605	211,979	41
Private	1,441,223	61,786	23
Total	10,076,828	273,765	37

Figure 4. 10 shows PTR by county for public and private primary schools. There are counties that had very high pupil-teacher ratios in 2020. For instance, in public primary schools, Mandera had a PTR of 126 followed by Turkana with 88, Garissa at 81, Wajir at 80 and Nairobi City at 61.

Twenty-two counties had PTRs higher than the national average in public primary schools. On the other hand, private schools had better pupil-teacher ratios, with only 7 counties having PTR above the recommended ratio of 40:1.

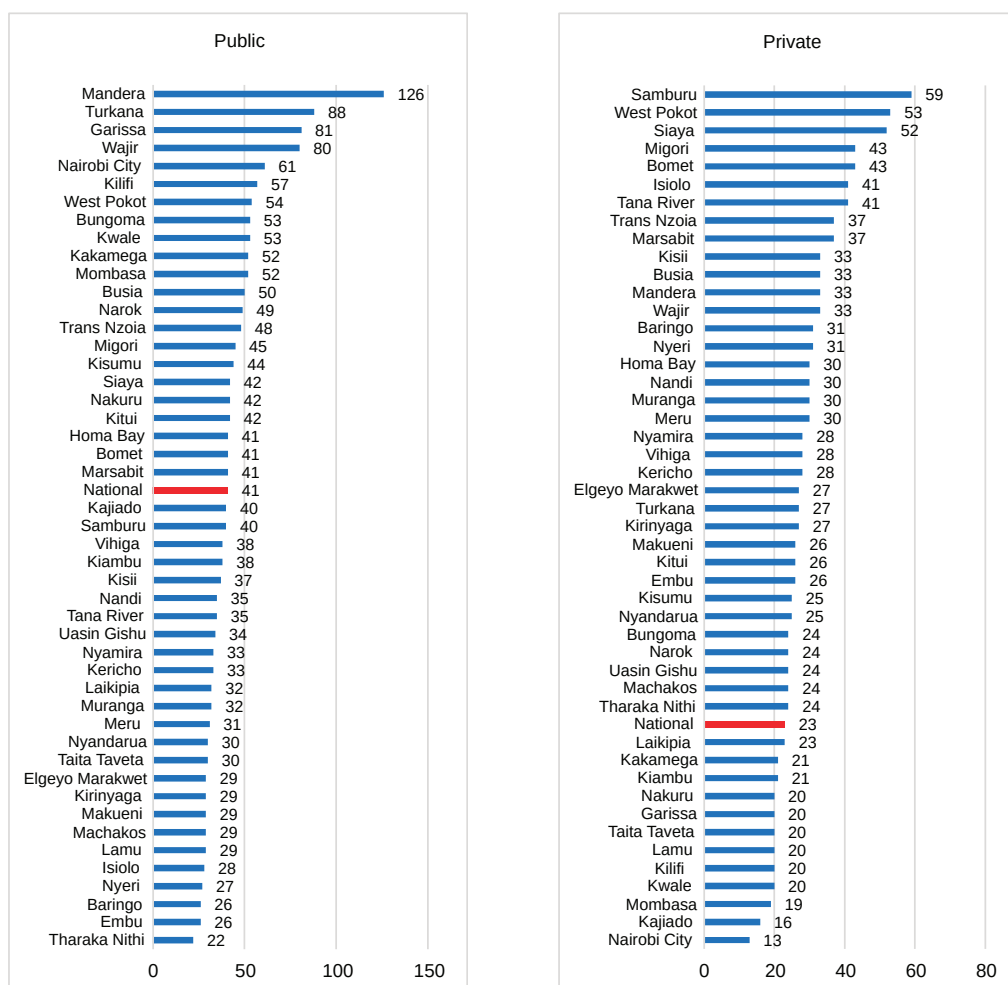

Figure 4. 10: Pupil-to-Teacher Ratios at Primary Education Level, 2020

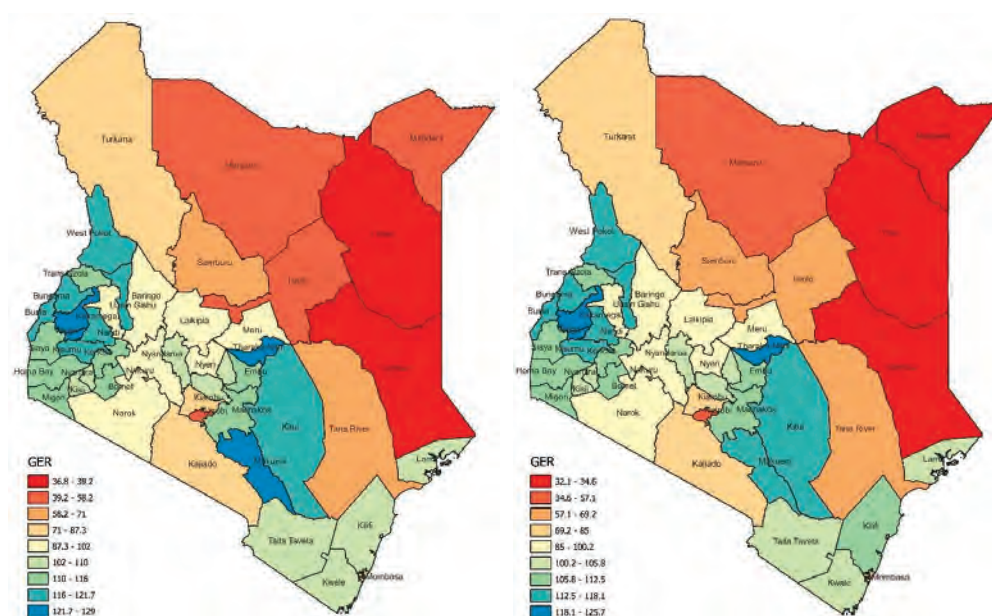

Figure 4. 11: Distribution of Pupil-Teacher Ratios in Public and Private Primary Schools, 2020

4.3.2.4 Capacity Building of Teachers on Competency Based Curriculum

Table 4. 16 shows number of teachers trained on CBC between 2019 and 2020. In 2020, a total of 131,275 teachers were trained on various aspects of CBC as compared to 138,733 in 2019. The slight drop was due to effects of covid where face to face training could not be undertaken. It is important to note that the training also targeted private school teachers.

Table 4. 16: Capacity Building for Implementation of CBC

Category of Officers/Teachers	2019	2020
Curriculum Support Officers (CSOs)	1,163	1,012
Curriculum Support Officers for SNE	354	388
CBC Champions	1,163	2,431
CBC Champions (SNE)		341
Public Primary School Headteachers (Regular)	22,101	22,638
Private Primary School Headteachers		2,899
Primary School Headteachers (SNE)	729	1,032
Primary school teachers (Public)	90,806	44,867
Primary school teachers (Private)	22,417	6,918
Primary school teachers (SNE)		3,561
CBC Mathematics Champions		1,582
CBC Mathematics Teachers		43,644
Total	138,733	131,313

Source: Teachers Service Commission

4.3.3 Number of Classrooms and Learner-to-Classroom Ratios

Table 4. 17 presents the number of classrooms and total enrolment in primary schools in 2020. The total number of classrooms was 307,859 for both public and private primary schools. On average,

there were 33 learners per class at primary level of education. Public primary schools had a ratio of 37 learners per classroom, while in private primary schools, the ratio was 20 learners per classroom.

Table 4. 17: Pupil-to-Classroom Ratios at Primary Education Level, 2020

Category	Classrooms			Enrolment	Pupil-to- Classroom Ratio
	Permanent	Temporary	Total		
Public	202,786	31,385	234,171	8,635,605	37
Private	54,774	19,097	73,871	1,441,223	20
Total	257,538	50,321	307,859	10,076,828	33

Figure 4. 12 shows the average learner-to-classroom ratio by county in primary schools. The learner-to-classroom ratio ranged from 20 to 55 learners per classroom in public primary schools, and between 12 and 59 in private schools. Counties that had higher classroom ratios were Nairobi City, Turkana, Bungoma, Trans Nzoia and Mombasa, with 55, 53, 52, 52 and 52 learners per classroom respectively, in public primary schools. On the other hand, counties that had higher classroom ratios in private schools were Samburu, Tana River, West Pokot, Migori and Marsabit, with 59, 40, 43, 35 and 34 learners per classroom respectively.

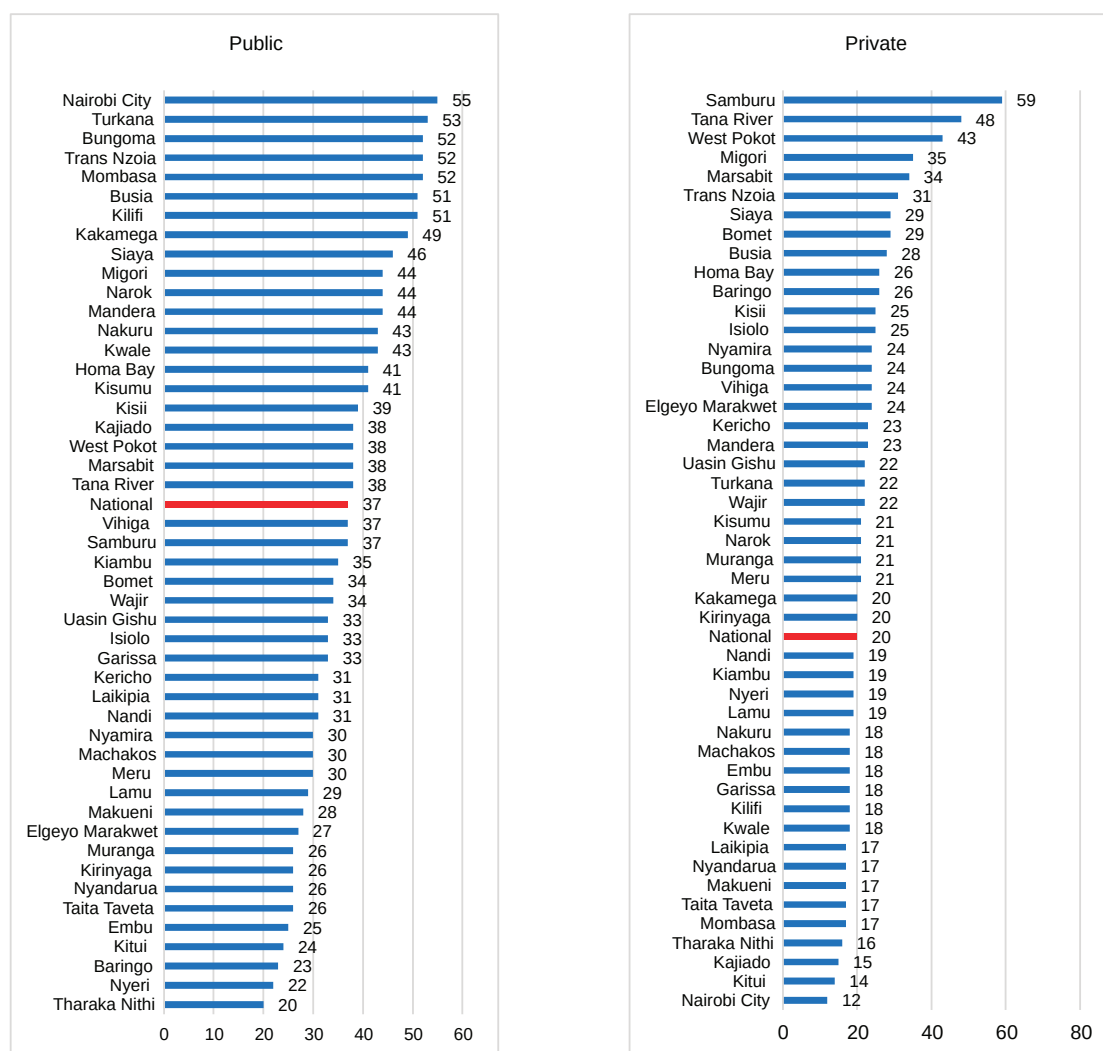

Figure 4. 12: Pupil-to-Classroom Ratios at Primary Education Level, 2020

4.3.4 Learner-Toilet Ratios at Primary Education Level

Water, Sanitation and Hygiene (WASH) facilities play a critical role on the quality of education. WASH facilities also influence school attendance and minimise risks of children dropping out of school. The recommended learner-to-toilet ratio at primary school level was one toilet for 25 girls, and one toilet for 30 boys and urinal facility. The data on toilets reported in this booklet included pit latrines and aggregated the count of the number of doors or holes in a toilet block.

Table 4. 18 presents the average pupil-to-toilet ratio at primary level of education. In overall, the pupil-to-toilet ratio was 31 for boys and 27 for girls. In public primary schools, there was a toilet for 33 boys and a toilet for 30 girls on average. Private primary schools met the recommended pupil-to-toilet ratios for both boys and girls.

Table 4. 18: Pupil-to-Toilet Ratios at Primary Education Level

Category	Enrolment		Toilets		Pupil-to-Toilet Ratio	
	Boys	Girls	Boys	Girls	Boys	Girls
Public	4,414,208	4,221,397	132,682	141,717	33	30
Private	728,567	712,656	35,764	40,083	20	18
Total	5,142,775	4,934,053	168,446	181,800	31	27

Figure 4. 13 shows the pupil-to-toilet ratios in public primary schools by county. On average, 22 and 21 counties met the recommended pupil-to-toilet ratios for boys and girls respectively. Among the counties with lower pupils-to-toilet ratios in public primary schools were Mandera, Turkana, Wajir, Mombasa, Migori Garissa, Kilifi, West Pokot and Busia.

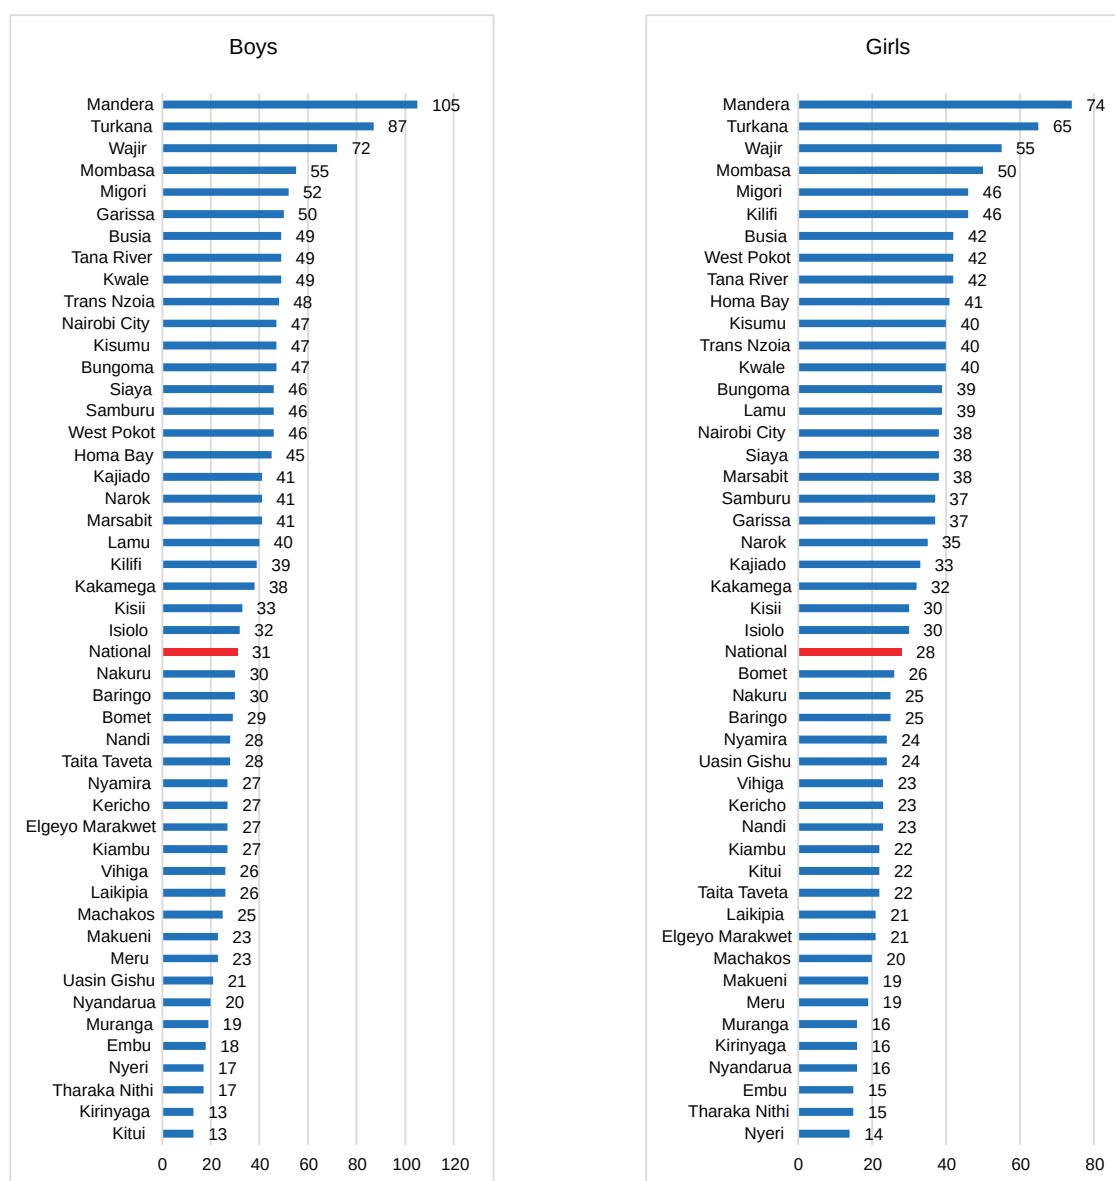

Figure 4. 13: Pupil-to-Toilet Ratios in Public Primary Schools, 2020

Figure 4. 14 shows the pupil-to-toilet ratio in private primary schools. For boys, only Mandera, Wajir, Garissa and Turkana had not met the recommended pupil-to-toilet ratio in private primary schools. Similarly, Mandera, Wajir, Garissa and Turkana were the only counties that had not achieved the recommended pupil-to-toilet ratio for girls in private primary schools.

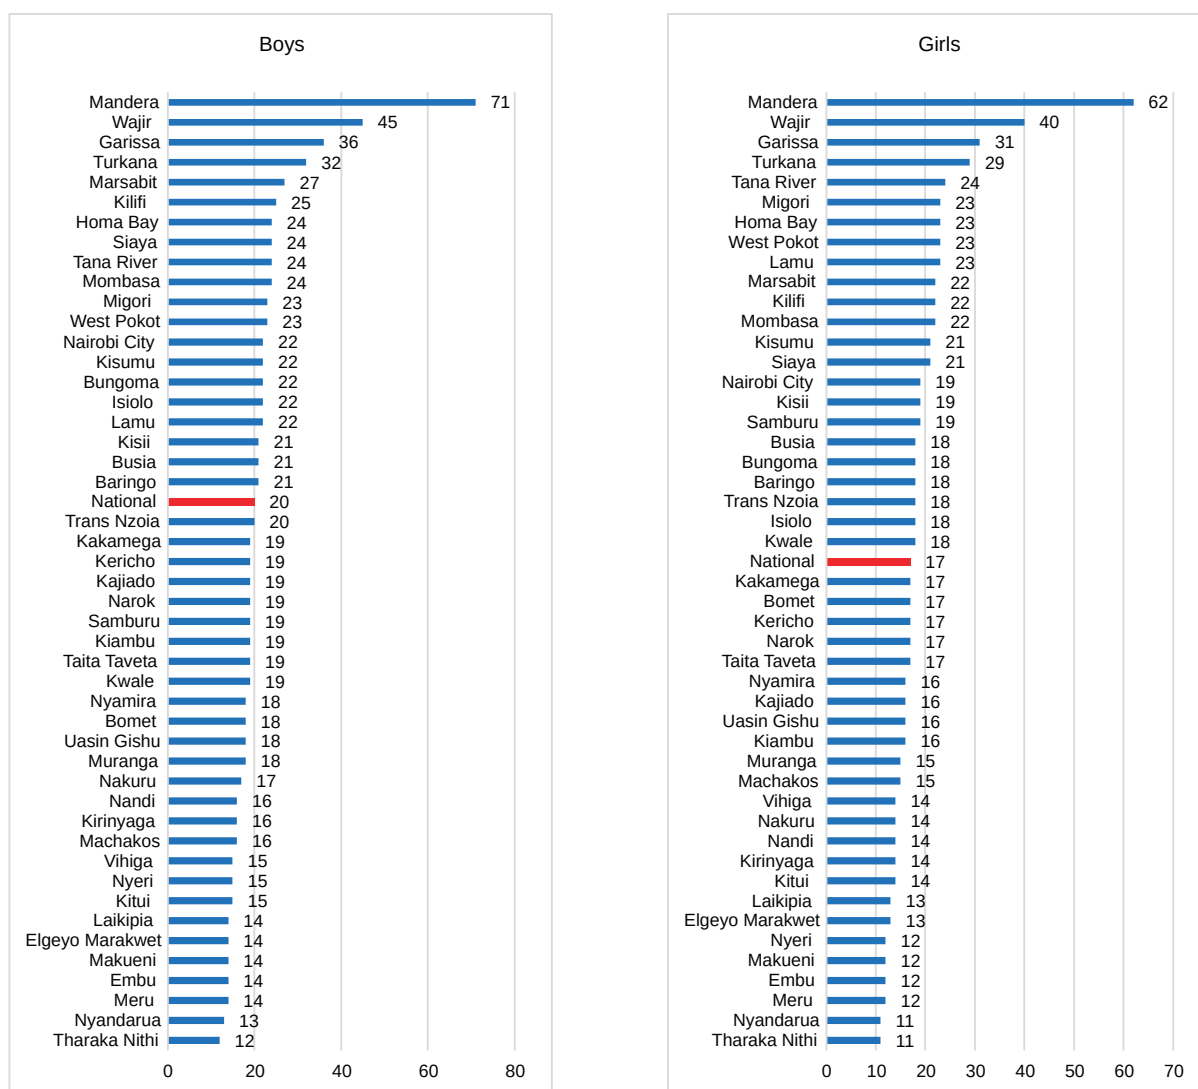

Figure 4. 14: Pupil-to-Toilet Ratios in Private Primary Schools, 2020

4.3.5 Access to Electricity in Primary Schools

Figure 4. 15 shows the proportion of public primary schools with access to electricity According to the Ministry of Energy, almost all public primary schools, 97 percent of the 23,368 schools, were connected to electricity., with 81 % connected to the national grid and 14 % connected to solar. There were additional 82 public primary schools in 2020, therefore showing that more schools were connected to the national grid despite the proportion of schools remaining at 81 %. Nevertheless, there were challenges in regard to failed transformers and accrued power bills leading to disconnection from the grid in some of the schools.

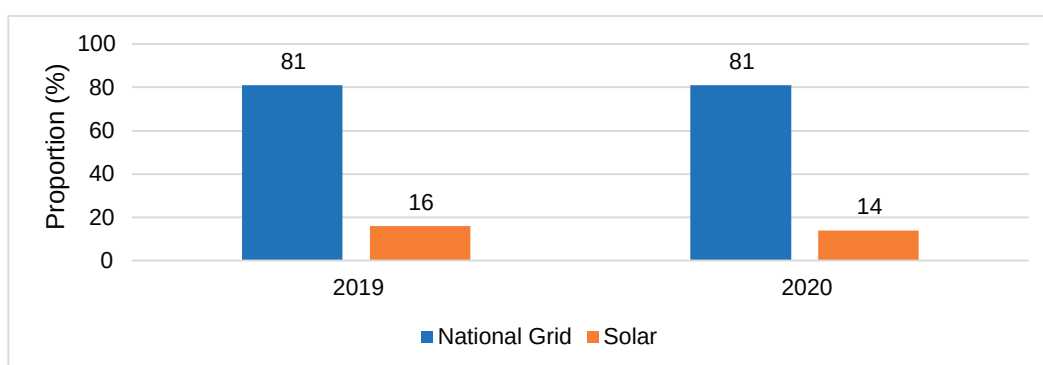

Figure 4. 15: Proportion of Public Primary Schools Connected to Electricity by Source, 2019-2020

4.3.6 Basic ICT Infrastructure in Primary Schools

Under the Government flagship programme of provision of laptops to learners, the number of primary schools installed with a complete set of digital devices as of 2020 under MoE-ICTA initiative to promote ICT in teaching and learning. The set includes Learner Digital Devices (LDD), Teacher Digital Devices (TDD), the Computer Access Point (CAP) router for internet connectivity, and a projector to each school. The digital devices supplied included digital content servers and wireless routers for digital content distribution, and Internet connection at primary schools.

Table 4. 19 shows the number of computers/ tablets in primary schools and the proportion of schools with functional internet connectivity. There was a total of 876,476 computers/ tablets for educational use in primary schools, with public schools account for 95 % of the devices. This may be attributed to the provision of Digital Literacy Programme (DLP) gadgets to public primary schools by the government as envisioned in the Kenya Vision-2030 flagship project. On internet connectivity, 19.7 percent of public primary schools had functional internet as compared to 43.2 % of private schools with functional internet connectivity.

Table 4. 19: Computers Learners Ratio-Public vs Private

Category	Computers/Tablets	Internet§
Public	835,981	19.7
Private	40,515	43.2
All	876,496	25.7

§ Proportion of primary schools with functional internet

5. STATUS OF SECONDARY EDUCATION

5.1. Introduction

This chapter presents the status of secondary education and describes key indicators on access, equity and inclusion, and quality and relevance. Access and equity are measured by the number of secondary schools; average school sizes; enrolments and enrolment rates; gender parity index and regional performance across the indicators on access. On the other hand, quality and relevance is measured through educational inputs such as financing, curricula and curricula support materials, infrastructure, equipment, human resource and learning outcomes. Retention/ survival, completion, and transition rates are also indicators of quality of education.

5.2. Access, Equity and Inclusion in Secondary Education

5.2.1 Number of Secondary Schools

Table 5. 1 shows the number of secondary schools. As of 2020, there were 10,390 secondary schools. This was a decrease of about one percent from the 10,487 schools in 2019. The number of public secondary schools increased by 1.9 percent, from 8,933 to 9100 over the same period, while private secondary schools decreased by 17 percent. Public secondary schools accounted for 87.6 percent of schools.

Table 5. 1: Number of secondary schools, 2017-2020

Category	2017	2018	2019	2020
Public	7,543	8,791	8,933	9,100
Private	1,415	1,479	1,554	1,290
Total	8,958	10,270	10,487	10,390

5.2.2 Enrolment in Public and Private Secondary Schools

5.2.2.1 Enrolment by Category of Secondary Schools

Table 5. 2 shows enrolments in public and private secondary schools. As of 2020, a total of 3,569,279 students were enrolled in secondary schools. This represents an increase of 9.4 percent from the enrolment of 2019. Enrolment in public secondary schools has continued to increase over the years. However, there was a sharp decline in the enrolment in private secondary schools in 2020, representing a 23.4 percentage decrease from the enrolment in 2019. Furthermore, the share of enrolment in private secondary schools declined to 4.7 percent in 2020 as compared to 6.7 in 2019.

Table 5. 2: Enrolment in Public and Private Secondary Schools, 2018 - 2020

Category	2017	2018	2019	2020
Public	2,581,609	2,810,655	3,045,227	3,402,596
Private	201,135	202,760	217,724	166,683
Total	2,782,744	3,013,415	3,262,951	3,569,279

5.2.2.2 Enrolment in Secondary Education by Class and Category

Table 5. 3 shows the enrolment by class, and sex, for the year 2020. The population of students was higher in Form 1 and progressively reduced in the subsequent classes in public secondary schools. On the contrary, there were more learners enrolled in Form 4, with gradual decrease in the population of learners in preceding classes in private secondary schools.

Table 5.3: Enrolment by Class, and Category of Secondary Schools,

Class	Public			Private			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Form 1	470,371	477,614	947,985	16,975	22,698	39,673	487,346	500,312	987,658
Form 2	444,311	448,248	892,559	17,432	23,006	40,438	461,743	471,254	932,997
Form 3	416,634	417,307	833,941	18,785	22,793	41,578	435,419	440,100	875,519
Form 4	369,733	358,378	728,111	21,103	23,891	44,994	390,836	382,269	773,105
Total	1,701,049	1,701,547	3,402,596	74,295	92,388	166,683	1,775,344	1,793,935	3,569,279

5.2.3 Average School Size in Secondary Education

School size is an important factor in determining resource requirements and allocation. Schools with higher enrolment enjoy economies of scale in operations, while those with lower enrolment stretch their operational resources. *Table 5.4* shows the average school size in both public and private secondary schools. The average school size increased from 311 learners per secondary school in 2019 to 344 learners in 2020. In public secondary schools, the school size increased from 341 in 2019 to 374 students per school in 2020. However, there was a reduction in the average school size in private schools, from 141 in 2019 to 130 in 2020, partly due to reduced enrolment in private schools.

Table 5.4: Average School Size in Secondary Schools

Category	Indicator	2017	2018	2019	2020
Public	Enrolment	2,581,609	2,810,655	3,045,227	3,402,596
	No. of Institutions	7,543	8,791	8,933	9,100
	Avg. School Size	342	320	341	374
Private	Enrolment	201,135	202,760	217,724	166,683
	No. of Institutions	1,415	1,479	1,554	1,290
	Avg. School Size	142	137	141	130
Total	Enrolment	2,782,744	3,013,415	3,262,951	3,569,279
	No. of Institutions	8,958	10,270	10,487	10,390
	Avg. School Size	311	293	311	344

5.2.4 Enrolment of Learners with Special Needs in Secondary Education

Table 5.5 presents the number of public secondary schools, and their respective SNE learners' enrolments for the period 2017 to 2020. In 2020, the number of public secondary schools with SNE learners increased from 114 to 4,355, as a result of the use of the NEMIS platform in secondary schools' data capture. The total enrolment of learners with special needs increased to 11,088 in 2020 from the previous 4,794 reported in 2019. The increase was attributed to expanded scope of reporting, to include learners not enumerated in capitation data.

Table 5. 5: Public Secondary Schools and SNE Enrolments from 2017 to 2020

Year	2017	2018	2019	2020
Schools	106	109	114	4,355
Enrolment	4,019	4,935	4,794	11,088

shows the SNE enrolment by class and school category. There were 10,796 of these SNE learners enrolled in public secondary schools, comprising 4,801 boys and 4,278 girls. Public institutions account for over 97 percent of learners with special needs enrolled in secondary schools.

Table 5. 6: Enrolment of Learners with Special Needs in Secondary Schools

Class		Public	Private	Total
Form 1	Boys	1443	42	1485
	Girls	1334	42	1376
	Total	2777	84	2861
Form 2	Boys	1158	27	1185
	Girls	1109	28	1137
	Total	2267	55	2322
Form 3	Boys	1018	30	1048
	Girls	997	33	1030
	Total	2015	63	2078
Form 4	Boys	1182	29	1211
	Girls	838	35	873
	Total	2020	64	2084
Total	Boys	4801	128	4929
	Girls	4278	138	4416
	Total	10796	292	11088

It is important to note that whereas learners with various categories of disabilities are enrolled at primary school level, those who transition to secondary education are mainly those with hearing, physical and visual impairments. Learners with intellectual and multiple disabilities rarely transition to secondary education.

5.2.5 Access and Participation Rates in Secondary Education

5.2.5.1 Gross Ratios at Secondary Education Level

Table 5. 7 shows the evolution of Gross Enrolment Ratios (GER) at the secondary level of education. Nationally, the Gross Enrolment Ratio improved by 7.4 % to was 76.5 in 2020 from 71.2 in 2019. The average GER for boys was higher than that for girls, at 78.6 and 74.5 respectively.

Table 5. 7: Gross Enrolment Ratio at Secondary Education Level, 2016-2020

Sex	2016	2017	2018	2019	2020
Boys				69.9	74.5
Girls				72.6	78.6
Overall	66.8	68.5	70.3	71.2	76.5

Source: KNBS, MoE (2020)

5.2.5.2 Net Enrolment Rate at Secondary Education Level

Table 5. 8 shows the Net Enrolment Rates (NER) at the secondary level of education. Nationally, the Net Enrolment Rate was 54.1, implying that about 46 % of children aged 14-17 may not be accessing

secondary education at the recommended official age. Some of the children may be out of school. Girls had a favourable NER of 57.2, compared to that of boys that stood at 51.2 in 2020.

Table 5. 8: Net Enrolment Rate at Secondary Education Level, 2016-2020

Sex	2016	2017	2018	2019	2020
Boys	-	-	-	-	51.2
Girls	-	-	-	-	57.2
Overall	49.5	51.1	53.3	-	54.1

Source: KNBS, MoE (2020)

5.2.6 Equity in Secondary Education

5.2.6.1 Average School Size at Secondary Education Level

Figure 5. 1 shows the average secondary school sizes, by county, as of 2020. This is for both public and private schools. Counties with the highest average school size in public secondary schools were Nairobi, Turkana, Mombasa, Kilifi, Vihiga and Tharaka Nithi. In private secondary schools, Turkana, Elgeyo Marakwet, Isiolo, West Pokot and Tharaka Nithi had the highest school sizes.

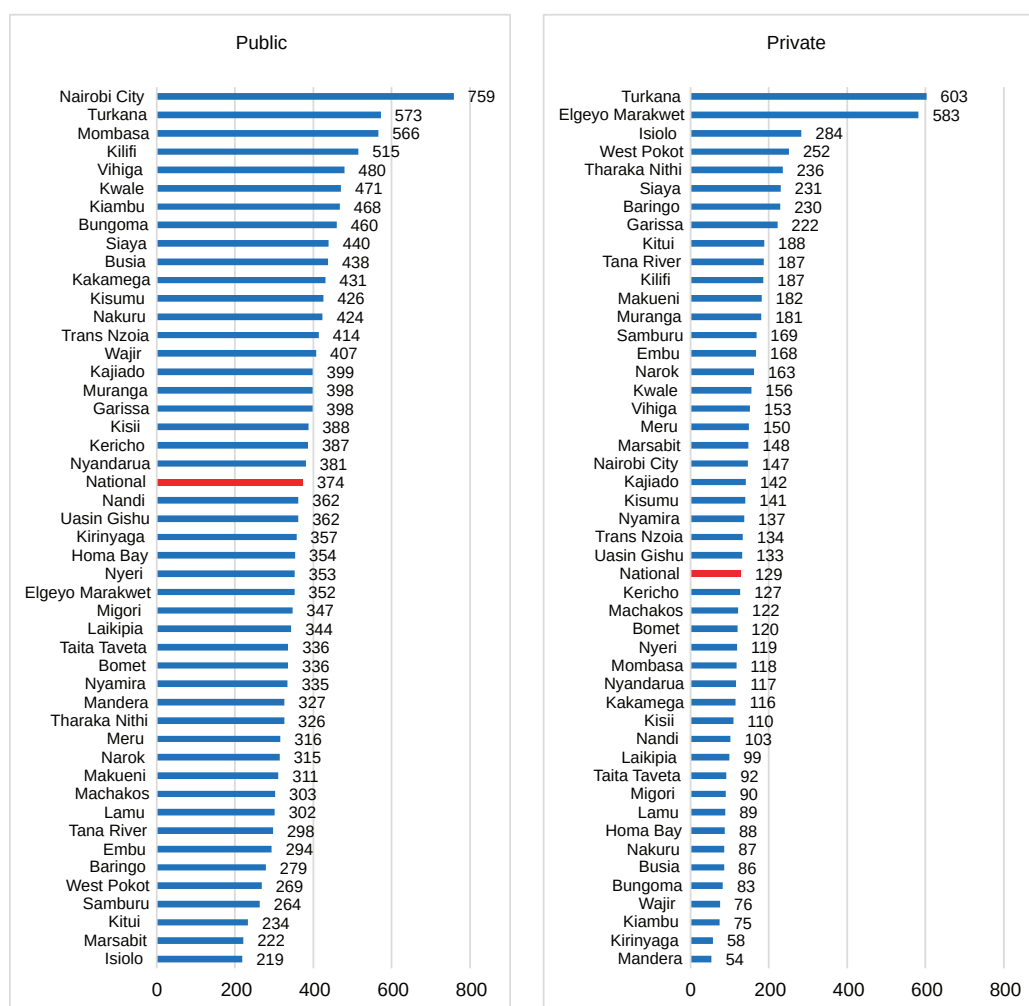

Figure 5. 1: Average School Size at Secondary Level of Education, by County, 2020

5.2.6.2 Gender Parity Index at Secondary Education Level

5.2.6.2.1 Overall Gender Parity Index at Secondary Education Level

Table 5. 9 shows gender parity index at secondary level of education in 2019 and 2020. At national level, there was gender parity in access to secondary education.

Table 5. 9: Gender Parity Index at Secondary Education Level, 2019-2020

2019			2020		
Boys	Girls	GPI	Boys	Girls	GPI
1,627,485	1,635,466	1.00	1,775,344	1,793,935	1.01

5.2.6.2.1 Gender Parity Index at Secondary Education Level by Class

Table 5. 10 shows the enrolment by class, and sex, for the year 2020. It also shows the gender parity index for the same year. The enrolment data shows that gender parity was achieved at the secondary level of education, with an overall GPI of 0.97. Furthermore, gender parity by class was within the allowable range of between 0.97 to 1.03. However, there were slightly more girls than boys enrolled in all the classes, except Form 4.

Table 5. 10: Enrolment Secondary by Class, and Gender Parity Index, 2020

Class	Boys	Girls	GPI
Form 1	487,346	500,312	1.03
Form 2	461,743	471,254	1.02
Form 3	435,419	440,100	1.01
Form 4	390,836	382,269	0.98
Total	1,775,344	1,793,935	1.01

5.2.6.2.1 Gender Parity Index at Secondary Education Level by County

Figure 5. 2 presents the distribution of GPI ranges across the counties. The parity index was worse in Mandera and Wajir, followed by Garissa and Turkana counties. Narok and Samburu were also in the same range of gender parity index. Kilifi, Lamu, Tana River, West Pokot and Homa Bay were also among the counties that were yet to achieve gender parity at secondary level of education.

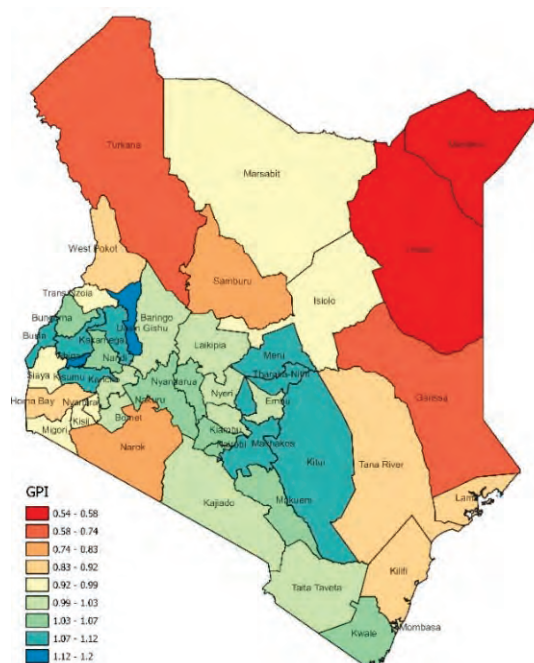

Figure 5. 2: Distribution of Gender Parity Index at Secondary Education Level, 2020

Figure 5. 3 shows Gender Parity Indices by county, as of 2020. It shows that 16 counties had achieved gender parity at the secondary education level. It further shows that there was gender disparity in favour of girls in 18 counties, including Vihiga (1.2), Elgeyo Marakwet (1.12), Machakos (1.11), Meru (1.11) and Kisumu (1.1). On the other hand, gender parity was yet to be achieved in 13 counties, where the disparity was in favour of boys. These include, among others, Mandera (0.54), Wajir (0.58), Turkana (0.62) Garissa (0.68), and Samburu (0.74).

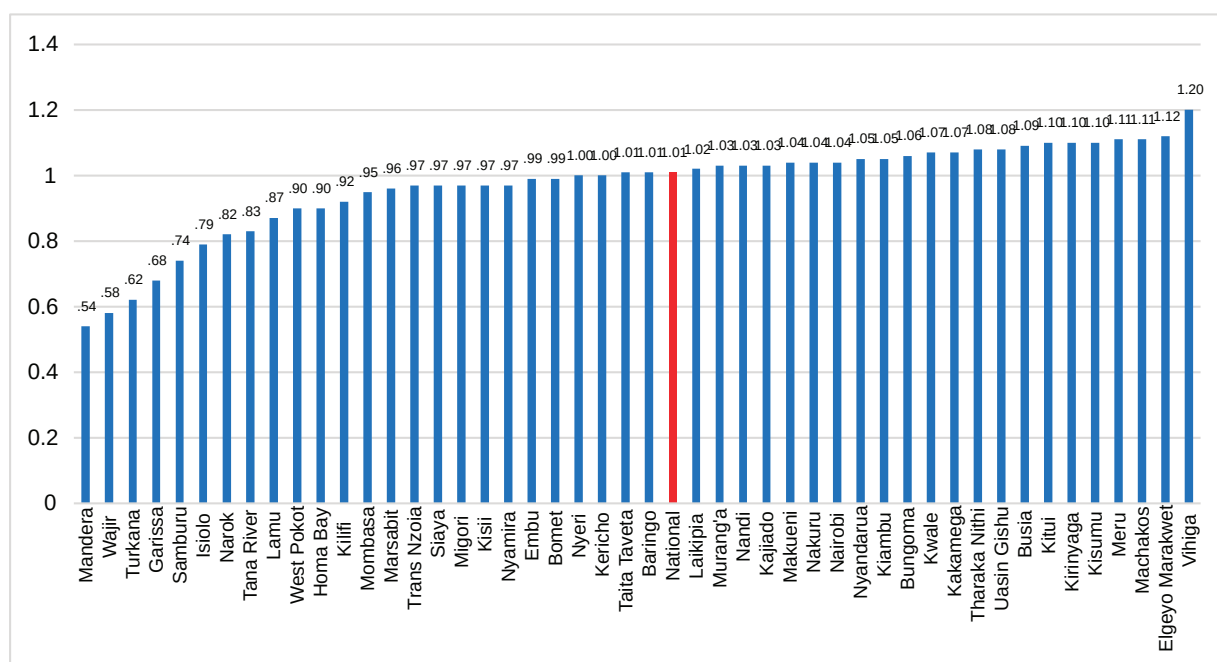

Figure 5. 3: Gender Parity Index at Secondary Level of Education, by County, 2020

5.2.6.3 Gross Enrolment Ratio at Secondary Education Level by County

Figure 5. 4 shows a map distribution of GER by county as at 2020. The map shows that ASAL counties had lower participation rates at secondary education, based on the Gross Enrolment Ratio. It is worth noting that secondary school students access education in boarding county, extra-county and national secondary schools across the country and therefore, the aspect of learners attending school outside their home counties should be taken into account when interpreting the county-level NER.

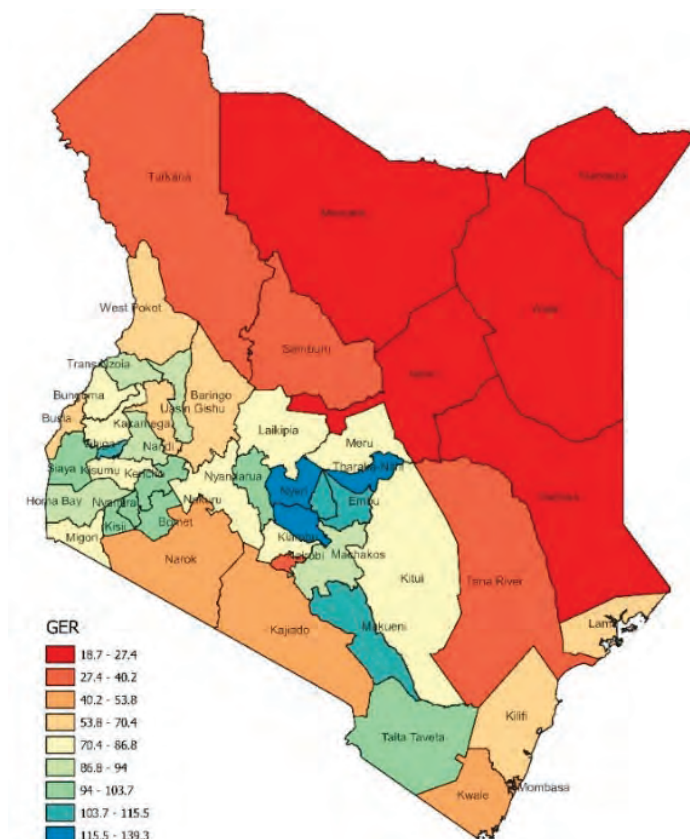

Figure 5. 4: Distribution of Gross Enrolment Ratio at Secondary Education Level, 2020

Figure 5. 5 shows the Gross Enrolment Ratio in 2020, by county. The overall GER was higher in Murang'a, Tharaka Nithi, Nyeri, Vihiga, Makeni and Kirinyaga, while Mandera, Marsabit, Garissa, Wajir, Isiolo and Turkana were counties which had the lowest GER at secondary education level. The Gross Enrolment Ratio for Girls was higher than that of boys among the counties that recorded higher GER in 2020

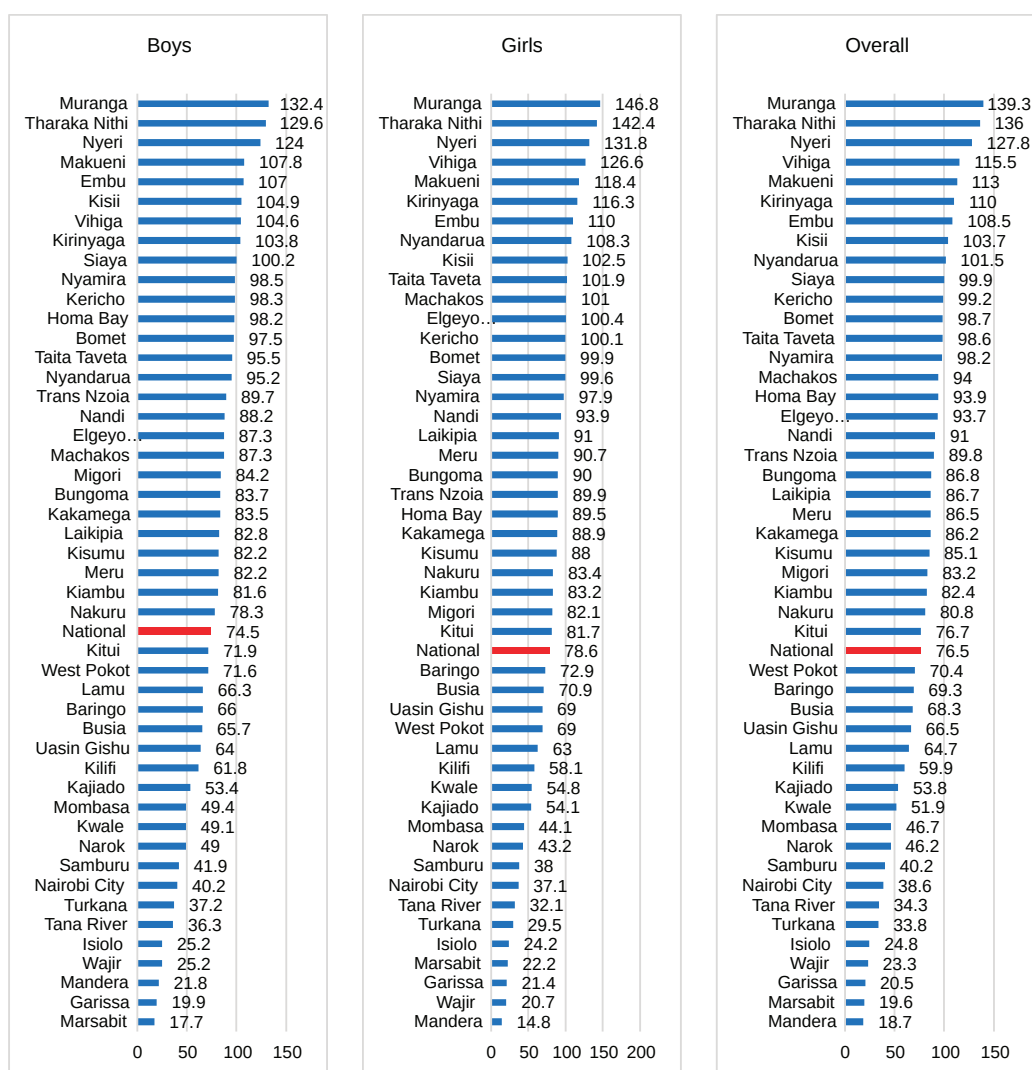

Figure 5. 5: Gross Enrolment Ratios at Secondary Education Level, 2020

5.2.6.4 Net Enrolment Rate at Secondary Education Level by County

Figure 5. 6 shows the Net Enrolment Rates in 2020 by county. Overall, counties with higher NER were Murang'a, Tharaka Nithi, Nyeri, Kisii, Makueni and Kirinyaga. On the other hand, ASAL counties of Garissa, Mandera, Marsabit, Wajir, Turkana and Isiolo had lower NER. Murang'a and Tharaka Nithi had NER for girls exceeding 100 percent, which might be due to more girls from neighbouring counties accessing education in the counties.

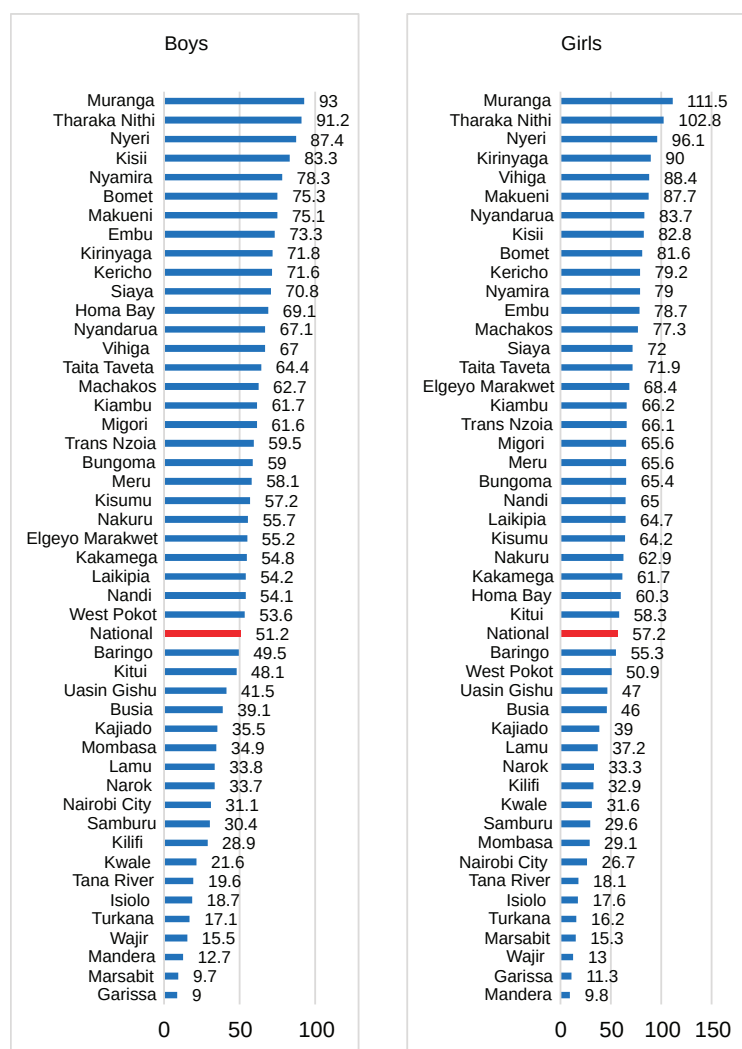

Figure 5. 6: Net Enrolment Ratios at Secondary Education Level, 2020

Figure 5. 7 shows distribution of NER across the counties. The NER was lower in ASAL counties in Kenya. However, the methodology of conducting population census and collection of enrolment data in schools, without considering the county of residence, may mask the true NER. In addition, many students were enrolled in boarding schools in counties across the country, and not necessarily in schools in their counties of residence.

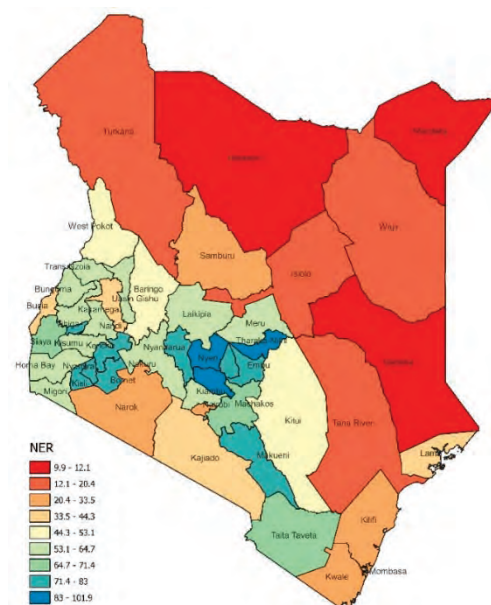

Figure 5. 7: Distribution of NER by county, as at 2020

5.3. Quality and Relevance in Secondary Education

There are several indicators, under quality and relevance, including student to teacher ratio, student to classroom ratio, sanitation, and availability of digital devices for pedagogical use. Students' survival rate, completion and transition are also indicators on quality of education.

5.3.1 Primary to Secondary Education Transition Rates

Figure 5. 8 presents the transition rates from primary to secondary education for the period 2016 to 2020. The overall transition rate was 87.1, an increase of 3.7 % from 85.5 in 2019. The transition rates for boys and girls were nearly equal in 2020.

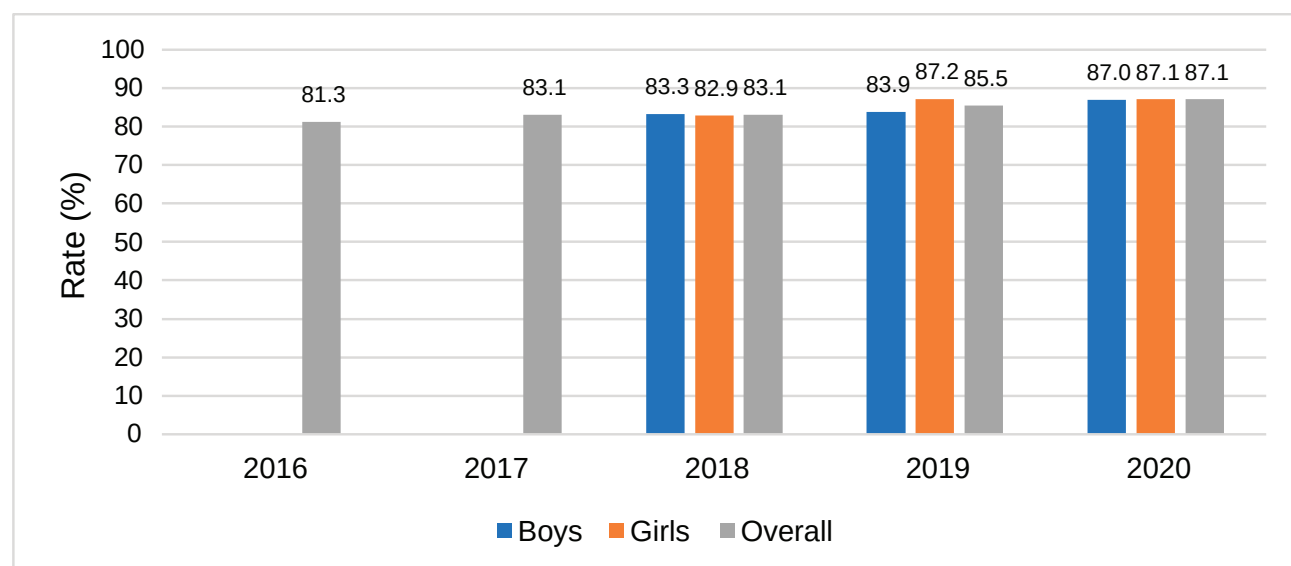

Figure 5. 8: Primary-to-Secondary Transition Rates, 2016-2020

Figure 5. 9 shows the primary-to-secondary education transitions rates by county. The transition rates were higher in the counties of Nyeri, Kirinyaga, Murang'a, Nyandarua, Nyamira, Kiambu, Makeni, Nairobi and Kisii, which had over 90 percent of boys transiting from primary to

secondary. However, lower transition rates for boys were recorded in Isiolo, Samburu, Kwale, Marsabit, Kitui, and Narok counties. Similarly, Nyeri, Murang'a, Kirinyaga, Nyandarua, Nyamira, Kiambu, Makueni and Kisii counties had better transition rates for girls. Isiolo, Marsabit, Turkana, Kwale and Narok had a lower proportion of girls transiting from primary to secondary in 2020.

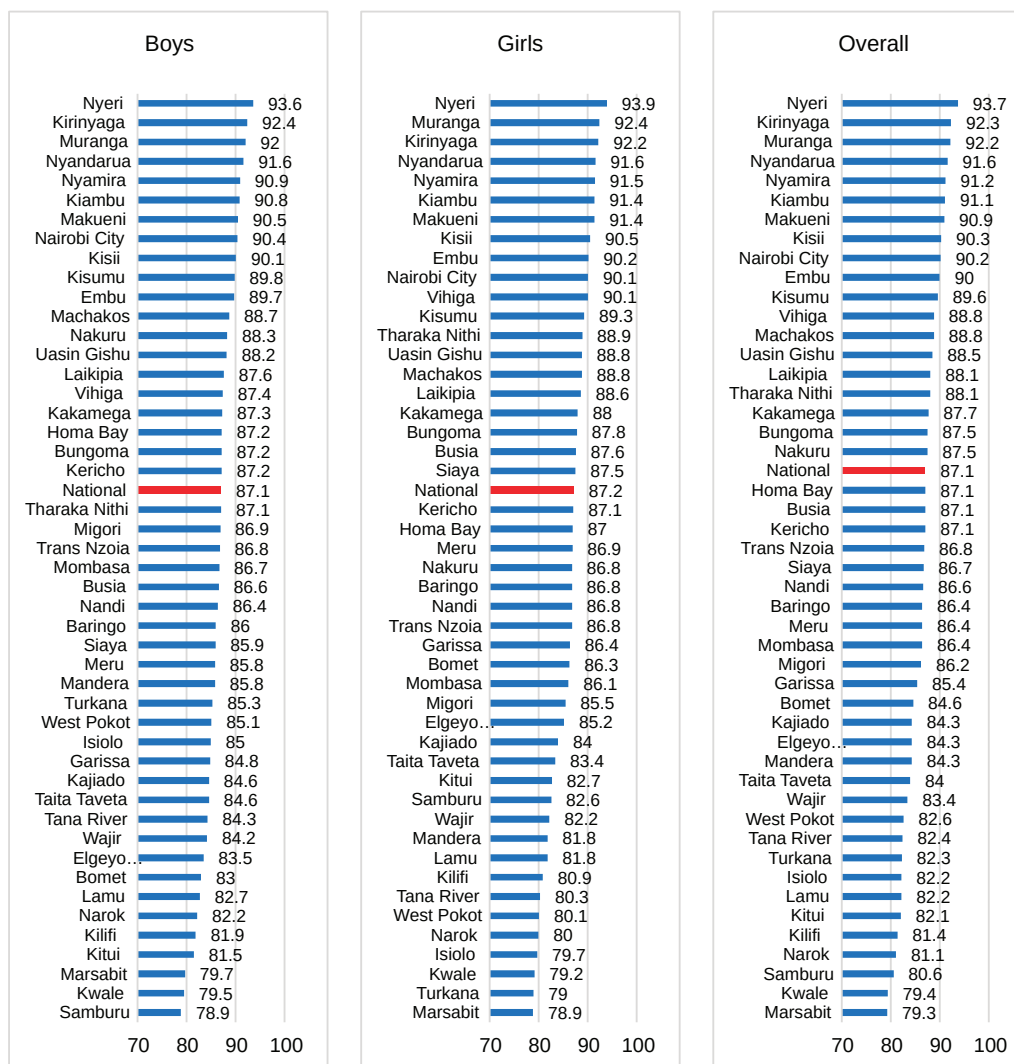

Figure 5. 9: Primary-to-Secondary Transition Rates, 2020

5.3.2 Survival Rates in Secondary Education

Figure 5. 10 presents the survival rates between Form 1 and Form 2, and between Form 1 and Form 4 from 2016 to 2020. The gross survival rates include repetitions and re-entries in the different grades of secondary education. There was a higher retention at form 2 of secondary education, and the over 100 % survival rate accounted for repeaters and students who re-entered the education system. In 2020, 96.4 % of cohort of students who enrolled in the first grade of secondary education in 2017 were able to survive up to the final grade of secondary education. This number include students who repeated or re-entered the education system at secondary level. There was parity in survival rates between boys and girls.

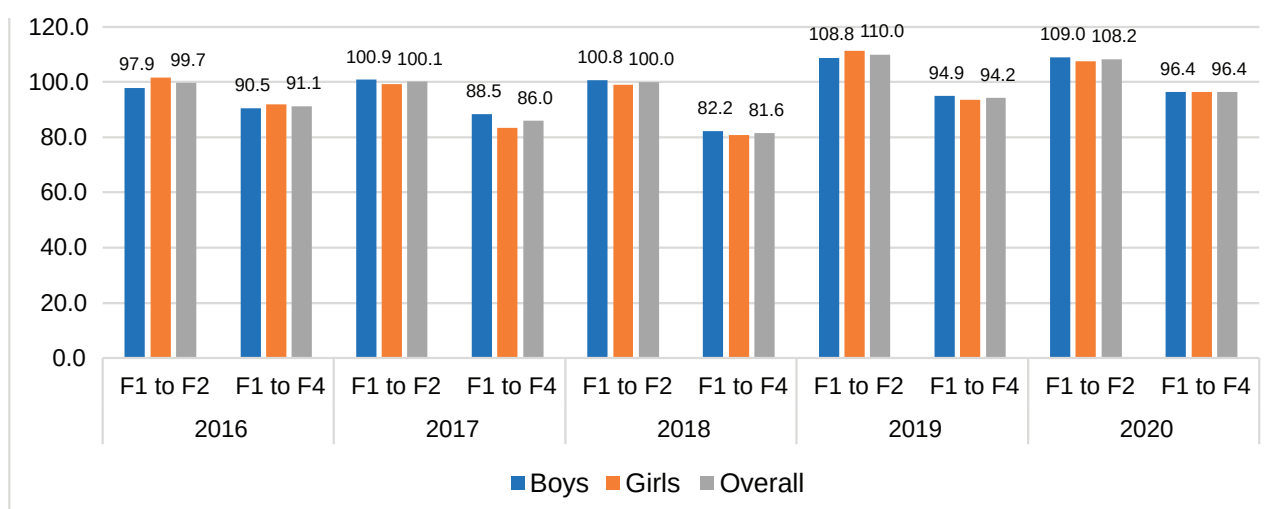

Figure 5. 10: Survival Rates at Secondary Education Level, 2018 – 2020

5.3.3 Teachers, and Student-to-Teacher Ratios at Secondary Education Level

5.3.3.1 Number of Teachers in Secondary Schools

Teachers are a vital input in the achievement of quality education. The availability of a quality teaching force is, therefore, important and needs to be monitored to ensure stability in the teaching and learning process. Table 5. 11 shows the number of teachers by gender and school category as at 2020. The number of secondary school teachers was 115,370 for public schools, and 11,866 for private schools. Whereas the Government of Kenya employs most of the teachers in secondary schools, investment by the private sector in teacher employment has helped to alleviate the problem of teacher shortages. Teachers in private secondary schools accounted for 9.3 % of teachers in secondary schools as at 2020. It was also reported that in 2020, there were 48,626 teachers contracted by the Boards of Management in public secondary schools.

Table 5. 11: Number of Teachers Secondary by Gender and School Category

Category	Male	Female	Total
Public	67,588	47,782	115,370
Private	7,491	4,375	11,866
Total	75,079	52,157	127,236

Source: MoE, Teachers Service Commission

5.3.3.2 Secondary School Teachers by Qualifications

Table 5. 12 shows the trend in the number of teachers in public secondary schools by qualification. In 2020, 82.4 percent of teachers in public secondary schools had bachelor's degree qualification. Teachers with Diploma in Education accounted for 11.4 percent of the teachers in public secondary schools in 2020. About 6 % of teachers in public secondary schools had post-graduate qualifications.

Table 5. 12: Secondary School Teachers by Qualification and Sex, 2017-2020

Qualification	Gender	2017	2018	2019	2020
PhD	Male	1	1	1	106
	Female	5	3	3	75
	Total	6	4	4	181
Masters	Male	1,284	1,084	1,023	3,171
	Female	1,070	927	893	2,659
	Total	2,354	2,011	1,916	5,830
PGDE	Male	34	10	9	723
	Female	18	6	6	237
	Total	52	16	15	960
Bachelors	Male	51,614	55,313	59,074	55,402
	Female	34,341	37,554	40,551	39,647

5.3.3.3 Student-to-Teacher Ratios at Secondary Education Level

Student to teacher ratio is a major indicator of quality education. A lower student teacher ratio indicates that there is increased contact between the individual learner and the teacher, hence improved quality of education. *Table 5. 13* shows the student to teacher ratios for both public and private secondary schools. At the national level, student-to-teacher ratio was satisfactory, at 28 students per teacher. The student to teacher ratio was 29:1 and 14:1 for public and private secondary schools, respectively. These ratios were lower than the recommended standard of 35:1. However, teacher shortages were still being experienced in public secondary schools due to the staffing norms, which stipulate that teachers are posted based on Curriculum Based Establishment (CBE) for each school. The CBE calculates the optimal number of teachers in a school based on the total number of lessons taught, divided by 27. Furthermore, school administrators are expected to have a lower teaching load to allow them time to address administrative requirements of the institution.

Table 5. 13: Student Teacher Ratios at Secondary School Level

Category	Enrolment	No. of teachers	Student Teacher Ratio
Public	3,402,596	115,370	29
Private	166,683	11,839	14
Total	3,569,279	127,209	28

Figure 5. 11 shows the average student to teacher ratios per county for public and private secondary schools. There were notable disparities in the student-teacher ratio (STR) among counties, caused by security-related conditions, as well as climatic and other socio-economic aspects, which have affected teacher retention in some regions. For instance, there were 6 counties with STR in public secondary schools being above the international standard of 1:35. These were Turkana (49), Wajir (46), Mandera (40), Kilifi (40), Siaya (35), Trans Nzoia (36) and Kwale (36). For private secondary schools, all the counties met the international benchmark for teacher ratios, in 2020.

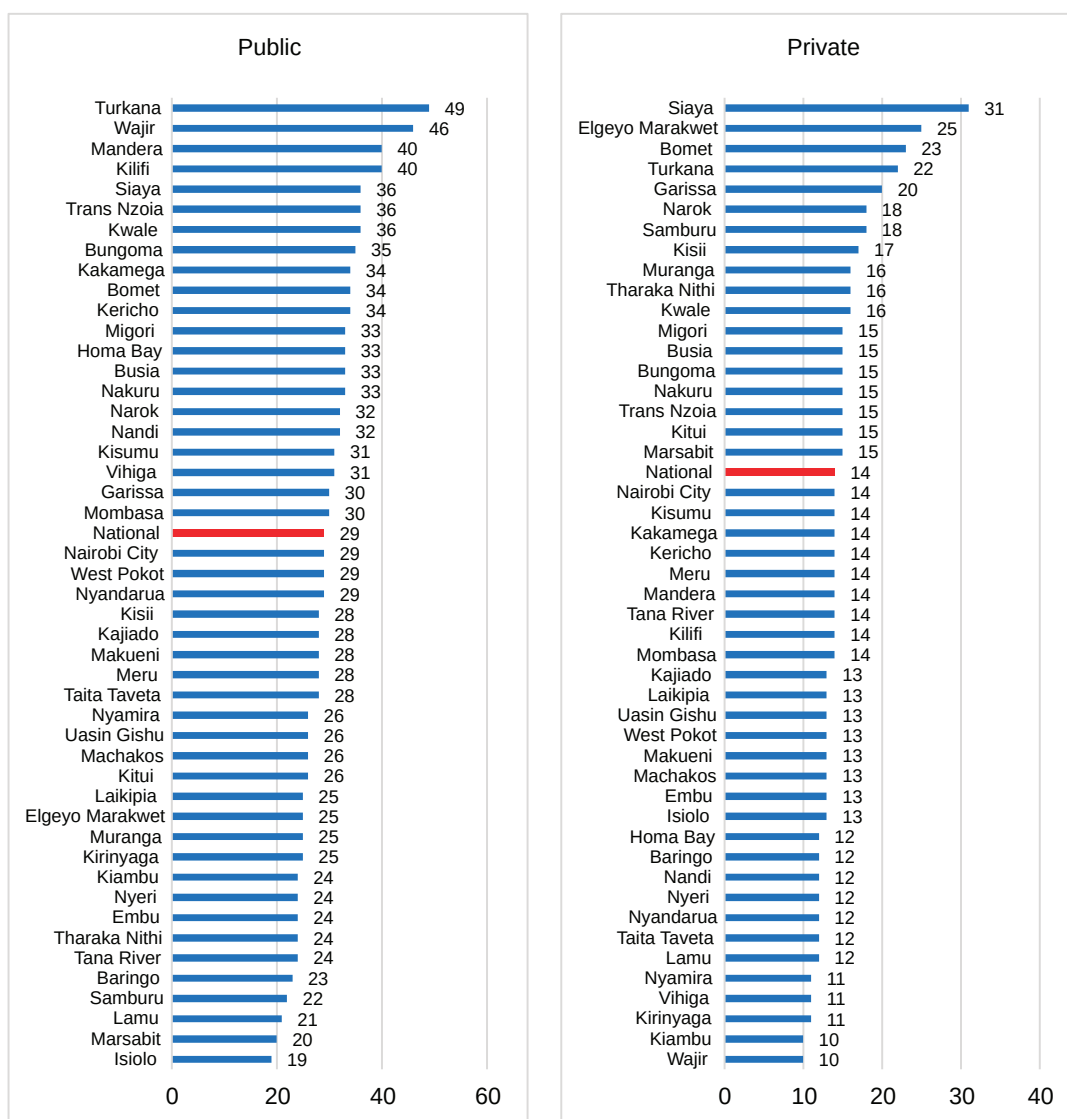

Figure 5. 11: Student to Teacher Ratios at Secondary Education Level, by County, 2020

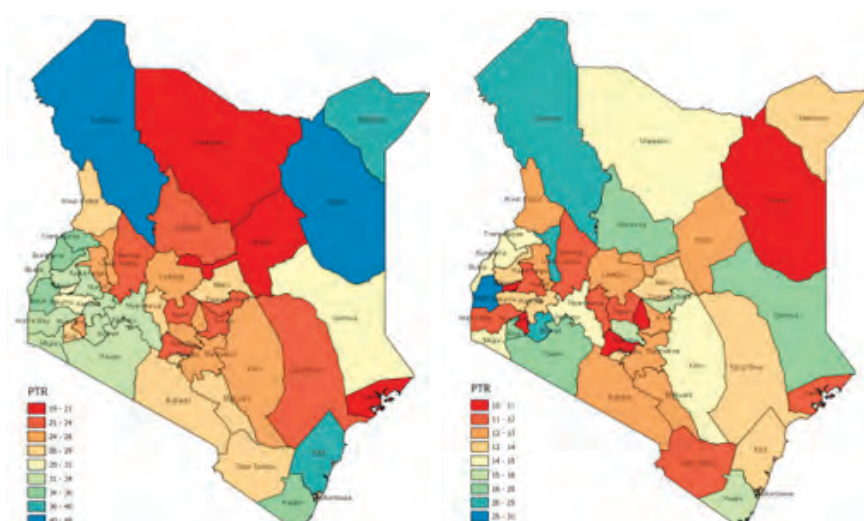

Figure 5. 12: Distribution of Student-Teacher Ratios in Public and Private Secondary Schools, 2020

5.3.4 Student-to-Classroom Ratios in Secondary Education

Table 5. 14 presents the number of classrooms and learner-to-classroom ratio in secondary schools, in 2020. The number of classrooms recorded in secondary schools was 93,276. Of this number, 94 percent were permanent, with 95 percent being in public schools and 91 percent in private secondary schools. In public schools, when considering only permanent classrooms, and with a student population of 3,402,596, the learner-to-classroom ratio was 42. However, when all the classrooms were considered, then the learner-to-classroom ratio reduces to 41. Private secondary schools had better student-classroom ratios, at 22 students per permanent classroom.

Table 5. 14: Classrooms and Learners to Classroom Ratio in Secondary Schools

Type of Structure	Number of Classrooms			Learner to Classroom Ratio		
	Public	Private	Total	Public	Private	Total
Permanent	80,322	7,612	87,934	42	22	41
Permanent & Temporary	84,882	8,394	93,276	40	20	38

Figure 5. 13 shows the learner-to-classroom ratio, per county, for public schools. Turkana has the largest learner-to-classroom ratio, of 56, in public secondary schools. Counties with less congested classrooms in public secondary schools include Lamu, Isiolo and Samburu. It should thus be noted that there were disparities in class sizes across the country.

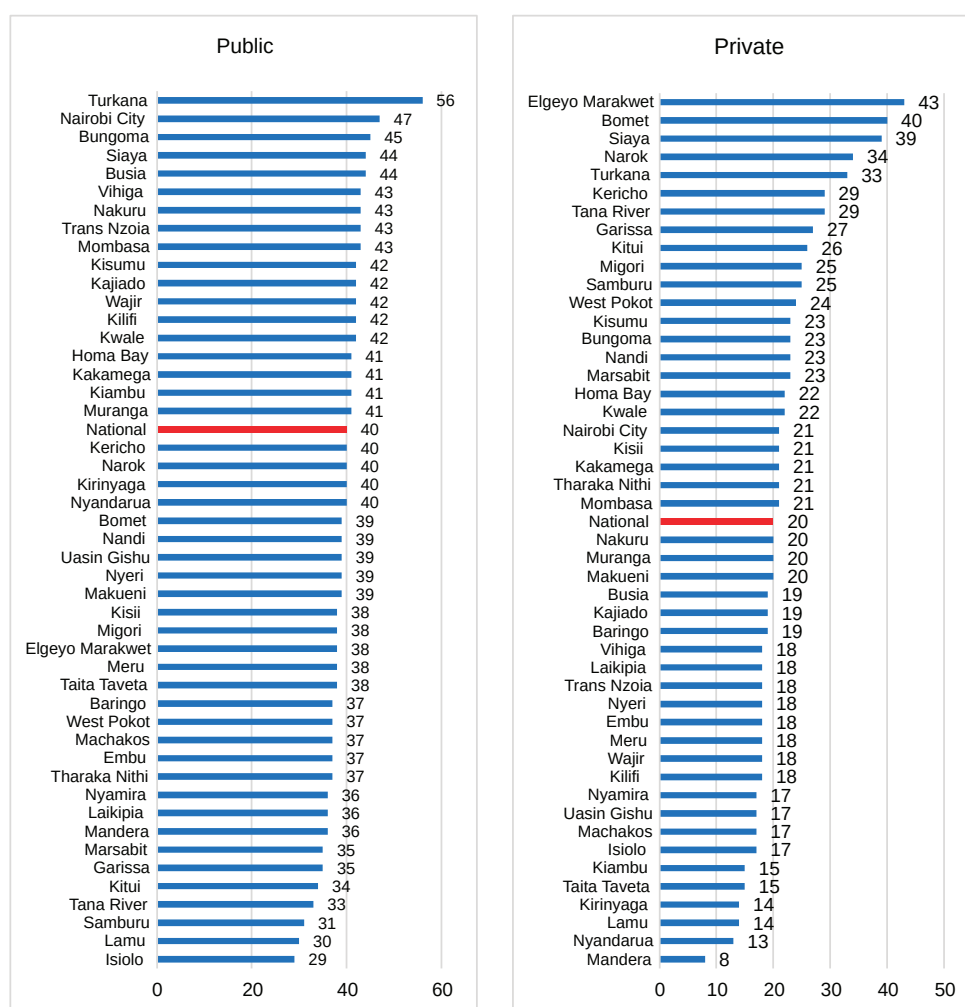

Figure 5. 13: Student-to-Classroom Ratios at Secondary Education Level, 2020

5.3.5 Student-to-Toilet Ratios in Secondary Education

At secondary school level, the recommended student to toilet ratio is one toilet for 25 girls, and one toilet for 30 boys. *Table 5. 15* shows the number of toilets, and student-toilet ratio at the secondary education level in 2020. In public secondary schools, the student-toilet ratio was 22 for boys and 18 for girls. In private secondary schools, the ratio was 12 boys per toilet and 10 girls per toilet.

Table 5. 15: Student-to-Toilet Ratios in Secondary Schools, 2020

Category	Sex	Enrolment	Toilets	Student-to-Toilet Ratio
Public	Boys	1,700,456	78,161	22
	Girls	1,700,925	92,777	18
Private	Boys	74,888	6329	12
	Girls	93,010	9,668	10

Figure 5. 14 shows the student-toilet ratio in public secondary schools across the counties. Wajir, Turkana, Kilifi and Mombasa had not achieved the recommended ratio of student-toilet ratio for boys. On the other hand, Kilifi, Turkana, Wajir, Mombasa, Busia, Kisumu and Garissa had not achieved the optimal student-toilet ratio for girls.

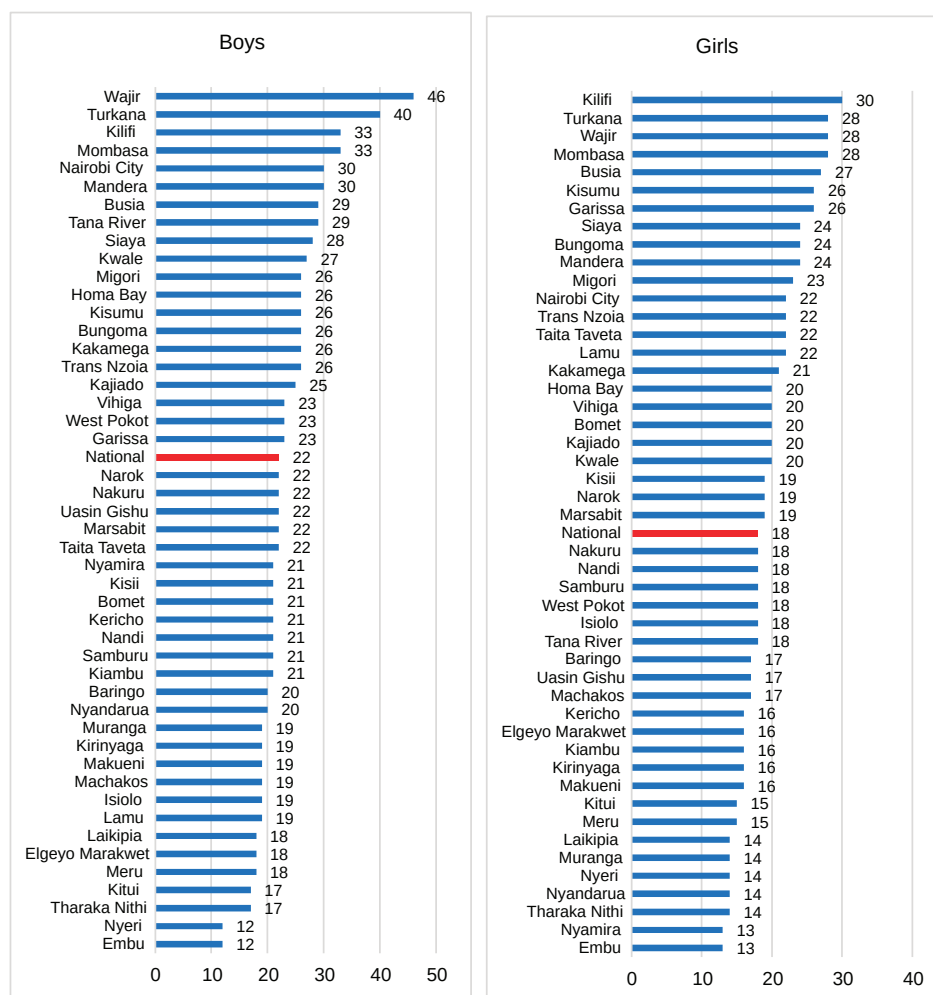

Figure 5. 14: Student-to-Toilet Ratios in Public Secondary Schools, 2020

Figure 5. 15 shows the student to toilet ratio in private secondary schools. All the counties had achieved the optimal student-to-toilet ratio for boys and girls in private secondary schools, based

on the 2020 data. Elgeyo Marakwet, however, did not have boys enrolled in a private school during the period under review.

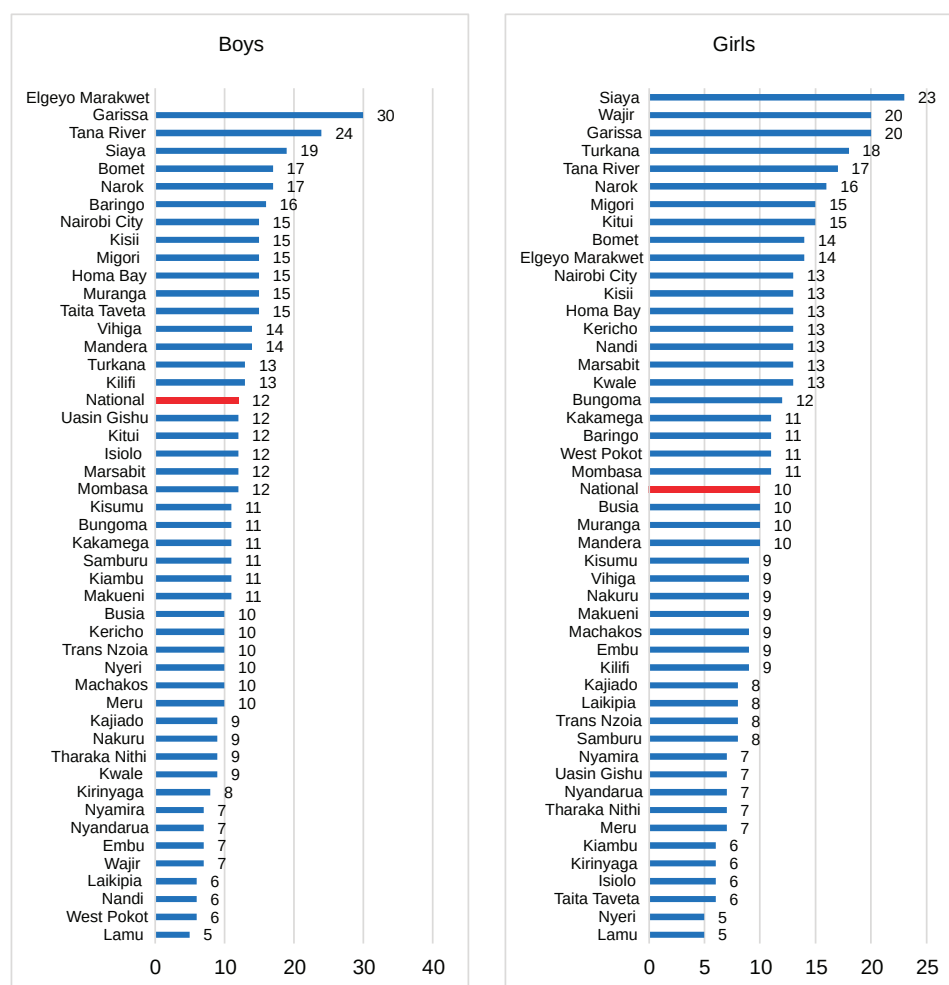

Figure 5.15: Student-to-Toilet Ratios in Private Secondary Schools, 2020

5.3.6 Number of Science Laboratories in Secondary Schools

The standards for laboratories, equipment and materials in stipulate that one laboratory is sufficient for a double-streamed secondary school. This implies that a single laboratory can serve up to 320 students, on average.

Table 5.16 shows that the total number of laboratories in secondary schools was 12,296, with 12 percent located in private schools and the remainder, of 88 percent, located in public schools. The corresponding ratio of students to laboratory indicates that in 2020, public schools had 290 students per laboratory while private schools had a ratio of 105 students per laboratory. Thus, at the national level, the public and private secondary schools had achieved the standard for student-to-laboratory ratio.

Table 5.16: Student-to-Laboratory Ratios in Secondary Schools, 2020

Category	Enrolment	No. of Labs	Student-to-Lab. Ratio
Public	3,402,596	10,775	290
Private	166,683	1,521	105
All	3,569,279	12,296	290

5.3.7 Number of Workshops for Technical Subjects in Secondary Schools

Secondary education curriculum offers optional pre-technical and foundational subjects on technology. The subjects offered include Drawing and Design, Art and Design, Woodwork, Metal Work, Electricity, Aviation Technology, Building Construction, and Power Mechanics. These subjects require appropriately designed and equipped workshops to enable students acquire practical skills. *Table 5. 17* shows that in 2020, there were 1,123 workshops for technical subjects in public secondary schools, while private schools had a total of 437 workshops.

Table 5. 17: Number of Workshops for Technical Subjects in Secondary Schools, 2020

Category	No. of Technical Workshops
Public	1,123
Private	437
All	1,560

5.3.8 Basic ICT Infrastructure in Secondary Schools

Availability of computers in secondary schools can significantly enhance performance in learning and teaching. Functional computers and digital devices are essential educational tools for planning, implementation, and evaluation of learning. *Table 5. 18* presents number of computers in secondary schools and the proportion of schools with functional internet. As of 2020, the number of functional computers in secondary schools was 72,796, where 86 % of these computers were in public schools. On internet connectivity, 32 % of public secondary schools had functional internet connectivity compared to 47 % of private secondary schools.

Table 5. 18: Number of Functional Computers in Secondary Schools

Category	Computers/Tablets	Internet§
Public	62,369	32.2
Private	10,427	46.6
All	72,796	34.0

§ Proportion of primary schools with functional internet

6. NATIONAL ASSESSMENTS AND EXAMINATIONS

6.1. National Assessments

Sustainable Development Goal (SDG) 4, target 4, aims at ensuring that all children complete free, equitable and quality primary and secondary education, leading to relevant and effective learning outcomes by 2030. The corresponding indicator for monitoring this target is the proportion of children and young people who: (a) in Grades 2 and 3; (b) at the end of primary education; and (c) at the end of lower secondary education, achieve at least a minimum proficiency level in (i) Literacy and (ii) Numeracy.

In 2020, the Ministry of Education, through the Kenya National Examinations Council (KNEC), carried out learning assessments in primary school level (from Grade One to Class 8). The learning assessment sought to establish pupils' performance levels in various subjects, after the prolonged closure of schools caused by the COVID-19 pandemic. The main purpose was to inform teachers and other education stakeholders on possible learning loss/gaps, which may have been occasioned by the lack of face-to-face learning and the limited access to remote learning. This was conducted with a view to informing areas of targeted interventions. A census survey was adopted to conduct the assessment in all primary schools across the country.

6.1.1 Re-entry Learning Assessments under the Learning Continuity in Basic Education

The Kenya National Examinations Council administered school-based re-entry assessments under the Learning Continuity in Basic Education (LCBE) initiative. The assessments were conducted in October 2020 and January 2021, in all classes at primary school level. The study comprised the entire population of primary school learners, from Grade 1 to Class 8. Grade 1 to 3 were assessed in literacy and numeracy, Grade 4, Class 5 and 6 were assessed in Mathematics, English, Kiswahili and Science, while Class 7 and 8 were assessed in all the Kenya Certificate of Primary Education (KCPE) subjects. Learners following the stage-based (SNE) pathway were assessed at Foundational and Intermediate Level. The overriding aim of the assessments was to establish entry behaviour of the learners, as well as the learning gaps which may have been caused by lack of face-to-face learning occasioned by the long closure of schools due to the COVID-19 Pandemic. Cumulatively a total of 8,233,334 (Boys 4,226,577 and Girls 4,006,757) were subjected to the assessment.

The assessments established that considerable proportions of learners had achieved the minimum benchmarks in the assessed learning areas/subjects. *Table 6. 1* presents the performance of Grade 1 learners in English Language Activities. It shows that a significant proportion of Grade 1 learners acquired the requisite language skills. For instance, in Listening and Speaking, 16.05 percent and 31.78 percent of the learners performed at Exceeding, and Meeting Expectation levels, respectively. However, low learning outcomes were observed in Reading.

However, close to two-thirds (62.95 %) were below the Meeting Expectation Level. This trend was replicated in Number of Words Read Correctly Per Minute, where 63.27% of the learners fell below the Meeting Expectation Level. Further, in Reading Comprehension, 55.71% of the learners fell below the Meeting Expectation Level. This performance was congruent with that of Kiswahili. In Reading Aloud, and Number of Words Read Correctly per Minute, 38.01% and 36.92% of the learners met the expected standard (fell within the Meeting Expectation level), respectively. It is, however, notable that in both cases, close to two-thirds of the learners were below the Meeting Expectation level. This trend in performance was also noted in Reading Comprehension, where more than a half (58.64%) of the learners performed below the Meeting Expectation Level.

Table 6. 1: Proportion of Grade 1 Learners Achieving Competency Levels in English Language Skills, 2020

Skill/ Content Area	Exceeding Expectation	Meeting Expectation	Approaching Expectation	Below Expectation
Listening and Speaking	16.05	31.78	32.14	20.03
Reading Aloud	12.84	24.21	31.36	31.59
Number of Words Read Correctly per Minute	12.64	24.08	30.93	32.34
Reading Comprehension	15.17	29.12	31.29	24.42
Grammar	14.77	29.88	32.05	23.3
Writing	14.81	27.84	30.25	27.1

Source: Kenya National Examinations

Table 6. 2 shows the proportion of Grade 3 learners achieving different competency levels in English Language Activities. The study noted improved performance in English Language Activities, with 71.31% and 49.22% of the learners attaining the expected standard in Reading Aloud, and Number of Words Read Correctly per Minute, respectively. However, there were still notable gaps in Number of Words Read Correctly Per Minute and Reading Comprehension, with 50.79% and 56.83% of the learners, respectively, performing below the expected standard. This points to low capacity in decoding and reading for meaning.

Table 6. 2: Proportion of Grade 3 Learners Achieving Competency Levels in English Language Activities, 2020

Skill/Content Area	Exceeding Expectation	Meeting Expectation	Approaching Expectation	Below Expectation
Listening and Speaking	20.7	35	29.56	14.75
Reading Aloud	53.66	17.85	17.96	10.53
Number of Words Read Correctly per Minute	19.01	30.21	30.48	20.31
Reading Comprehension	12.33	30.84	31.91	24.92
Grammar	7.11	63.21	19.83	9.86
Writing	10.34	29.23	33.13	27.3

Source: Kenya National Examinations Council

Table 6. 3 shows the proportion of Grade 4 learners, the pioneer Grade for CBC, achieving different competency levels in English Language Activities. It was observable that sizeable proportions of learners met the expected standard in the skills assessed, with, for instance, 20.27% and 18.58% exceeding expectation in Listening and Speaking, and Reading Aloud, respectively. In Writing, a third (33.06%) of the learners performed at Meeting Expectation level, while in Reading Comprehension, and Grammar, 23.40% and 23.80% of the learners, respectively, performed at Meeting Expectation level. However, there was still a proportion of pupils performing at Below Expectation level. For instance, in Listening and Speaking, close to a quarter (24.41%) of the learners performed below expectation, while an almost equal proportion (23.83%) were approaching expectation. Of concern was the high percentage of pupils performing at below expectation in the Number of Words Read Correctly per Minute (fluency/speed and accuracy), Reading Comprehension, and Grammar, at 44.5%, 35.83%, and 33.02%, respectively. Indeed, in Grammar, a substantial percentage (71.31%) of the learners fell within the approaching and below expectation levels. Equally significant to note is the considerable percentages of learners who were below expectation in Reading Aloud (30.75%) and Writing (30.20%). This points to a low capacity in reading for meaning and communication.

Table 6. 3: Percentage of Grade 4 Learners Achieving Competency Levels in English Language Skills, 2020

Skills/Content Area	Exceeding Expectation	Meeting Expectation	Approaching Expectation	Below Expectation	Total
Listening and Speaking	20.27	31.49	23.83	24.41	716,587
Reading Aloud	18.58	25.96	24.72	30.75	705,077
Number of Words Read Correctly per Minute	13.67	3.74	38.24	44.35	705,112
Writing	9.56	33.06	27.19	30.2	593,061
Reading Comprehension	12.3	23.4	28.48	35.83	701,671
Grammar	4.88	23.8	38.29	33.02	676,508

Source: Kenya National Examinations Council

Table 6. 4 presents the proportion of learners achieving various levels of mathematics competencies. There were higher proportions of learners meeting expectation in Subtraction; Length, Mass and Capacity; and Position and Direction Shapes at 29.34%, 25.36%, and 25.18%, respectively. It is, however, notable that more than half (52.51%) of the learners performed below expectation in Division and Fractions. It is also notable that substantial proportions of learners performed below expectation in Length, Mass, and Capacity (45.73%), Subtraction (42.52%), and Multiplication (41.97%).

Table 6. 4: Percentage of Grade 4 learners achieving competencies in Mathematics Sub-strands, 2020

Sub strand	Meeting Expectation	Approaching Expectation	Below Expectation	Total
Whole numbers	24.43	35.94	39.64	758,680
Addition	23.99	49.48	26.53	727,154
Subtraction	29.34	28.14	42.52	723,585
Multiplication	10.19	47.84	41.97	729,302
Division and Fractions	17.9	29.6	52.51	719,870
Length, Mass and Capacity	25.36	28.91	45.73	712,168
Time and Money	20.15	59.11	20.74	712,206
Position and Direction Shapes	25.18	39.51	35.31	710,607

Source: Kenya National Examinations Council

Table 6. 5 presents Class 7 pupils' performance in all the subjects. More than 50% of the pupils who took the assessment attained the minimum proficiency level (gave correct responses to at least a half of the items) in only 3 subjects assessed. For example, in English Language and Islamic Religious Education (IRE), 53.81% and 54.78% of the learners, respectively, attained the 50% benchmark. However, low achievement levels were observed in the Kenyan Sign Language (KSL) Composition, KSL (Language), and Mathematics, with only 16.82%, 19.70%, and 21.73% of the learners, respectively, attaining the minimum proficiency level.

Table 6. 5: Class 7 Pupils' Achievement of Minimum Proficiency per Subject, by Sex, 2020

Subject	Male		Female		Total	
	Attained	Sat	Attained	Sat	Attained	Sat
English Language	236,091	461,080	256,618	454,549	492,709	915,629

Source: Kenya National Examinations Council

National examinations are administered to learners at the end of each learning level cycle. Learners sit for the Kenya Certificate of Primary Education (KCPE) at the end of primary schooling, and Kenya Certificate of Secondary Education (KCSE) at the end of secondary education.

6.2. National Examinations

6.2.1 KCPE National Examinations

6.2.1.1 Number of Candidates in KCPE Examinations

Table 6. 6 shows the number of KCPE candidates by sex and school category, from 2017 to 2020. There was an increase in the number of candidates, by 9.42%, in 2020, compared to a 2.67% increase in 2019. In the four-year period, over 82% of candidates were from public schools. Gender parity was achieved in the number of KCPE candidates, where 50.1% were boys, and 49.9% were girls.

Table 6. 6: Number of KCPE Candidates, by Sex and School Category, 2017 - 2020

Year	Gender	Public	Private	Total
2017	Boys	417,479	86,048	503,527
	Girls	418,819	81,100	499,919
	Total	836,298	167,148	1,003,446
2018	Boys	442,500	86,776	529,276
	Girls	439,499	91,935	531,434
	Total	881,999	178,711	1,060,710
2019	Boys	450,479	95,891	546,370
	Girls	450,717	91,902	542,619
	Total	901,196	187,793	1,088,989
2020	Boys	496,909	99,506	596,415
	Girls	498,721	99,472	598,193
	Total	995,630	195,978	1,194,608

Source: Kenya National Examinations Council

Table 6. 7 shows the number of SNE candidates who sat for KCPE, by sex and school category, from 2017 to 2020. From the table, it is observable that trend in candidature was similar for both male and female candidates, from 2017 to 2020. In 2018, the number of SNE KCPE candidates, in both public and private SNE schools, increased by 18.48% and 23.11%, respectively. However, there was a drop in candidature for both public and private schools in 2019. Notably, in 2019, there was a decline in the number of male candidates, by 4.59%, compared to female candidates. The year 2020, however, recorded an increase of 11% of SNE candidates, which comprised a 9% increase in public schools, and a 30.36% increase in private schools.

Table 6. 7: KCPE SNE Candidates, by Sex and School Category, 2017 - 2020

	2017			2018			2019			2020		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total

6.2.1.2 KCPE performance Trends by Standard Mark Range

Table 6. 8 presents the number of candidates scoring standard mark ranges in KCPE examinations. The proportion of candidates scoring at least 300 marks in KCPE increased from 23.3 percent in 2019 to 24.6 percent in 2020. About 50 percent of the KCPE examinations candidates scored between 201 to 300 marks in 2020

Table 6. 8: KCPE Candidates Performance by Standard Mark Range, 2017-2020

Standard Mark Range	2017	2018	2019	2020
401 - 500	9,846	11,559	9,673	8,091
301 - 400	217,307	223,862	242,821	282,090
201 - 300	529,897	574,173	566,069	589,027
101 - 200	234,308	240,178	263,500	299,677
001 - 100	2,360	2,592	1,393	307
Total Candidates	993,718	1,052,364	1,083,456	1,179,192

Source: Kenya National Examinations Council

6.2.1.3 KCPE Performance Trends

Table 6. 9 shows the KCPE examinations performance, by subject, from 2017 to 2020. As shown in the table, the KCPE national mean score remained below 50%, between 2017 and 2019. The year 2020, however, recorded an above average national mean score, of 53.1%. In the year 2020, low performance was recorded in subjects such as Kenya Sign Language (KSL) Composition, KSL Objective, and English Composition, at 29.4%, 42.9 and 45.1%, respectively. There was, however, high performance in Religious Education (69.9%), Social Studies (61.2%), and Mathematics (60.1%).

Table 6. 9: KCPE Examination Mean, by Subject, from 2017 to 2020

Subject	2017			2018			2019			2020		
	Male	Female	Average	Male	Female	Average	Male	Female	Average	Male	Female	Average
English Language	47.4	47.8	47.6	54.6	54.8	54.7	53.8	53.5	53.6	53.2	53.8	53.5

6.2.1.4 Number of Adult Candidates in KCPE Examinations

The Directorate of Adult and Continuing Education offers a second chance to the out of school youth and adults to study and register for KCPE examination as private candidates. *Table 6. 10* presents the number of Adult and Continuing Education learners who sat for KCPE examination from 2018 to 2020. The number of candidates decreased by 10.3 % from 3,292 in 2019 to 2,953 in 2020. Male candidates represented 61.2 % of the total number of candidates in the year 2020.

Table 6. 10: Number of ACE Candidates in KCPE Examinations, 2018-2020

Gender	2018	2019	2020
Male	2,830	1,903	1,807
Female	2,475	1,389	1,146
All	5,305	3,292	2,953

6.2.2 KCSE National Examinations

6.2.2.1 Number of Candidates in KCSE Examinations

Table 6. 11 shows the number of KCSE candidates, by sex and school category, from 2017 to 2020. The table shows an increase in the number of KCSE candidates by 7.6% in 2020, compared to a 5.3% increase in 2019. In the four-year period, an average of 89% of candidates were from public schools. Gender parity was achieved in the number of KCSE candidates examined, with boys constituting 50.9%, and girls 49%.

Table 6. 11: Number of KCSE Candidates, by Sex and School Category, from 2017 to 2020.

Year	Sex	Public	Private	Total
2017	Boys	281,885	35,685	317,570
	Girls	261,417	36,604	298,021
	Total	543,302	72,289	615,591
2018	Boys	305,115	35,863	340,978
	Girls	286,596	36,906	323,502
	Total	591,711	72,769	664,480
2019	Boys	322,631	34,448	357,079
	Girls	308,200	34,427	342,627
	Total	630,831	68,875	699,706
2020	Boys	350,112	33,096	383,208
	Girls	335,111	34,283	369,394
	Total	685,223	67,379	752,602

Table 6. 12 shows the number of SNE KCSE candidates, by gender and school category. The table shows that there was low participation of the private sector in the provision of SNE, as seen from the low number of candidates registered for KCSE examination in the private institutions. However, the number of SNE KCSE candidates increased steadily, from 2017 to 2020. During the period under review, more boys than girls registered for the KCSE examination, in both public and private SNE schools.

Table 6. 12: Number of SNE KCSE Candidates, by Sex and School Category, from 2017 to 2020

	2017			2018			2019			2020		
	Boys	Girls	All	Boys	Girls	All	Boys	Girls	All	Boys	Girls	All
Public	732	530	1,262	786	574	1,360	853	688	1,541	969	756	1,725
Private	72	54	126	75	53	128	72	47	119	87	71	158
Total	804	584	1,388	861	627	1,488	925	735	1,660	1,056	827	1,883

6.2.2.2 KCSE Performance Trends

Figure 6. 1 shows the proportion of candidates in KCSE examinations attaining at a Mean Grade of at least C+. there was a steady rise in the proportion of candidates scoring C+ and above, which is the minimum entry requirement for placement to university programmes. The proportion of male candidates was consistently higher than of female candidates since 2017.

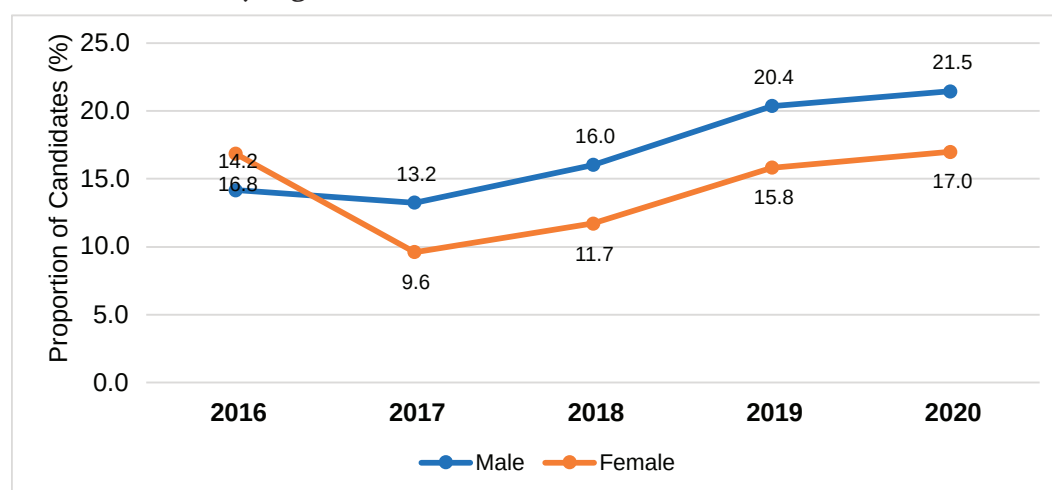

Figure 6. 1: Proportion of KCSE Candidates Scoring Grade C+ and Above, 2016-2020

Table 6. 13 shows KCSE performance, by sex, from 2016 to 2020. In the period 2018 to 2020, the number of candidates who scored a Mean Grade of C+ and above, which is the minimum entry requirement for university undergraduate education, was on an upward trend. The number increased to 143,142 candidates, in 2020, compared to 125,835 in 2019, representing a percentage increase of 13.8%. The number of candidates scoring a Mean Grade of C, which is the minimum for qualifying for diploma entry, increased from 63,157 (9.5%) in 2019 to 85,459 (11.5%) in 2020. The percentage of candidates scoring between C- and D, who qualify for Certificate level, declined to 47% in 2020, from 49% of the total candidates in 2019. Similarly, the number of candidates attaining D- and E declined to 22% in 2020 compared to 27% in the previous year. However, more boys than girls attained grade E throughout the reporting period.

Table 6. 13: KCSE Performance, by Sex, from 2016 to 2020

KCSE Grade	2016		2017		2018		2019		2020

7. TEACHER EDUCATION

7.1. Number of Teacher Training Colleges

Pre-service teacher education programmes are offered to ensure that persons entering the teaching service are qualified and competent to implement curriculum in basic education learning institutions. There are four types of teacher education programmes, namely ECDE course for pre-primary school teachers; Certificate in Primary Teacher Education (P1) course for primary school teachers; Diploma in Teacher Education course for secondary school teachers and Bachelor of Education course for secondary school teachers. Teacher education programmes for prospective pre-primary, primary and Diploma teachers for secondary schools are offered in Teacher Training Colleges (TTCs), which are institutions under the State Department for Early Learning and Basic Education.

There is a shift in teacher education policy to have diploma in teacher education as the minimum qualification in the teaching service. Therefore, ECDE and P1 course are being phased out, and serving teachers are expected to upgrade their qualification to meet the requirements for implementation of the Competency-Based Curriculum (CBC). However, data presented in this report is for P1 and Diploma courses for the period under review.

7.2. Number of Tutors in Teacher Training Colleges

During the period under review, there were 32 public and 41 private TTCs offering P1 course. Diploma in Teacher Education was offered in 3 public colleges. Table 7. 1 shows the number of tutors in the two teacher education programmes. The number of tutors in the P1 TTCs reduced by 19.7 percent from 1,820 in 2019 to 1,461 in 2020. Public TTCs accounted for 69.7 percent of the tutors in the P1 TTCs. There were 180 tutors in the 3 public Diploma TTCs in 2020, a reduction of 5.3 percent from 190 tutors in 2019.

Table 7. 1: Number of Tutors in Teacher Training Colleges, 2016-2020

Course	Gender	2016		2017		2018		2019		2020	
		Public	Private	Public	Private	Public	Private	Public	Private	Public	Private
P1	Male	751	314	791	304	780	317	726	291	566	271
	Female	611	221	652	232	698	231	581	212	453	189

	Female	91	-	96	-	101	-	89	-	87	-
	Total	191	-	205	-	205	-	190	-	180	-

7.3. Enrolment in P1 Teacher Training Colleges

Table 7. 2 presents students enrolment in primary (Certificate) TTCs. There were 11558 teacher trainees enrolled in the TTCs in 2020. This comprised of 4,613 male and 7,455 female trainees enrolled in 2nd Year and 3rd Year in the colleges. Lack of trainees enrolled in 1st Year was due to change of policy on qualifications from P1 to Diploma, as well as effect of COVID-19 pandemic.

Table 7. 2: Enrolment in P1 Teacher Training Colleges, 2016-2020

Year	Year of Study	1st Year			2nd Year			Total		
		Male	Female	Total	Male	Female	Total	Male	Female	Total

8. ADULT AND CONTINUING EDUCATION

The Directorate of Adult and Continuing Education provides basic literacy and continuing education for out of school youth and adults. This chapter reviews the number of ACE centers and enrolment in ACE programmes in 2020. The programmes were sponsored by the National and County Governments, NGOs and Faith Based Organizations.

8.1. Number of Adult and Continuing Education Centers

Table 8. 1 presents the number of ACE centres. The number of centres reduced by 4.4 % from 5,161 in 2019 to 4,932 in 2020. The decrease in the number of centres was attributed to volunteer instructors exiting the ACE programme; and conclusion of projects sponsored by CBOs and FBOs.

Table 8. 1: Number of Adult and Continuing Education Centres, 2018-2020

Year	2018	2019	2020
Centres	5340	5161	4932

Figure 8. 1 shows the distribution of ACE centers among the counties. West Pokot, Nairobi City and Kitui had the highest number of centers, while Lamu, Isiolo, Tharaka Nithi, Tana River and Mombasa had the lowest number of ACE centers

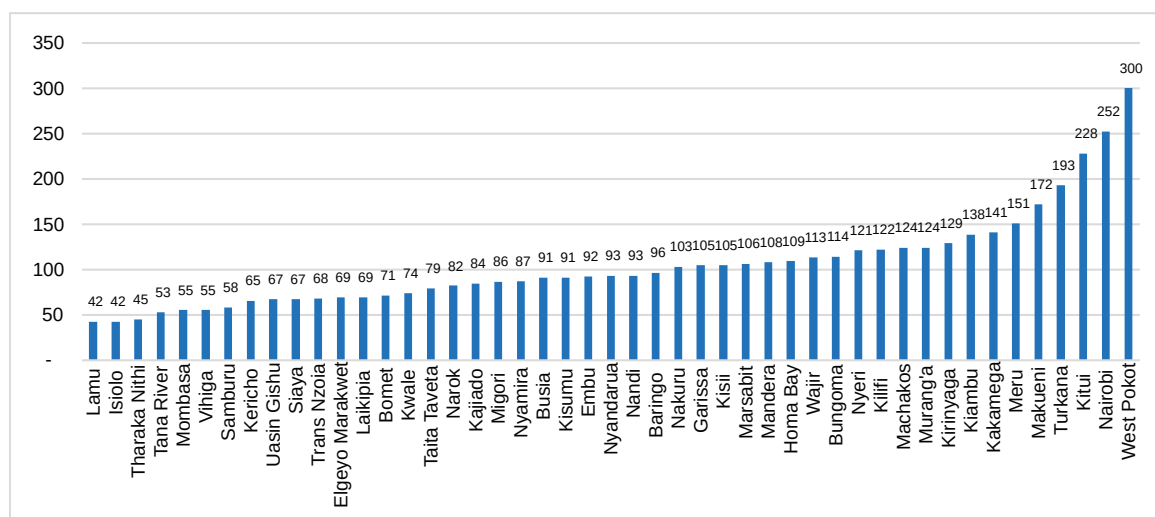

Figure 8. 1: Number of Adult and Continuing Education Centers by County, 2020

8.2. Enrolment in Adult and Continuing Education Programmes

Table 8. 2 shows the enrolment in Adult and Continuing Education from 2018 to 2020. The total enrolment of Adult Education learners dropped by 9.4 % from 209,082 in 2019 to 189,443 in 2020. Female learners accounted for 66.7% of the total enrolment in 2020

Table 8. 2: Enrolment of Adult and Continuing Education Learners, 2018-2020

Gender	2018	2019	2020
Male	65,642	65,497	63,045
Female	146,799	143,585	126,398
Total	212,441	209,082	189,443

Figure 8. 2 shows enrolment in ACE in 2020. Nairobi City recorded the highest enrolment of adult learners during the period under review, followed by West Pokot. Lamu, Isiolo, Kirinyaga, and Tana River recorded the lowest enrolment in 2020. In West Pokot, enrolment was attributed to partnership with the County Government who engaged 277 community mobilizers to mitigate low literacy level in the ccounty

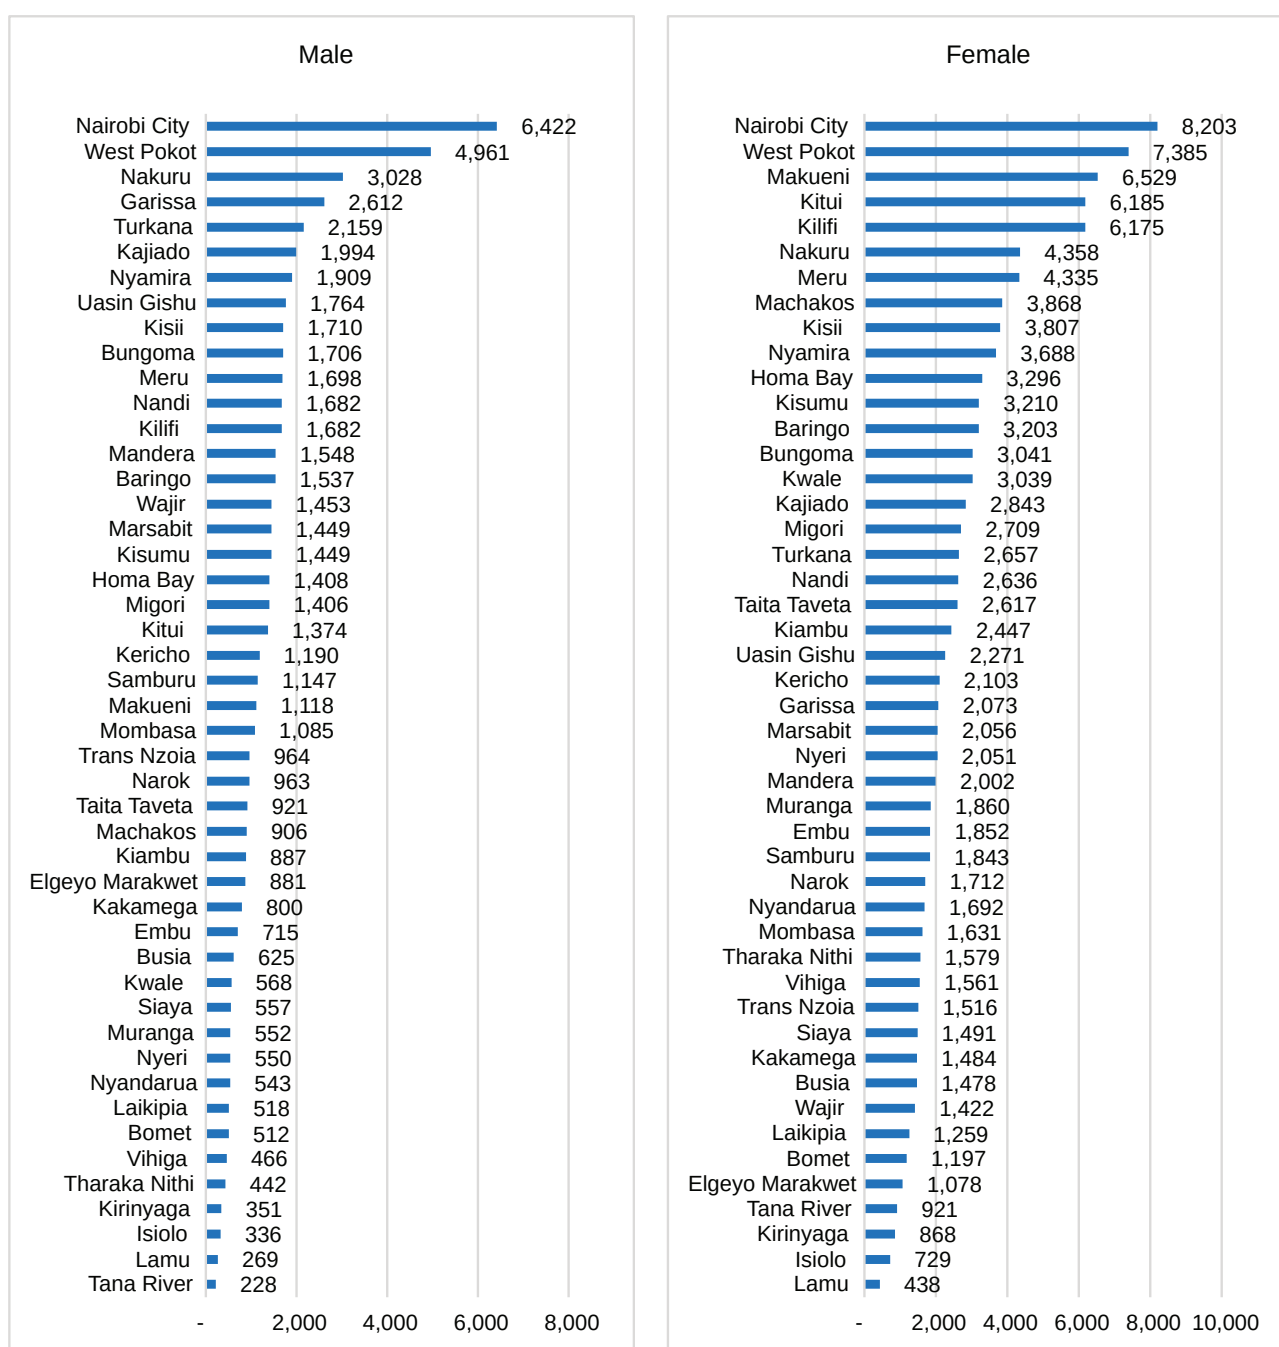

Figure 8. 2: Enrolment in ACE Programmes by County, 2020

9. EDUCATION FINANCING

This section discusses the financing of education for the period under review. *Table 9. 1* shows expenditure on education, by source of funding, for the period 2018/19 to 2020/21. Total expenditure on education rose from KES 625.4 billion in 2018-19 to KES 794.6 billion in 2020/21. The National Government and Households were the two largest funders of education. For instance, during the FY 2020/21, 52% and 32% of spending in the sector were from the National Government, and Households, respectively. The National Government expenditure increased from KES 316.7 B, in 2018/2019, to KES 424.7 B, in 2020/2021. Household expenditure consists of fees and other indirect expenses borne by parents towards meeting the costs of education. Internally Generated Revenue and County Governments are other important sources of funding for the sector.

Table 9. 1: Expenditure on Education, by Source, in Million Kenya Shillings, 2018/19 to 2020/21

	Funding by Source KES. Millions			Percentage		
	2018/19	2019/20	2020/21	2018/19	2019/20	2020/21
National Government	412,102	429,963	428,504	55.00	54.00	53.00
NG-CDF	6,340.40	6,594.00	15,965.80	1.00	1.00	2.00
County Governments	24,609.40	31,402.50	32,707.35	3.00	4.00	4.00
Household (Parents)	245,869.30	249,124.10	252,362.72	32.00	32.00	31.00
NGOs and Religious Bodies	3,962.70	4,121.20	4,146.09	1.00	1.00	1.00
Private Sector and Companies	118.9	123.6	123.63	0.02	0.02	0.02
External Loans and Grants	14,153	19,481	19,939	2.00	2.00	2.00

Table 9. 2 shows programme allocation for the education sector. Total government allocation to the education sector rose by 3.5 %, from KES. 471,846 million in 2018/19, to KES 489,355 million, in 2020/21. The Teacher Resource Management programme accounted for the largest expenditure over the three years, taking 54% of the total education sector allocation in 2020/2021. The expenditure under Teacher Resource Management was mainly for salaries for teachers in primary and secondary schools. During the Financial Year 2020/2021, University Education was allocated KES. 91,152 million, which accounted for 18.7% of total expenditure. Primary and Secondary Education programmes took up 4% and 14%, respectively. This expenditure mainly catered for capitation for Free Primary Education (FPE), and Free Day Secondary Education (FDSE), as well as capital expenditure for infrastructure improvement.

Table 9. 2: Programme Allocation for the Education Sector

Programme	APPROVED BUDGET		
	2018/19	2019/2020	2020/2021
Primary Education	20,396	19,881	20,355
Secondary Education	68,707	65,446	68,689
Quality Assurance and Standards	4,331	4,687	3,466
Technical Vocational Education and Training	18,230	21,508	22,452
Youth Training and Development	2,156	2,110	2,100
University Education	108,865	121,016	91,152
Research, Science, Technology and Innovation	2,654	2,218	840
Teacher Resource Management	233,823	249,442	267,060
Governance and Standards	542	402	1,003
Workplace Readiness		23	15
Post Training Information Service		19	7
General Administration, Planning and Support Services	12,142	11,358	12,216
TOTAL FOR THE SECTOR	471,846	498,110	489,355

Table 9. 3 shows the allocation of expenditure, by programme, in the Early Learning and Basic Education (EL&BE) sub-sector. A large share of spending goes to recurrent expenditure, accounting for about 90% of spending across the programmes. The Secondary Education programme took up the highest share of expenditure, in terms of recurrent and development spending, over the three-year period. Nevertheless, recurrent spending for the Secondary Education programme reduced from KES. 63,389 in 2018/19 to KES. 63,363 in 2020/21, reflecting a reduction of 0.4 %. On the other hand, capital expenditure, targeted at expanding infrastructure in secondary schools, had a slight increase from KES 5.319 billion in 2018/19 to stand at KES 5.326 billion in 2020/21. Primary Education programme was the second biggest spender, with a large share of the programme expenditure being in FPE capitation grants. Other programmes allocated funding were Quality Assurance and Standards, and General Administration.

Table 9. 3: Expenditure in Basic Education, by programme, in KES Millions, 2018/19 - 2020/21

Programme	2018/19		2019/2020		2020/2021	
	Recurrent	Development	Recurrent	Development	Recurrent	Development
Primary Education	16,297	4,100	17,693	2,190	16,900	3,454
Secondary Education	63,389	5,319	63,376	2,037	63,363	5,326
Quality Assurance	4,073	257	4,373	314	3,366	100
General Administration	4,636	143	4,297	20	4,594	50
Total	88,395	9,819	89,739	4,561	88,223	8,930

Table 9. 4 shows that a large share of the spending within Primary and Secondary Education programmes was Capitation Grants to learners to cater for FPE and FDSE. Examinations and Invigilation fees, Infrastructure development, School Feeding Programme and ICT integration were key priority areas funded across Primary and Secondary Education.

Table 9. 4: Primary and Secondary Education Financing Levels for Key Areas

	2018/19	2019/2020	2020/2021

Special Needs		200	200

10. SUMMARY OF FINDINGS, RECOMMENDATIONS AND POLICY IMPLICATIONS

It is clear that for education and training to provide the required knowledge, skills and attitudes for the desired transformation of Kenya into a newly industrialising, middle-income country; credible, reliable and timely data and information is of paramount importance. This is because credible and reliable data is vital for decision making; policy analysis and formulation; planning; management; and monitoring and evaluation, at all levels of the education sector. The process of the collection, storage, integration, processing, maintenance and dissemination of data and information is as important as the data itself, and for this to happen, a robust data management system has to be in place.

10.1. Summary of Findings

The following is the summary of findings, drawn from the available data.

Number of Institutions

Over the three years, the number of basic education institutions has slightly declined at primary and secondary education levels. The number of existing pre-primary institutions could not be conclusively determined. Nevertheless, there exist regional disparities in the distribution of the institutions. The number of private institutions, in proportion to public institutions, progressively declined as the levels of basic education advanced. In relation to SNE, the government is still the main provider of basic education.

Enrolment

The enrolment rate in private institutions, in proportion to public institutions, progressively declined as the levels of basic education advanced. Whereas gender parity has been achieved at the national level in both primary and secondary education, the same is yet to be achieved in pre-primary. At the county level, there were still gender disparities across all levels of basic education. There exist some data gaps on enrolment in pre-primary and SNE institutions. For SNE, the gaps exist across all levels.

Access Rates

The Gross Enrolment Rate (GER) improved at all levels over the three-year period. The Net Enrolment Rate (NER) across all levels also improved in 2020. In addition, there was significant improvement in the transition rate from primary to secondary education. There was also an improvement in the retention rate for Grade 1 to Class 6, with the rate dropping from Class 7 to 8. At secondary school level, the rate improved for Form 1 to 2, dropping for Form 3 to 4. There was a higher completion rate in the secondary school cycle compared to the primary school cycle. There would be a higher completion rate for a six-year primary school cycle compared to the existing eight-year cycle.

Class Size

The country has realized the recommended learner-to-classroom ratio, both at primary and secondary school levels. However, there still exist disparities in class sizes across the counties. It was, however, not possible to make a finding on the quality of the classrooms, due to data gaps.

Access to Electricity and Internet

Majority of the public primary schools have access to electricity and internet and therefore, implementation of e-learning will be enhanced. Nevertheless, the internet access devices and bandwidth provided might not have the capacity to support school-wide e-learning.

Teachers

At national level, the country has generally met the recommended pupil teacher ratio at primary and secondary school levels. However, there still exist disparities in teacher distribution, with some counties having very high ratios. This is attributed to cultural and climatic conditions, which have led to low enrolment and teacher shortage.

Assessment and Examination

Pupils attaining specific level competencies per subject improved. However, pupil acquisition of higher-level skills continues to be low and there were gender disparities in achievement in literacy and numeracy, at both primary and secondary school levels. In national examinations, gender parity was achieved. However, the number of candidates registered from private schools is declining, especially in the KCSE examinations. In SNE, there is a gender disparity in favour of boys when it comes to registration of national examinations.

Financing

Expenditure on education increased substantially in the review period, 2016/17 to 2020/21. Public funding is the leading source of funds used in education. Nevertheless, households contributed significantly to education, suggesting that the cost of education is still significant to parents. The main items of recurrent expenditure in primary and secondary education were teacher salaries and capitation for FPE and FDSE. Capital expenditure declined over the period, against the backdrop of increasing enrolment. Expenditure on Quality Assurance and Standards, and General Administration, took up the lowest share of allocation.

10.2. Recommendations and Policy Implications

The sector commits to build and mainstream a culture of using data in making policy decisions, planning, budgeting, implementation tracking, and monitoring and evaluation. This will be articulated in a Data Management Policy, with accompanying legislation in the form of Regulations, anchored in the Basic Education Act, 2013.

Develop NEMIS Policy and Regulations

The Ministry of Education will develop a policy framework for administration and management of education data and information. The policy will ensure that the education sector has a systematic process of data collection, collation, storage and analysis, as well as reporting and dissemination of statistical reports. The policy sets standards that will prescribe and ensure that credibility, timeliness, relevance and protection of data is assured. The policy will facilitate periodic data collection and reporting, as demanded by the users and policy makers.

Establish a Collaborative Framework on Data Management with County Governments

The Constitution defines the mandate of pre-primary education to be under the county governments. The national government has the policy, and quality assurance and standards mandate. ECDE data is crucial in informing reforms such as the implementation of the Competency Based Curriculum and the monitoring of County ECDE programmes. In this regard, the Ministry will work closely with county governments to ensure that ECDE data is integrated in the national education statistics system. To have an integrated NEMIS that includes pre-primary education, the Ministry of Education will require a Policy Framework to declare NEMIS the single source of data for Basic Education, including pre-primary education, and provide guidelines on how the counties' data will be integrated into the National Education Management Information System (NEMIS). Therefore, administrative structures for inter-governmental coordination should be established.

Increase the Scope of Reporting

Currently, the indicators reported on in the Basic Education Statistics Booklet 2020 were not comprehensive, to cover the full mandate of MoE and the international indicators of measuring

and comparing progress in education development. Going forward, the Ministry will increase the scope of production of education statistics by covering functions like quality assurance services, school audit services, status of infrastructure, and monitoring and evaluation, among others. At the international level, Kenya's commitments in the Sustainable Development Goal 4 (SDG4) and the Continental Education Strategy for Africa (CESA) call for incorporation of more indicators in the Education Statistics reporting framework.

Improve Coverage of Data

The Ministry of Education will develop a policy framework to motivate all stakeholders to regularly submit complete and disaggregated data to the Ministry on a regular basis. The ministry will also review the data collection tools for the 2021 school year to include items to address the data gaps at all levels, such as the age specific data at ECE, and item of category of disability/special need of the learner or teacher.

Develop an Advocacy and Awareness Strategy for Education Statistics

To promote a positive attitude, which will lead to the use of data for policy decision making at various levels, an advocacy programme is necessary. The strategy will spell out the importance and benefits of generating data and use of that data to inform planning, resource allocation, monitoring implementation and reporting progress. The Ministry will develop and implement an advocacy and awareness strategy with education stakeholders to promote the use of statistics to inform decisions at various levels of education service delivery.

Carry out a Comprehensive Mapping of Schools and Learning Institutions

To enhance better planning and align resource requirements to learning outcomes in basic education and match supply and demand in the provision of inclusive and equitable quality education, a comprehensive school mapping is necessary. For instance, this will aid in the rationalising of the establishment of schools and allocation of resources.

Carry out Periodic Validation of Data in NEMIS

Education statistics are dynamic and are affected by the national and regional demographic patterns. In order to enhance the quality and credibility of data, and carry out quality assurance of the data generated at institutional level, there is a need for a bi-annual validation of data in the National Education Management Information System (NEMIS).

Downloaded from <http://ajph.org/> at University of California, San Diego on June 11, 2015

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a guide for handwriting or typing. The paper itself is a clean, off-white color. There are no margins, text, or other markings present on the page.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
